# TABLE OF CONTENTS

**Preface** ix

1 **Introduction** 1
   1.1 Current Issues in Water Management 5
   1.2 Characteristics of Effective Watershed Management 8
   1.3 Why “Integrated” Management? 10
   1.4 A Recommended Planning and Management Approach 13

2 **The Watershed Inventory** 16
   2.1 Physical Features and Landforms 16
   2.2 Climate 18
   2.3 Soils, Infiltration, and Runoff 26
   2.4 Streamflow 32
   2.5 Groundwater 36
   2.6 Water Quality 40
   2.7 Plant and Animal Communities 49
   2.8 Land Use 55
   2.9 Social and Economic Systems 60
   2.10 Valued Features and Activities 62

3 **Problem Definition and Scoping** 64
   3.1 Identifying Current Water Uses and Use Impairments 64
   3.2 Identifying Current Water Users (Stakeholders) 75
   3.3 Setting Targets for Future Use 80
   3.4 Scoping the Plan 91

4 **The Consultation Process** 101
   4.1 The Need for Public Involvement 101
   4.2 Principles of Consultation 103
   4.3 Identifying Interested Publics 110
   4.4 Public Involvement Techniques and Processes 117
   4.5 Evaluating the Results 139

v
### TABLE OF CONTENTS

5 Developing Workable Management Options 141
- 5.1 Identifying the Sources 141
- 5.2 Creating a Long list Of Management Options 146
- 5.3 Types of Options 147
- 5.4 Developing Mutually Exclusive Management Alternatives 154
- 5.5 Evaluation Constraints and Criteria 157

6 Simple Assessment Methods 166
- 6.1 The Watershed Inventory 167
- 6.2 Scoping 169
- 6.3 Developing and Screening Management Alternatives 173
- 6.4 Outputs of a Simple Assessment Process 192
- 6.5 An Example of the Application of Simple Assessment Procedures 195

7 Detailed Assessment Methods 204
- 7.1 The Detailed Watershed Inventory 205
- 7.2 Scoping 222
- 7.3 Developing and Screening Management Alternatives 235

8 Costing and Financing 256
- 8.1 Scope and Measures 256
- 8.2 Costing Major Public Works 270
- 8.3 Benefit-Cost Analysis 273
- 8.4 Allocation of Costs Among Multipurpose Projects 280
- 8.5 Quantifying Intangibles 281
- 8.6 Incorporating Risk and Uncertainty in Economic Analyses 284
- 8.7 Capital Financing (Sourcing) 296

9 Legal, Institutional, and Administrative Concerns 300
- 9.1 The Evolution of Modern Environmental Protection Legislation 300
- 9.2 Common-Law Causes of Action 309
- 9.3 The Making of Laws 313
- 9.4 Existing Legal Frameworks for Water and Environmental Management 320
- 9.5 Administrative and Institutional Systems 337
- 9.6 Transboundary Water Issues and Free Trade 342

10 Environmental and Social Impact Assessment 343
- 10.1 The History of Environmental Assessment Policy 343
- 10.2 Overview of the EA Process 345
| 10.3 Challenges in Environmental Assessment | 350 |
| 10.4 Environmental Assessment Methodologies | 355 |
| 10.5 Social Impact Assessment | 364 |
| 10.6 Strategic Environmental Assessment | 369 |
| 10.7 Monitoring and Follow-Up | 371 |
| 10.8 The Shortcomings of Environmental Assessment | 372 |

| 11 Choosing the Best Plan | 376 |
| 11.1 Evaluating the Effectiveness of Options and Strategies | 376 |
| 11.2 Implementation Considerations | 383 |
| 11.3 Case Study: Watershed Management for Gander Lake, Newfoundland | 385 |

| 12 Implementing the Plan | 388 |
| 12.1 Principles of Water Resources Administration | 389 |
| 12.2 Planning for Successful Implementation | 394 |
| 12.3 Why Implementation Sometimes Fails | 404 |
| 12.4 Case Studies | 408 |
| 12.5 Lessons Learned | 418 |
