<tr>
<td><strong>Preface</strong> ........................................... ix</td>
</tr>
<tr>
<td><strong>List of Figures and Tables</strong> ............................... xiii</td>
</tr>
<tr>
<td><strong>Introduction</strong> ........................................... xv</td>
</tr>
<tr>
<td><strong>Chapter 1. What is Big Data?</strong> .............................. 1</td>
</tr>
<tr>
<td>1.1. The four “V”s characterizing Big Data .................. 3</td>
</tr>
<tr>
<td>1.1.1. V for “Volume” .................................... 3</td>
</tr>
<tr>
<td>1.1.2. V for “Variety” .................................... 4</td>
</tr>
<tr>
<td>1.1.3. V for “Velocity” .................................... 8</td>
</tr>
<tr>
<td>1.1.4. V for “Value”, associated with Smart Data .......... 9</td>
</tr>
<tr>
<td>1.2. The technology that supports Big Data .................. 10</td>
</tr>
<tr>
<td><strong>Chapter 2. What is Smart Data?</strong> .............................. 13</td>
</tr>
<tr>
<td>2.1. How can we define it? .................................. 13</td>
</tr>
<tr>
<td>2.1.1. More formal integration into business processes .... 13</td>
</tr>
<tr>
<td>2.1.2. A stronger relationship with transaction solutions .... 14</td>
</tr>
</tbody>
</table>
2.1.3. The mobility and the
temporality of information. .............................. 15
2.2. The structural dimension. ............................ 17
  2.2.1. The objectives of a BICC ....................... 17
2.3. The closed loop between
Big Data and Smart Data ................................ 18

CHAPTER 3. ZERO LATENCY ORGANIZATION .................. 21
  3.1. From Big Data to Smart Data
for a zero latency organization .......................... 21
  3.2. Three types of latency .............................. 21
    3.2.1. Latency linked to data ........................ 21
    3.2.2. Latency linked to analytical
    processes ........................................... 22
    3.2.3. Latency linked to decision-
    making processes ................................... 23
    3.2.4. Action latency ............................... 23

CHAPTER 4. SUMMARY BY EXAMPLE ........................... 25
  4.1. Example 1: date/product/price
recommendation ............................................ 26
    4.1.1. Steps “1” and “2” .............................. 28
    4.1.2. Steps “3” and “4”: enter the
    world of “Smart Data” ............................... 29
    4.1.3. Step “5”: the presentation phase ............. 29
    4.1.4. Step “6”: the “Holy Grail” (the purchase) .... 30
    4.1.5. Step “7”: Smart Data ........................ 30
  4.2. Example 2: yield/revenue
management (rate controls) ............................. 31
    4.2.1. How it works: an explanation based
    on the Tetris principle (see Figure 4.4) ......... 35
  4.3. Example 3: optimization of operational
performance ............................................... 38
    4.3.1. General department (top management) ....... 42
4.3.2. Operations departments
(middle management) ................................ 42
4.3.3. Operations management
(and operational players) ............................ 43

CONCLUSION ............................................ 47

BIBLIOGRAPHY ....................................... 51

GLOSSARY .............................................. 53

INDEX .................................................. 57
