Contents

Foreword  XXI
Preface  XXV
List of Contributors  XXXIII

Part I: Chemistry Education: A Global Endeavour  1

1 Chemistry Education and Human Activity  3
Peter Mahaffy
  1.1 Overview  3
  1.2 Chemistry Education and Human Activity  3
  1.3 A Visual Metaphor: Tetrahedral Chemistry Education  4
  1.4 Three Emphases on Human Activity in Chemistry Education  5
  1.4.1 The Human Activity of Learning and Teaching Chemistry  6
  1.4.1.1 Atoms or Learners First?  6
  1.4.1.2 Identifying Learners and Designing Curriculum to Meet Their Needs  7
  1.4.1.3 Effective Practices in the Human Activity of Learning and Teaching Chemistry  8
  1.4.1.4 Identifying and Eliminating Worst Practices as a Strategy?  8
  1.4.1.5 Exemplar: Emphasizing the Human Activity of Learning and Teaching Chemistry  9
  1.4.2 The Human Activity of Carrying Out Chemistry  10
  1.4.2.1 Explicit and Implicit Messages about the Nature of Chemistry  10
  1.4.2.2 Breathing the Life of Imagination into Chemistry’s Facts  11
  1.4.2.3 Exemplars: Emphasizing the Human Activity of Carrying Out Chemistry  13
  1.4.3 Chemistry Education in the Anthropocene Epoch  14
  1.4.3.1 Planetary Boundaries: A Chemistry Course Outline?  15
  1.4.3.2 Steps toward Anthropocene-Aware Chemistry Education  16
  1.4.3.3 Exemplars: Anthropocene-Aware Chemistry Education  17
  1.5 Teaching and Learning from Rich Contexts  18
  1.5.1 Diving into an Ocean of Concepts Related to Acid–Base Chemistry  18
1.5.2 What Is Teaching and Learning from Rich Contexts?  \hspace{1cm} 20
1.5.3 Teaching and Learning from Rich Contexts – Evidence for Effectiveness  \hspace{1cm} 21
1.5.4 From “Chemical” to “Chemistry” Education – Barriers to Change  \hspace{1cm} 22
Acknowledgments  \hspace{1cm} 23
References  \hspace{1cm} 24

2 \hspace{1cm} Chemistry Education That Makes Connections: Our Responsibilities  \hspace{1cm} 27
\hspace{1cm} Cathy Middlecamp

2.1 What This Chapter Is About  \hspace{1cm} 27
2.2 Story #1: Does This Plane Have Wings?  \hspace{1cm} 28
2.3 Story #2: Coaching Students to “See” the Invisible  \hspace{1cm} 30
2.4 Story #3: Designing Super-Learning Environments for Our Students  \hspace{1cm} 34
2.5 Story #4: Connections to Public Health (Matthew Fisher)  \hspace{1cm} 37
2.6 Story #5: Green Chemistry Connections (Richard Sheardy)  \hspace{1cm} 39
2.7 Story #6: Connections to Cardboard (Garon Smith)  \hspace{1cm} 41
2.8 Story #7: Wisdom from the Bike Trail  \hspace{1cm} 44
2.9 Conclusion: The Responsibility to “Connect the Dots”  \hspace{1cm} 46
References  \hspace{1cm} 48

3 \hspace{1cm} The Connection between the Local Chemistry Curriculum and Chemistry Terms in the Global News: The Glocalization Perspective  \hspace{1cm} 51
\hspace{1cm} Mei-Hung Chiu and Chin-Cheng Chou

3.1 Introduction  \hspace{1cm} 51
3.2 Understanding Scientific Literacy  \hspace{1cm} 52
3.3 Introduction of Teaching Keywords-Based Recommendation System  \hspace{1cm} 55
3.4 Method  \hspace{1cm} 56
3.5 Results  \hspace{1cm} 57
3.5.1 Example 1: Global Warming  \hspace{1cm} 57
3.5.2 Example 2: Sustainability  \hspace{1cm} 57
3.5.3 Example 3: Energy  \hspace{1cm} 58
3.5.4 Example 4: Acid  \hspace{1cm} 59
3.5.5 Example 5: Atomic Structure  \hspace{1cm} 60
3.5.6 Example 6: Chemical Equilibrium  \hspace{1cm} 61
3.5.7 Example 7: Ethylene  \hspace{1cm} 62
3.5.8 Example 8: Melamine  \hspace{1cm} 63
3.5.9 Example 9: Nano  \hspace{1cm} 64
3.6 Concluding Remarks and Discussion  \hspace{1cm} 65
3.7 Implications for Chemistry Education  \hspace{1cm} 68
Acknowledgment  \hspace{1cm} 70
References  \hspace{1cm} 70
6 Lifelong Learning: Approaches to Increasing the Understanding of Chemistry by Everybody  

John K. Gilbert and Ana Sofia Afonso  

6.1 The Permanent Significance of Chemistry  

6.2 Providing Opportunities for the Lifelong Learning of Chemistry  

6.2.1 Improving School-Level Formal Chemistry Education  

6.2.2 Formal Lifelong Chemical Education  

6.2.3 Informal Chemical Education  

6.2.4 Emphases in the Provision of Lifelong Chemical Education  

6.3 The Content and Presentation of Ideas for Lifelong Chemical Education  

6.3.1 The Content of Lifelong Chemical Education  

6.3.2 The Presentation of Chemistry to Diverse Populations  

6.4 Pedagogy to Support Lifelong Learning  

6.5 Criteria for the Selection of Media for Lifelong Chemical Education  

6.6 Science Museums and Science Centers  

6.6.1 Museums  

6.6.2 Science Centers  

6.7 Print Media: Newspapers and Magazines  

6.8 Print Media: Popular Books  

6.9 Printed Media: Cartoons, Comics, and Graphic Novels  

6.9.1 Three Allied Genre  

6.9.2 The Graphic Novel  

6.9.3 The Educational Use of Graphic Novels in Science Education  

6.9.4 Case Study: A Graphic Novel Concerned with Cancer Chemotherapy  

6.10 Radio and Television  

6.11 Digital Environments  

6.12 Citizen Science  

6.13 An Overview: Bringing About Better Opportunities for Lifelong Chemical Education  

References  

Part II: Best Practices and Innovative Strategies  

7 Using Chemistry Education Research to Inform Teaching Strategies and Design of Instructional Materials  

Renée Cole  

7.1 Introduction  

7.2 Research into Student Learning  

7.3 Connecting Research to Practice  

7.3.1 Misconceptions  

7.3.2 Student Response Systems

10 Context-Based Teaching and Learning on School and University Level 259
Ilka Parchmann, Karolina Broman, Maike Busker, and Julian Rudnik

10.1 Introduction 259
10.2 Theoretical and Empirical Background for Context-Based Learning 260
10.3 Context-Based Learning in School: A Long Tradition with Still Long Ways to Go 261
10.4.1 Strategies to Approach Context-Based Tasks 265
10.4.2 Application of Chemical Knowledge 267
10.4.3 Outlook on the Design of Tasks and Research Studies 269
10.5 Context-Based Learning on University Level: Goals and Approaches 269
10.5.1 Design of Differentiated CBL-Tasks 271
10.5.2 Example 1 Physical and Chemical Equilibria of Carbon Dioxide – Important in Many Different Contexts 272
10.5.3 Example 2 Chemical Switches – Understanding Properties like Color and Magnetism 273
10.5.4 Feedback and Implications 275
10.6 Conclusions and Outlook 275
References 276

11 Active Learning Pedagogies for the Future of Global Chemistry Education 279
Judith C. Poë

11.1 Problem-Based Learning 280
11.1.1 History 281
11.1.2 The Process 281
11.1.3 Virtual Problem-Based Learning 283
11.1.4 The Problems 285
11.1.4.1 Selected Problems for Introductory Chemistry at the UTM 285
11.1.4.2 Project for a UTM Upper Level Bioinorganic Chemistry Course 288
11.1.5 PBL – Must Content Be Sacrificed? 289
11.2 Service-Learning 290
11.2.1 The Projects 291
11.2.1.1 Selected Analytical/Environmental Chemistry Projects 291
11.2.1.2 Selected Projects in Chemistry Education 292
11.2.1.3 Project for an Upper Level Bioinorganic Chemistry Course at UTM 293
11.2.2 Benefits of Service-Learning 294
11.3 Active Learning Pedagogies 296
11.4 Conclusions and Outlook 297
References 297

12 Inquiry-Based Student-Centered Instruction 301
Ram S. Lamba
12.1 Introduction 301
12.2 Inquiry-Based Instruction 303
12.3 The Learning Cycle and the Inquiry-Based Model for Teaching and Learning 304
12.4 Information Processing Model 308
12.5 Possible Solution 308
12.6 Guided Inquiry Experiments for General Chemistry: Practical Problems and Applications Manual 310
12.7 Assessment of the Guided-Inquiry-Based Laboratories 314
12.8 Conclusions 316

13 Flipping the Chemistry Classroom with Peer Instruction 319
Julie Schell and Eric Mazur
13.1 Introduction 319
13.2 What Is the Flipped Classroom? 320
13.2.1 Three Big Ideas about Flipped Classrooms 321
13.2.2 Blended Learning and Flipped Classrooms 322
13.2.3 A Brief History of the Flipped Classroom 323
13.2.4 Traditional versus a Flipped Chemistry Classroom 323
13.2.5 Flipped Classrooms and Dependency on Technology 324
13.3 How to Flip the Chemistry Classroom 325
13.3.1 Common Myths about Flipped Classrooms 326
13.3.1.1 Myth 1: Flipped Classrooms are Just Video Lectures 326
13.3.1.2 Myth 2: Flipped Classrooms Have No Lectures 326
13.3.1.3 Myth 3: Students Won’t Be Prepared for Class 327
13.3.1.4 Myth 4: Flipping Your Classroom Means Changing Everything You Do 327
13.3.1.5 Myth 5: Flipped Classrooms Solve All Students’ Problems Immediately 328
13.3.2 FLIP 329
13.3.3 Student Attitudes toward Flipping General Chemistry 329
13.4 Flipping Your Classroom with Peer Instruction 329
13.4.1 What Is Peer Instruction? 330
13.4.2 What Is a ConcepTest? 331
13.4.3 Workflow in a Peer Instruction Course 332
13.4.4 ConcepTest Workflow 333
13.4.5 Peer Instruction and Classroom Response Systems 333
13.4.6 The Instructional Design of a Peer Instruction Course 334

22.7.3.2 Electrical Conductivity, Light Absorption, and Temperature Measurements 551
22.8 Case Study IV: Can Microscale Experimentation Help Learning the Scientific Approach? 554
22.9 Case Study V: Can Microscale Experimentation Help to Achieve the Aims of Practical Work for All? 555
22.9.1 The UNESCO-IUPAC/CCE Global Microscience Program and Access to Science Education for All 555
22.9.2 The Global Water Experiment of the 2011 International Year of Chemistry – Learning from the Experience 556
22.10 Conclusions 559

Part III: The Role of New Technologies 563

23 Twenty-First Century Skills: Using the Web in Chemistry Education 565
Jan Apotheker and Ingeborg Veldman
23.1 Introduction 565
23.2 How Can These New Developments Be Used in Education? 567
23.3 MOOCs (Massive Open Online Courses) 572
23.4 Learning Platforms 574
23.5 Online Texts versus Hard Copy Texts 575
23.6 Learning Platforms/Virtual Learning Environment 577
23.7 The Use of Augmented Reality in (In)Formal Learning 579
23.8 The Development of Mighty/Machtig 580
23.9 The Evolution of MIGHT-y 580
23.10 Game Play 581
23.11 Added Reality and Level of Immersion 582
23.12 Other Developments 586
23.13 Molecular City in the Classroom 587
23.14 Conclusion 593
References 593

24 Design of Dynamic Visualizations to Enhance Conceptual Understanding in Chemistry Courses 595
Jerry P. Suits
24.1 Introduction 595
24.1.1 Design of Quality Visualizations 595
24.1.2 Mental Models and Conceptual Understanding 596
24.2 Advances in Visualization Technology 598
24.3 Dynamic Visualizations and Student’s Mental Model 603
24.4 Simple or Realistic Molecular Animations? 607
24.5 Continuous or Segmented Animations? 608
24.6 Individual Differences and Visualizations 609
24.6.1 Self-Explanations and Spatial Ability 609
24.6.2 Individual Differences and Visualization Studies 610
24.7 Simulations: Interactive, Dynamic Visualizations 611
24.7.1 Pedagogic Simulations 611
24.7.2 An Organic Pre-Lab Simulation 613
24.8 Conclusions and Implications 615
Acknowledgments 616
References 616
25 Chemistry Apps on Smartphones and Tablets 621
Ling Huang

25.1 Introduction 621
25.2 Operating Systems and Hardware 625
25.3 Chemistry Apps in Teaching and Learning 626
25.3.1 Molecular Viewers and Modeling Apps 626
25.3.2 Molecular Drawing Apps 629
25.3.3 Periodic Table Apps 631
25.3.4 Literature Research Apps 633
25.3.5 Lab Utility Apps 634
25.3.5.1 Flashcard Apps 635
25.3.5.2 Dictionary/Reference Apps 636
25.3.5.3 Search Engine Apps 637
25.3.5.4 Calculator Apps 639
25.3.5.5 Instrumental Apps 640
25.3.6 Apps for Teaching and Demonstration 641
25.3.7 Gaming Apps 642
25.3.8 Chemistry Courses Apps 644
25.3.9 Test-Prep Apps 644
25.3.10 Apps are Constantly Changing 645
25.4 Challenges and Opportunities in Chemistry Apps for Chemistry Education 646
25.5 Conclusions and Future Perspective 647

26 E-Learning and Blended Learning in Chemistry Education 651
Michael K. Seery and Christine O'Connor

26.1 Introduction 651
26.2 Building a Blended Learning Curriculum 652
26.3 Cognitive Load Theory in Instructional Design 654
26.4 Examples from Practice 655
26.4.1 Podcasts and Screencasts 656
26.4.2 Preparing for Lectures and Laboratory Classes 657
26.4.3 Online Quizzes 659
26.4.4 Worked Examples 661
26.4.5 Clickers 662
26.4.6 Online Communities 663
26.5 Conclusion: Integrating Technology Enhanced Learning into the Curriculum 665

27 Wiki Technologies and Communities: New Approaches to Assessing Individual and Collaborative Learning in the Chemistry Laboratory 671
Gwendolyn Lawrie and Lisbeth Grøndahl

27.1 Introduction 671
Contents

27.2 Shifting Assessment Practices in Chemistry Laboratory Learning 672
27.3 Theoretical and Learning Design Perspectives Related to Technology-Enhanced Learning Environments 675
27.4 Wiki Learning Environments as an Assessment Platform for Students’ Communication of Their Inquiry Laboratory Outcomes 678
27.4.1 Co-Construction of Shared Understanding of Experimental Observations 679
27.4.2 Enhancing the Role of Tutors in the Wiki Laboratory Community 679
27.5 Practical Examples of the Application of Wikis to Enhance Laboratory Learning Outcomes 681
27.5.1 Supporting Collaborative Discussion of Experimental Data by Large Groups of Students during a Second-Level Organic Chemistry Inquiry Experiment 681
27.5.2 Virtual Laboratory Notebook Wiki Enhancing Laboratory Learning Outcomes from a Collaborative Research-Style Experiment in a Third-Level Nanoscience Course 682
27.5.3 Scaffolding Collaborative Laboratory Report Writing through a Wiki 682
27.6 Emerging Uses of Wikis in Lab Learning Based on Web 2.0 Analytics and Their Potential to Enhance Lab Learning 684
27.6.1 Evaluating Student Participation and Contribution as Insight into Engagement 684
27.6.2 Categorizing the Level of Individual Student Understanding 686
27.7 Conclusion 688
