Preface ix
2006 PEI Officers xi
2006 Technical Forum Committee xiii
Past PEI Technical Forum Committee Chairs xv

A. I. Andrews Memorial Lecture 3

Nanotechnology—Challenges and Opportunities for the Future
Richard A. Haber

Energy and Raw Materials 35

The Electricity Market & Critical Issues
Lucia Harvey

The Current Lithium Situation
Jason Woulfin

Energy Saving Recommendations—Panel Discussion
David Lahmer, Peter Vodak, and Mike Horton 55

Laboratory Investigations 65

Glassy Surface Functional Modification by Nano-Modified Sol-Gel Technology
Christian Schlegel
Update on the Status of Porcelain Enamel Powder Worldwide
William D. Faust

The Use of Specialized Enamel Coatings to Bond Concrete to Steel
Philip G. Malone, Charles A. Weiss, Jr., Donna C. Day, Melvin C. Sykes, and Earl H. Baugher

Using Coefficient of Thermal Expansion (CTE) to Help Solve Porcelain Enamel Stress-Related Problems
Andrew F. Gorecki

Choosing the “Correct” Equipment and Abrasive for Your Application
Richard Hawkins

Grit Blasting Case Study
Liam O’Byrne

Phosphate Replacement Technology
Ken Kaluzny

Case Study—Process Stabilization by Continuous Oil Contaminant Removal
Jim Polizzi, David Latimer, and Jack Scambos

Light Emitting Ceramic Devices (LECD)
Richard Bagley and Don Osborne

Enamels, Color Matching Model
M. Laveveux, V. Duchamp, M. F. Pennin, and D. Patou

Ferro New Products for the Home of Tomorrow
Charles Baldwin, Brad Devine, Dave Fedak, and William Warner

Wet Porcelain Enamels and Processing

Conveyor Rotators
Richard Dooley

Automated Robotic Coatings and Finishing Systems
Jerry L. Perez

State of the Art of the Enamelling of Cast Iron Grates
Harry Florijn

Meeting Future Requirements for Enameled Cast Iron Grates
Ron Simons
