tunnel erosion, 361
Tyna River, 60, 315
U
Ubay River, 81, 82, 90
ultimate particle size distribution, 334
ultrasound discharge measurement, 269
ultrasound vibration, 334
Uncertainies in measurement, 274
quantifying, 498–499
v
valley-bottom alluvium, definition, 16
Vedder River, 338
vegetation and geomorphic process interpretation, 210, 225–226
communities as an indicator of disturbance regime, 223–225
dendrogeomorphology in fluvial systems, 216–217
floods and inundation, 217–218
sediment deposition and erosion, 218–220
temporal trends, 220
fluvial landscape description, 220–221
fluvial landslides and floods, 221–222
reading landscapes, 222–223
plant ecological–fluvial geomorphic relations, 210–211
vegetation as a tool, 211–216
example applications, 212–214
velocity of flow measurement
  acoustic Doppler current profilers (ADCPs), 264–265
  acoustic Doppler velocimeters (ADVs), 263–4
  electromagnetic current meters, 262–263
  laser Doppler velocimetry (LDV), 265
  other methods, 265
  uncertainties, 274
velocity of measurement, 260
  floats, 260–261
  mechanical current meters, 261
vertical aerial photographs, 108
vertical-axis meters, 261
visual accumulation (VA) tube method, 333
visual estimates, 287
von Karman's constant, 415
W
  Wadell roundness index, 282
  Waimakariri River, 318, 338
Waipaoa River, 329
  walls, 42
Water Erosion Prediction Project (WEPP), 165–167
  application example, 166
water habitat restoration conceptual model, 85
watershed analysis models, 161–163
weathering characteristics, 20
weathering profiles, 17
Weibull distribution, 281
weirs, 268–269
wells, 42
Wentworth's rule, 292
WEPP, 164, 174
wharves, 42
Willamette River, 496
  wood in rivers, 463–465
  wooden objects, 42
  wooden structures, 42
working methods, 7–8
  field methods, 5
  laboratory methods, 5
  post-field methods, 5
  pre-field methods, 5
Wylye River, 524–527, 528
X
  X-ray diffraction, 187
Y
  Yamuna River, 117
  Yellow River, 70, 119
  Yellowstone National Park, 60
  Yuba River, 293, 294
  Yzeron River, 143
Z
  zig-zag sampling method, 295
