Preface xix
Introduction: Millets – The Miracle Grains xxi
C. Aruna Reddy

1 Sorghum, Sorghum bicolor (L.) Moench 1
   P. Sanjana Reddy
   1.1 Introduction 1
   1.2 Origin and Taxonomy 1
   1.3 Germplasm Resources and Utilisation 2
   1.4 Genetics and Cytogenetics 4
   1.4.1 Cytogenetics 5
   1.5 Reproductive Biology 5
   1.6 Production Constraints 7
   1.7 Breeding Objectives 7
   1.7.1 Grain Sorghum 8
   1.7.1.1 Breeding for Yield 8
   1.7.1.2 Breeding for Abiotic Stress Resistance 9
   1.7.1.3 Breeding for Biotic Stress Resistance 15
   1.7.1.4 Breeding for Grain Quality 19
   1.7.2 Forage Sorghum 21
   1.7.3 Sweet Sorghum 23
   1.8 Sorghum Improvement Across Diverse Parts of the World 24
   1.8.1 Sorghums of India 24
   1.8.1.1 Rainy / kharif Sorghum 24
   1.8.1.2 Post-rainy / winter Sorghum 25
   1.8.1.3 International Crops Research Institute for the Semi-Arid Tropics (ICRISAT) 28
   1.8.2 Sub-Saharan Africa 30
   1.8.3 Western and Central Africa (WCA) 30
   1.8.4 Eastern and Southern Africa (ESA) 30
   1.8.5 Latin America 31
   1.8.6 China 32
   1.9 Future Prospects 32
References 33
2 Pearl Millet, *Pennisetum glaucum* (L.) R. Br. 49
   P. Sanjana Reddy
   2.1 Introduction 49
   2.2 Origin and Taxonomy 51
   2.2.1 Taxonomy 51
   2.2.2 Origin 51
   2.3 Genetic Resources 52
   2.3.1 Genetic Diversity 53
   2.3.2 Germplasm Utilisation 53
   2.4 Genetics of Important Traits 55
   2.4.1 Quantitative Traits 55
   2.4.1.1 Gene Effects 56
   2.4.2 Qualitative Traits 57
   2.5 Morphology and Reproductive Biology 58
   2.6 Selfing and Crossing 59
   2.7 Breeding Methods 60
   2.8 Cultivar Development 62
   2.8.1 Open Pollinated Varieties 62
   2.8.2 Hybrids 63
   2.9 CMS Systems in Pearl Millet 64
   2.10 Production Constraints 65
   2.10.1 Breeding for Abiotic Stresses 65
   2.10.1.1 Drought 65
   2.10.1.2 Heat Tolerance 70
   2.10.2 Breeding for Biotic Stress Resistance 71
   2.10.2.1 Downy Mildew (DM) 71
   2.10.2.2 Other Biotic Constraints 72
   2.11 Grain Quality 73
   2.12 Alternate Uses of Pearl Millet 73
   2.13 Future Research Thrust Areas 74
   References 75

3 Improvement in Finger Millet: Status and Future Prospects 87
   K.N. Ganapathy
   3.1 Introduction 87
   3.2 Area Production and Productivity 87
   3.3 Origin and Domestication 88
   3.4 Botanical Features and Breeding Behaviour 89
   3.4.1 Botanical Classification 89
   3.4.2 Botanical Description 89
   3.4.3 Floral Biology and Breeding Behaviour 90
   3.5 Emasculation and Pollination Techniques 90
   3.5.1 Hand Emasculation 90
   3.5.2 Hot-water Treatment 91
   3.5.3 Gametocide-induced Male Sterility 91
   3.5.4 Use of Genetic Male Sterility 91
   3.6 Genetics of Traits 91
   3.7 Gene Pool of *Eleusine coracana* 93
3.7.1 Sub-species Africana 93
3.7.2 Subspecies Coracana 93
3.7.2.1 Race Elongata 93
3.7.2.2 Race Plana 94
3.7.2.3 Race Vulgaris 94
3.7.2.4 Race Compacta 94
3.8 Germplasm and Genetic Diversity 94
3.9 Varietal Improvement in India 96
3.10 Varietal Development in Africa 98
3.11 Genetic Improvement for Blast Resistance 100
3.12 Development of Genetic Male Sterility 102
3.13 Mutation Breeding 103
3.14 Strategies to Bridge Research Gaps for Enhancing Productivity and Utilisation of Finger Millet 104
3.14.1 Germplasm Evaluation 104
3.14.2 Participatory Selection and Varietal Development 104
3.14.3 Interspecific Hybridisation and Search for Novel Traits 105
3.14.4 Development of Early-maturing, Photoperiod-insensitive Varieties for Different Cropping Systems 105
3.14.5 Genetic Improvement for Drought Tolerance 105
3.14.6 Stover Yield and Quality Improvement 105
3.14.7 High-yielding White Finger Millet Varieties 106
3.14.8 Nutritional Improvement 106
3.14.9 Breeding for Blast Resistance and Other Pests 106

4 Foxtail Millet, Setaria italica (L.) P. Beauv. 112
K. Hariprasanna
4.1 Introduction 112
4.2 Origin and Taxonomy 116
4.3 Germplasm Resources and Utilisation 118
4.3.1 International Status 118
4.3.2 National Status 119
4.3.3 Core Collection 120
4.4 Genetics and Cytogenetics 122
4.4.1 Inheritance of Agronomic Traits 122
4.4.2 Genetic Control of Branching 123
4.4.3 Genetic Control of Flowering and Inflorescence Branching 123
4.4.4 Cytogenetic Studies 124
4.4.5 Molecular Markers and Genetic Maps 125
4.5 Reproductive Biology 126
4.5.1 Inflorescence Morphology 126
4.5.2 Anthesis, Flowering Behaviour and Seed 127
4.6 Breeding Objectives 128
4.6.1 Agronomic Traits 128
4.6.2 Biotic and Abiotic Factors 129
4.7 Breeding Methods 129
4.7.1 Pure-Line Selection 129
4.7.2 Recombination Breeding 130
4.7.3 Heterosis Breeding and Male Sterility 130
4.7.4 Disease Resistance Breeding 131
4.8 Breeding Efforts in the United States 131
4.9 Breeding Efforts in China 132
4.10 Breeding Efforts in India 133
4.10.1 Improved Varieties 134
4.11 New Tools for Genetic Improvement 135
4.12 Future Prospects 140

5 Proso Millet, Panicum miliaceum (L): Genetic Improvement and Research Needs 150

Sunil Shriram Gomashe

5.1 Introduction 150
5.2 Origin and Taxonomy 150
5.3 Botany and Reproductive Biology 151
5.3.1 Roots 152
5.3.2 Stem/Culm 152
5.3.3 Leaves 152
5.3.4 Panicle 152
5.3.5 Seed 152
5.4 Growth and Development 153
5.5 Cytogenetics 153
5.6 Genetic Resources and Utilisation 155
5.7 Genetic Improvement of Proso Millet: Achievements and Status 158
5.7.1 India 158
5.7.2 United States 158
5.7.3 Russia 158
5.7.4 China 161
5.7.5 Kenya 162
5.8 Breeding Objectives and Research Strategies 163
5.8.1 Development and Evaluation of Core Sets for Biotic and Abiotic Stresses as well as Quality Traits 163
5.8.2 DUS Characterisation of Varieties 163
5.8.3 Identification of Location and Trait-Specific Germplasm for Utilisation in Crop Improvement 163
5.8.4 Development of Varieties with Abiotic and Biotic Stress Tolerance/Resistance 163
5.8.5 Developing Lodging- and Shattering-Resistant Varieties 164
5.8.6 Development of Varieties with Early Vigour and Short Duration 164
5.8.7 Identification of Elite Germplasm and Varieties with Superior Nutritional Traits and Bio-Fortification of Existing Elite Lines 164
5.8.8 Grain Quality Improvement 164
5.8.9 Protein Content and Quality 165
5.8.10 Inducing Cytoplasmic Genetic Male Sterility 165
5.8.11 Wide Hybridisation 165
6 Genetic Improvement in Little Millet 170
K.N. Ganapathy
6.1 Introduction 170
6.2 Floral Biology 171
6.3 Cytogenetics and Morphological Variation in the Genus 172
6.4 Improvement in Little Millet 173
6.4.1 Genetic Variability 174
6.4.2 Germplasm Variability for Various Economic Traits 174
6.4.3 Varietal Improvement 176
6.4.4 Improvement in Grain Smut Resistance 176
6.4.5 Drought-Tolerance Studies 179
6.4.6 Nutritional Improvement 180
6.4.7 Mutational Approaches 180
6.5 Critical Research Gaps 181
6.6 Strategies for Genetic Improvement 181

*Kebebew Assefa, Solomon Chanyalew and Zerihun Tadele*

9.1 Introduction 226
9.2 Origin and Taxonomy 227
9.2.1 Origin 227
9.2.2 Taxonomy 230
9.3 Genetic Resources and Utilisation 232
9.3.1 Genetic Resources of Tef 232
9.3.2 Utilisation of Tef Genetic Resources 232
9.4 Genetics and Cytogenetics 236
9.4.1 Genetics of Qualitative Traits 236
9.4.1.1 Lemma Colour 236
9.4.1.2 Seed Colour 236
9.4.1.3 Panicle Form 236
9.4.2 Genetics of Quantitative Traits 236
9.4.3 Cytogenetics Studies 240
9.5 Reproductive Biology 240
9.5.1 Floral Morphology of Tef 240
9.5.2 Breeding Behaviour 242
9.6 Constraints in Tef Production 242
9.6.1 Technical Constraints 242
9.6.1.1 Relatively Low Productivity of Tef Crop 242
9.6.1.2 Susceptibility of the Crop to Lodging 243
9.6.1.3 Labour-Intensive Nature of Tef Husbandry 244
9.6.1.4 Biotic and Abiotic Constraints 244
9.6.2 Socio-Economic Constraints 244
9.6.2.1 Lack of Adequate Attention 244
9.6.2.2 Weak Seed and Extension Systems 245
9.6.2.3 Unavailability of Agricultural Inputs 245
9.7 Genetic Improvement of Tef 245
9.7.1 Historical Milestones 245
9.7.2 Breeding Objectives 246
9.7.3 Breeding Methods 246
9.7.3.1 Conventional Approaches 246
9.7.3.2 Modern and Novel Approaches 247
9.7.4 Variety Development and Dissemination 252
9.7.4.1 Improved Tef Varieties 252
9.7.4.2 Genetic Gain 254
9.7.4.3 Adoption of Improved Varieties 254
9.8 Crop and Pest Management 256
9.8.1 Land Preparation and Planting 256
9.8.2 Fertiliser Application 257
9.8.3 Important Weeds and Their Management 257
9.8.4 Important Insect Pests and Their Management 258
9.8.5 Important Diseases and Their Management 258

14 Strategies to Build Sustainable Millet Seed Systems 395

Vilas A. Tonapi and Ch. Ravinder Reddy

14.1 Introduction 395
14.2 Factors Leading to Sustainable Seed Security 397
14.2.1 Overview of Seed Systems 397
14.2.1.1 Formal Seed Systems 397
14.2.1.2 Informal Seed Systems 398
14.2.2 Seed Sources for Informal and Formal Seed Systems 398
14.2.3 Challenges for Seed Sector in Marginal Environments 399
14.2.4 Indian Scenario 399
14.2.5 Barriers to Seed Dissemination and Socio-Economic Constraints 401
14.2.5.1 Sound Informal Seed Systems: Most Suitable for Dry Land Ecosystems 402
14.2.5.2 Sustaining Viability of Informal Systems with Innovative Seed Delivery Models 402
14.2.5.3 Alternate Village-Based Seed Delivery Models 403
14.2.5.4 Small-Scale Seed Enterprises Models 405
14.3 Developing a Community-Based Millet Seed System 409
14.3.1 Steps for Strengthening Community Seed Production, Seed Saving and Storage 409
14.3.2 Seed Production 410
14.3.3 Seed Certification 410
14.3.4 Seed Storage 411
14.3.5 Developing a Community Seed Programme 412
14.3.6 Steps in Developing a Community Seed-System Module 412
14.3.6.1 Reconnaissance Survey 412
14.3.6.2 Participatory Selection of Crops/Varities 412
14.3.6.3 Selection of Seed Growers 413
14.3.6.4 Capacity Building 413
14.3.6.5 Procurement of the Basic Seed and Distribution 413
14.3.6.6 Formation of Seed Growers’ Association 414
14.3.6.7 Seed Marketing 414
14.4 The Alternative Integrated Seed-System Model 415
14.4.1 Step 1 415
14.4.2 Step 2 416
14.4.3 Sensitising Stakeholders 416
14.4.4 Formation of Village Seed Bank Committees 416
14.4.5 Farmer-Participatory Selection of Varieties 418
14.4.6 Capacity Building 418
14.4.7 Institutional Linkages 419
14.4.8 Funding 419
14.4.9 Advantages of Village Seed Banks 420
14.4.10 Constraints of Village Seed Banks 421
14.5 Need for a Policy Framework to Build a Viable Local Seed System 421
14.5.1 The Role NARS Has to Play in Strengthening the Community Seed Systems 422
14.5.2 The Role of the State and the Central Agencies 423
14.5.3 The Role of Public/Private Partnership in Local Seed Availability 423
14.5.4 Identification of the Components for Village-Based or Community Seed Production Systems 423
14.5.5 Strengthening Stakeholders of Community Seed Systems 425
14.5.6 Interventions Required for Developing Informal Seed Systems 426
14.6 Conclusion 428
