`@ activities`, 315

ACRE programme, 11, 138, 339
agglomeration economies, 7, 17, 22, 28, 178, 288, 323, 338
Almere, 48, 60
American cities, 166, 196, 329, 342
Amsterdam, 39, 40, 43, 335, 336, 339, 342, 343
  attractiveness, 174–7
creative and knowledge-intensive industries in, 46
creative knowledge economy in, 295–9
development path, 57–61 dimensions, 63
economic base, 48–9
finding jobs in, 204
housing cost in, 203
income distribution in, 205
labour market in, 204
population and GDP per capita, 12
soft factors, 203
transnational migrants in, 167–9
young high-skilled workers in ACRE survey, 197
life in city-region, 201–4
structural profile, 200–201
Amsterdam Metropolitan Area, 48, 57, 60, 63, 201, 295
Antwerp, 58
Aristotelian–Habermasian model, 159
Association of Polish Towns, 97
Athenaeum Illustre, 58–9
Attitudes Index, 89
Austria, 50, 55, 173
Autonomous Community government, 77
Barcelona, 39, 41, 86, 334, 335, 336, 341, 342, 343
  attractiveness, 177–9
economic activities, 315
finding jobs in, 204
governance approaches, 314–17
historical context, 68–9
housing cost in, 203–4
income distribution in, 205
industrial development, trajectory of, 69–72
labour market in, 204
population and GDP per capita, 12
soft factors, 203
  challenge of, 85–7
state and policy intervention in, 76–9
transnational migrants in, 169–71
young high-skilled workers in ACRE survey, 197
life in city-region, 201–4
structural profile, 200–201
Barcelona Metropolitan Region, 70, 71, 72, 76, 77, 78, 86, 170, 171, 177, 178, 179, 204, 205, 314
Betrothed, The, 55
Birmingham, 10, 12, 13, 37, 39, 40, 41, 267, 273, 282, 334, 336, 342
  business tourism, 80
career prospects, 220
  contract working in, 214, 215
creative and knowledge cluster policy, 274–5
economic crisis in, 37
economic growth, 79
employment in, 213–15
governance structure, 273–4
highly skilled labour in, 276–7
historical context, 68–9
industrial development, trajectory of, 72–4
job content, 222–3
job satisfaction, 216–19
job security, 219
national planning policy, in post-war era, 79
networking, 275–6
  with fellow professionals, 221
  ‘non-permanent’ contracts, employment on, 215
personal net income in, 214
population and GDP per capita, 12
rates of pay, satisfaction with, 217–19
self-employment in, 215
socio-demographic characteristics, 212
soft factors, challenge of, 87–8
state and policy intervention in, 79–82
work–life balance, 221–2
working hours in, 215–16
Blue Card, 163
Borsa di Milano, 245
bottom-up non-interventionist economic strategy, in Milan, 247, 250
brain drain (BD), 164, 165, 168, 170, 185, 188, 317
brain exchange (BE), 164, 165, 166, 167, 185

Broedplaatsen agency, 298
Budapest, 10, 12, 13, 22, 36, 39, 40, 108, 300, 335
capital city versus provincial city location decisions, 156, 157
characteristics, 148
creative knowledge economy in, 300–302
creative knowledge sector development, 106, 107–8
development path, 95, 100–101
economic development and political conditions, 293–294
economic output, 96
employment in, 107
enterprises in, 96
globalisation process, 101
‘hard’ factors in, 150–51
in-city location decisions, 155
‘individual trajectory’ considerations, 150–51
policymaking practices in, 158
population and GDP per capita, 12
position, 101
pro-market economic reforms, 148
socio-economic characteristics, 95–6
‘soft’ factors, role of, 152–3

Budapest Innopolis Programme, 301
Bulgaria, 41, 99, 105, 148, 157, 320
capital city, 36, 41, 50, 115, 151, 335
versus provincial city location decisions
in Budapest, 156, 157
in Helsinki, 156
in Riga, 157
in Sofia, 157
in Toulouse, 157
career prospects, of workers
in Birmingham, 220
in Leipzig, 220
in Poznan, 220
Celtic Tiger, 167, 171, 181
Chamber of Commerce, 80, 254, 296
Chamberlain, Joseph, 79
city economies, development of, 37, 38
‘classic’ location theory, see ‘hard’ conditions theory
cluster development policies, 266
cluster facilitating policies, 266
cluster leveraging policies, 266
cluster(s)
definition, 22–3
policy, 24, 264, 346
creative and knowledge economy state, 266–8
Porter’s Model, 265
type, 22–4
command system, see communist system
Commission of Public Works, 100, 101
communist planned economies, 335
communist system, 93, 94, 101
‘communities of practice’, 310–11
‘competition for talent’, 348
competitive cities, 3
debates and challenges, 3–5
essential conditions for, 17
agglomeration factors, shifts in, 17
economic development, conditions for, 19
geographic scale, shift in, 17–18
globalisation processes, 17
media, 18
regional and local cultures, 18
re-invention, of local qualities, 17
structural transformations, 17
transportation and telecommunication revolutions, 18
pathways, actors and policies, 14–15
questions and theories, 7–10
regions and sources, 10–14
sectors, 5–7
contemporary city, 35, 336
contemporary urban leaders, 336
contract working
in Birmingham, 214, 215
in Leipzig, 214, 215
in Poznan, 214, 215
creative and knowledge cluster policy
in Birmingham, 274–5
in Helsinki, 269–72
in Poznan, 277–9
in Munich, 299–300
creative and knowledge-intensive industries, managers and entrepreneurs in, 140, 145
capital city versus provincial city location decisions, 156–7
characteristics
of Budapest, 148–9
of Helsinki, 149–50
of Riga, 148
of Sofia, 148
of Toulouse, 149
creative class, 146–7
demand side, of cities, 145–6
governance strategies, 307, 308–9
‘hard’ factors, 150–51
implications, 159–61
in-city location decisions, 154–6
individual trajectory’ considerations, 150–51
policymaking, 157–9
’soft’ factors, role of, 151–3
supply side, 145
creative and knowledge sector policy
in Amsterdam, 295–9
in Budapest, 300–302
Creative Challenge Call, 295
creative class, 3, 4, 28, 137, 139, 146–7, 154, 179, 192, 196, 201, 211, 236, 237, 238, 291, 331, 333, 342
definition, 26, 143
and transnational migrants, 164–7
creative clusters, 22, 24, 274, 316
creative companies, 47, 49, 146, 150, 286, 288, 300
’creative index’, 3
creative industries, 4–5, 78, 310
development, 335
employment in, 12
high-skilled and highly educated employees, 8–9
versus knowledge-intensive industries, 6–7
in Leipzig, 318
managers in, 8, 9
metropolitan regions, 10–14
sector approach, 6
transnational migrants, 8, 9
creative jobs, in Birmingham, Leipzig and Poznan
career prospects, 220
employment, 213–14
job content, 222–3
job satisfaction, 216–19
job security, 219
methodology, 211–13
networking, with fellow professionals, 221
‘non-permanent’ contracts, employment on, 215
precariousness, uncertainty and risk, 208–13
rates of pay, satisfaction with, 217–19
self-employment, 215
work–home life, 221–2
working hours, 215–16
creative/knowledge-based city, 3, 4, 17, 40–42
cluster theory, 22–4
contributions, set of, 29–30
development path, 49, 345
in Amsterdam, 57–61
in Milan, 54–7
in Munich, 50–54
synthesis, 61–4
and economic base, 44–9
essential conditions for competitive cities, 17–20
growth, 349
‘hard’ conditions theory, 20–22
personal networks, 24–5
‘soft’ conditions theory, 25–9
stable trajectories, 43
target groups for, 26
creative knowledge industries, 137
highly educated workers, 139–40
managers, 140
transnational migrants, 140–42
creative knowledge industries, transnational migrants in
Amsterdam
attractiveness, 174–7
potentials, 167–9
Barcelona
attractiveness, 177–9
potentials, 169–71
Dublin
attractiveness, 180–82
potentials, 171–2
Munich
attractiveness, 182–4
potentials, 172–4
creative knowledge sector
in Budapest, 106, 107–8
development, 106–9
employment in, 107
in Leipzig, 106, 107
in Poznan, 106, 107, 108
in Riga, 107, 108, 109
in Sofia, 106, 107, 108, 109
creative workers, 87, 179, 183, 184, 185, 187, 188, 193, 198, 201, 204, 209, 211, 213, 214, 215, 223, 224, 298
cross-boundary working, 346
cultural economy, 5, 63, 96, 108
culturepreneurs, 309, 313
Dart system, 181
decision-makers, 19, 307
decision-making process, 7, 15, 27, 307, 342, 344, 348
development path
of Budapest, 100–101
of cities, 35, 37, 40
of creative knowledge economy, 49
in Amsterdam, 57–61
in Milan, 54–7
in Munich, 50–54
synthesis, 61–4
importance, 338
of Leipzig, 101–3
of Poznan, 103–4
development path (Contd.)
   of Riga, 104–5
   of Sofia, 105–6
