Site planning (continued)

implementation strategies, 936–938, 939f
key terms defined, 896–897
site plan review data, 897–898
for suburban activity centers, 881–882
Site plan review
data from, 897–898
in impact analysis, 932–933
in local government planning, 84–85
Site selection, for truck terminals, 1059
Site trip destination, 912–914
Sketch-planning methods, 392
in impact analysis, 918
as operations-oriented analysis tools, 392
Skip stop service, 494
Small airplanes, in recreational areas, 979
Small bus life-cycle cost analysis, 271, 273
Small trucks, zero emission, 1021
Smart Growth Index (U.S. EPA), 604
“Smart Growth Tool Box” (SANDAG), 772–773
SMS. See Safety management system (SMS)
Snowmobiles, in recreational areas, 979
Social and community impacts, 138–146
access to community facilities and services, 143
community disruptions, 138
environmental justice, 143–144
in evaluation and prioritization, 270
on historic, cultural, and parkland resources, 145–146
neighborhood cohesion, 142–143
neighborhood quality, 143
noise and vibration, 138–142
on public health and active living, 144–145
Social marketing, 666
Social media, in public engagement, 1130–1133
Societal costs
in evaluations, 261
measuring, 245–246
Software, for travel demand modeling, 232–233
South Carolina Department of Transportation (SCDOT), 384, 706, 707
Southeastern Michigan Council of Governments (SEM-COG), 1040, 1082
Southeastern Wisconsin Regional Planning Commission (SEWRPC), 101, 102f, 745, 746f, 747f
Southeast Seattle study, 860
Southern Alleghenies Regional Development Commission, 949
Southern Alleghenies Rural Planning Organization, 949, 950–951f, 952–953
Southern California Association of Governments (SCAG), 520, 521f, 522f
Space mean speed, 36
Spatial distribution
of activities, 207
of population growth, 28–30
Spatial impacts, 249
Speakers bureaus, 1128
Special assessment district, 172
Special events, traffic management for, 377–378
Specialized services, in transit planning, 513–515
Speed
operating, 490–491
as system performance measure, 334
Speed flow maps, 44
Speeding, as safety concern, 1072
SPFs. See Safety performance functions (SPFs)
Split pedestrian crossings (SPXOs), 630
Spot hazards, for bicycles, 625
Sprawl, performance measures for, 749
SRTS. See Safe Routes to School (SRTS)
Staggered work hours, 654
Stakeholder inputs, in pedestrian and bicycle planning, 610
Stakeholders
defined, 1116
in public engagement, 1116–1117, 1118f, 1119e, 1136
in recreational areas, 988
in transportation safety planning, 1080–1081
in tribal nations transportation planning, 969
Standards, 999
Standard Zoning Enabling Act (SZEA), 81
State governments. See also Statewide transportation planning
role of, in transportation, 10–11
rural transportation planning by, 948
State highway plans, 342
State infrastructure banks (SIBs), 178
“State-of-Good-Repair” studies, 709
State transportation plans (STPs), 5
funding and financing for, 183–186
required under federal law, 684
as road investment programs, 348
State transportation plans (STPs)
in corridor planning, 794–795
and regional transportation plans, 726
Statewide modal plans, 723–725
Statewide transportation planning, 681–726
federal government role in, 682–685
future challenges for, 725–726
monitoring system and program performance, 721–723, 724f
needs assessment, 699–704
prioritizing programs and projects, 717–721
required by ISTEA, 9
statewide modal plans, 723–725
study focus and boundary for, 686–692
system performance measures, 696–699
transportation issues and opportunities in, 692–693
transportation system alternatives, 704–712, 713r–716r, 717f
vision, goals, and objectives of, 693–696
Station capacity, 524
Station design, 543–563
bus stops and stations, 544–551
multimodal stations, 560–563
parameters and guidelines for, 543–544
rail stops and stations, 552–559
waterborne stations, 559–560
Station levels, for rapid rail transit, 555
Station locations, for multimodal stations, 561
Stations
analysis techniques, 534
bus stations
within freeway interchanges, 549
on freeways, 546
off-street bus stations, 546–549
on-street bus stations, 550–551
park-and-ride facilities at, 549–550
station design, 544–551
on streets, 545–546
design, 534
intermodal connections, 561
life-cycle planning, 540
market research, 536
multimodal stations, 560–563
parameters and guidelines for, 543–544
park-and-ride facilities, 549
passenger, 534–542
information systems, 541–542
market research, 536
security, 541
vision for, 535–536
performance analysis techniques, 537–540
rail stations
intercity rail stations, 558–559
light rail stations, 552–553
rapid rail transit, 553–558
in regional rail, 510
regional rail stations, 558
station design, 552–559
universal design, 562
waterborne transit stations
passengers and vehicles, 559
passengers only, 559
station design, 559–560
Statistical considerations, 67–71
