About the Authors xix
Preface xx i
Acknowledgments xxiii

## 1 Introduction to research

1 Introduction

- Business research 1
- The role of theory and information in research 2
- Research and the manager 3

2 Types of business research: applied and basic

- Applied research 5
- Basic or fundamental research 6

3 Managers and research

- Why managers need to know about research 8
- The manager and the consultant–researcher 9

4 Internal versus external consultants/researchers

- Internal consultants/researchers 10
  - Advantages of internal consultants/researchers 10
  - Disadvantages of internal consultants/researchers 11
- External consultants/researchers 11
  - Advantages of external consultants/researchers 11
  - Disadvantages of external consultants/researchers 12

5 Knowledge about research and managerial effectiveness 12

6 Ethics and business research 13

7 Summary 13

8 Discussion questions 14

9 Case: The Laroche Candy Company 15

## 2 The scientific approach and alternative approaches to investigation

18 Introduction

19 The hallmarks of scientific research

- Purposiveness 19
- Rigor 19
- Testability 20
- Replicability 20
- Precision and confidence 21

# 4 The critical literature review

- Introduction 51
- How to approach the literature review 54
  - Data sources 54
    - Textbooks 54
    - Journals 54
    - Theses 54
    - Conference proceedings 55
    - Unpublished manuscripts 55
    - Reports 55
    - Newspapers 55
    - The Internet 55
  - Searching for literature 56
  - Evaluating the literature 56
  - Documenting the literature review 57
- Ethical issues 59
- Summary 60
- Discussion questions 61
- Practice project 62
- Appendix 63
- Some online resources useful for business research 63
- Bibliographical databases 66
- Apa format for referencing relevant articles 66
- Referencing and quotation in the literature review section 69

# 5 Theoretical framework and hypothesis development

- Introduction 71
- The need for a theoretical framework 72
- Variables 72
  - Dependent variable 73
  - Independent variable 74
  - Moderating variable 75
    - The distinction between an independent variable and a moderating variable 77
  - Mediating variable 79
- How theory is generated 81
  - The components of the theoretical framework 82
- Hypothesis development 83
  - Definition of a hypothesis 84
  - Statement of hypotheses: formats 84
    - If–then statements 84
6 Elements of research design

Introduction
The research design
Elements of research design
  Research strategies
    Experiments
    Survey research
    Ethnography
    Case studies
    Grounded theory
    Action research
  Extent of researcher interference with the study
  Study setting: contrived and noncontrived
  Unit of analysis: individuals, dyads, groups, organizations, cultures
  Time horizon: cross-sectional versus longitudinal studies
    Cross-sectional studies
    Longitudinal studies
Mixed methods
Trade-offs and compromises
Managerial implications
Summary
Discussion questions

7 Interviews

Introduction
Primary data collection methods
Interviews
  Unstructured and structured interviews
    Unstructured interviews
    Structured interviews
    Review of unstructured and structured interviews
Training interviewers
Some tips to follow when interviewing
  Establishing credibility and rapport, and motivating individuals to respond
  The questioning technique
  Review of tips to follow when interviewing
8 Data collection methods: Observation

Introduction
Definition and purpose of observation
Four key dimensions that characterize the type of observation
  Controlled versus uncontrolled observational studies
  Participant versus nonparticipant observation
  Structured versus unstructured observational studies
  Concealed versus unconcealed observation
Two important approaches to observation
  Participant observation: introduction
    The participatory aspect of participant observation
    The observation aspect of participant observation
  What to observe
  Structured observation: introduction
    The use of coding schemes in structured observation
Advantages and disadvantages of observation
Summary
Discussion questions

9 Administering questionnaires

Introduction
Types of questionnaires
  Personally administered questionnaires
  Mail questionnaires
  Electronic and online questionnaires
Guidelines for questionnaire design
  Principles of wording
    Content and purpose of the questions
10  Experimental designs

Introduction

The lab experiment
  Control
  Manipulation
  Controlling the contaminating exogenous or “nuisance” variables
    Matching groups
    Randomization
  Internal validity of lab experiments
  External validity or generalizability of lab experiments

The field experiment

External and internal validity in experiments
  Trade-off between internal and external validity
  Factors affecting the validity of experiments
    History effects
    Maturation effects
    Testing effects
    Selection bias effects
    Mortality effects
    Statistical regression effects
    Instrumentation effects
Identifying threats to validity
Review of factors affecting internal and external validity 178
Types of experimental design and validity 179
  Quasi-experimental designs 179
    Pretest and posttest experimental group design 179
    Posttests only with experimental and control groups 179
    Time series design 180
  True experimental designs 181
    Pretest and posttest experimental and control group design 181
    Solomon four-group design 181
    Double-blind studies 183
  Ex post facto designs 184
  Simulation 184
  Ethical issues in experimental design research 185
  Managerial implications 186
  Summary 187
  Discussion questions 189
Appendix: Further experimental designs 190
  The completely randomized design 190
  Randomized block design 191
  Latin square design 191
  Factorial design 192

### 11 Measurement of variables: Operational definition 193

Introduction 193
How variables are measured 193
Operational definition (operationalization) 195
  Operationalization: dimensions and elements 196
  Operationalizing the (multidimensional) concept of achievement motivation 197
    Dimensions and elements of achievement motivation 198
  What operationalization is not 202
  Review of operationalization 203
International dimensions of operationalization 204
Summary 204
Discussion questions 205

### 12 Measurement: Scaling, reliability and validity 206

Introduction 206
Four types of scales 207
  Nominal scale 207
  Ordinal scale 208
  Interval scale 209
  Ratio scale 209
# CONTENTS

Ordinal or interval? 210  
Review of scales 212  
Rating scales 213  
Dichotomous scale 213  
Category scale 214  
Semantic differential scale 214  
Numerical scale 214  
Itemized rating scale 215  
Likert scale 215  
Fixed or constant sum scale 216  
Stapel scale 216  
Graphic rating scale 217  
Consensus scale 218  
Other scales 218  
Ranking scales 218  
Paired comparison 218  
Forced choice 218  
Comparative scale 219  
International dimensions of scaling 219  
Goodness of measures 220  
Item analysis 220  
Validity 220  
Content validity 221  
Criterion-related validity 221  
Construct validity 222  
Reliability 223  
Stability of measures 224  
Internal consistency of measures 224  
Reflective versus formative measurement scales 225  
What is a reflective scale? 225  
What is a formative scale and why do the items of a formative scale not necessarily hang together? 225  
Summary 226  
Discussion questions 227  
Appendix: Examples of some measures 229  
Measures from behavioral finance research 229  
Measures from management accounting research 230  
Measures from management research 230  
Measures from marketing research 232  

## 13 Sampling 235  
Introduction 235  
Population, element, sample, sampling unit, and subject 236  
Population 236
Element 237
Sample 237
Sampling unit 237
Subject 237
Sample data and population values 237
Parameters 238
Representativeness of Samples 238
Normality of Distributions 238
The sampling process 239
Defining the population 240
Determining the sample frame 240
Determining the sampling design 240
Determining the sample size 241
Executing the sampling process 241
Probability sampling 242
Unrestricted or simple random sampling 242
Restricted or complex probability sampling 243
Systematic sampling 243
Stratified random sampling 244
Cluster sampling 246
Double sampling 247
Review of probability sampling designs 247
Nonprobability sampling 247
Convenience sampling 247
Purposive sampling 248
Judgment sampling 248
Quota sampling 248
Review of nonprobability sampling designs 249
Intermezzo: examples of when certain sampling designs would be appropriate 252
Simple random sampling 252
Stratified random sampling 252
Systematic sampling 253
Cluster sampling 254
Area sampling 254
Double sampling 255
Convenience sampling 255
Judgment sampling: one type of purposive sampling 255
Quota sampling: a second type of purposive sampling 256
Issues of precision and confidence in determining sample size 257
Precision 257
Confidence 258
Sample data, precision, and confidence in estimation 258
Trade-off between confidence and precision 259
Sample data and hypothesis testing 260
The sample size
  Determining the sample size
  Sample size and type II errors
  Statistical and practical significance
  Rules of thumb
  Efficiency In Sampling
Sampling as related to qualitative studies
Managerial implications
Summary
Discussion questions

14 Quantitative data analysis

Introduction
Getting the data ready for analysis
  Coding and data entry
    Coding the responses
    Data entry
  Editing data
  Data transformation
Getting a feel for the data
  Frequencies
    Bar charts and pie charts
  Measures of central tendency and dispersion
    Measures of central tendency
    Measures of dispersion
  Relationships between variables
    Relationship between two nominal variables: \( \chi^2 \) test
    Correlations
Excelsior enterprises: descriptive statistics part 1
Testing the goodness of measures
  Reliability
    Excelsior Enterprises: checking the reliability of the multi-item measures
  Validity
Excelsior enterprises: descriptive statistics part 2
Summary
Discussion questions

15 Quantitative data analysis: Hypothesis testing

Introduction
Type I errors, type II errors, and statistical power
Choosing the appropriate statistical technique
  Testing a hypothesis about a single mean
Testing hypotheses about two related means 305
Testing hypotheses about two unrelated means 309
Testing hypotheses about several means 311
Regression analysis 312
  Standardized regression coefficients 315
  Regression with dummy variables 315
  Multicollinearity 316
  Testing moderation using regression analysis: interaction effects 316
Other multivariate tests and analyses 319
  Discriminant analysis 319
  Logistic regression 319
  Conjoint analysis 320
  Two-way ANOVA 322
  MANOVA 322
  Canonical correlation 322
Excelsior enterprises: hypothesis testing 323
  Overall interpretation and recommendations to the president 325
Data warehousing, data mining, and operations research 326
Some software packages useful for data analysis 327
Summary 328
Discussion questions 329

16 Qualitative data analysis 332

Introduction 332
Three important steps in qualitative data analysis 332
  Data reduction 334
  Data display 347
  Drawing conclusions 347
Reliability and validity in qualitative research 348
Some other methods of gathering and analyzing qualitative data 350
  Content analysis 350
  Narrative analysis 350
  Analytic induction 350
Big data 351
Summary 351
Discussion questions 352

17 The research report 353

Introduction 353
The written report 354
  The purpose of the written report 354
  The audience for the written report 356
