# Contents

**Preface**

**Introduction**

1 Steroids: a Brief History

1.1 Structure Determination

1.1.1 Cholesterol and Cholic Acid

1.1.2 The Sex Steroids

1.1.3 Corticosteroids

2 Sources of Steroids

2.1 Biosynthesis

2.2 Commercial Steroid Starting Materials

2.2.1 Diosgenin

2.2.2 Soybean Sterols

3 Estranes: Steroids in Which Ring A is Aromatic

3.1 Biological Activity

3.2 Sources of Estranes

3.2.1 From Androstanes

3.2.2 Estrogens by Total Synthesis

3.3 Chemical Reactions of Estranes

3.3.1 Aromatic A-ring Reactions

3.3.2 Modifications on Ring B

3.3.3 Modifications on Ring C

3.3.4 Modifications on Ring D

3.4 Some Drugs Based on Estranes

4 Gonanes or 19-nor-Steroids

4.1 Preparation of Gonane Starting Materials

4.1.1 Birch Reduction

4.1.2 Synthesis by Sequential Annulation Reactions

4.2 Anabolic–Androgenic Gonanes

4.2.1 Biological Activity

4.2.2 Synthesis of 19-Norandrogens

4.3 Progestational Gonanes

4.3.1 Biological Activity

4.3.2 Preparation of 19-Norprogestins

4.4 Some Drugs Based on Gonanes

4.4.1 Androgenic–Anabolic Agents

4.4.2 Progestins

4.4.3 Progestin Antagonists

5 Androstanes, C₁₉ Steroids and Their Derivatives

5.1 Biological Activity

5.2 Sources of Androstanes

5.2.1 From Pregnenolone

5.2.2 Fermentations

5.2.3 Total Synthesis
5.3 Modified Anabolic–Androgenic Androstanes 69
  5.3.1 17-Desalkyl Compounds 69
  5.3.2 17-Alkyl Compounds 73
  5.3.3 Modifications on Ring B 77
  5.3.4 Modifications on Ring C 79
  5.3.5 Modifications on Ring D 80
5.4 17-Spirobutyrolactone Aldosterone Antagonists 83
5.5 Some Drugs Based on Androstanes 85
  5.5.1 Androgens 85
  5.5.2 Spirobutyrolactones 85

6 Pregnanes, Part 1: Progestins 86
  6.1 Biological Activity 86
  6.2 Sources of Progesterone 86
    6.2.1 From Phytochemicals 86
    6.2.2 By Total Synthesis 87
    6.2.3 From Dehydroepiandrosterone (DHEA) Acetate 88
  6.3 Modified Pregnanes 88
    6.3.1 17-Hydroxy and Acyloxy Derivatives 88
    6.3.2 Modifications on Ring A 89
    6.3.3 Modifications on Ring B 90
    6.3.4 General Methods for Modifications on Ring D 94
    6.3.5 More Progesterone Analogues 96
  6.4 Some Drugs Based on Progestins 100
    6.4.1 Medroxyprogesterone Acetate (10-2) 100
    6.4.2 Megestrol Acetate (10-3) 101
    6.4.3 Melengestrol Acetate (26-7) 101

7 Pregnanes, Part 2: Corticosteroids 102
  7.1 Biological Activity 102
  7.2 Sources of Corticoids 102
    7.2.1 Introduction of Oxygen at C11 102
    7.2.2 Construction of the Dihydroxyacetone Side Chain 103
  7.3 Modified Corticoids 105
    7.3.1 Unsaturation 105
    7.3.2 Additional Alkyl Groups 106
    7.3.3 Halogenated Corticoids 109
    7.3.4 Hydroxylation: 16,17-Diols 111
    7.3.5 Corticoids with Multiple Modifications 112
    7.3.6 Miscellaneous Corticoids 117
  7.4 Some Drugs Based on Corticoids 119

8 Miscellaneous Steroids 122
  8.1 Heterocyclic Steroids 122
    8.1.1 Introduction 122
    8.1.2 Steroids with a Heteroatom in Ring A 122
    8.1.3 Steroids with a Heteroatom in Ring B 124
    8.1.4 Steroids with a Heteroatom in Ring C 126
    8.1.5 Steroids with a Heteroatom in Ring D 128
  8.2 Cardenolides 129
    8.2.1 Actodigin Aglycone 130
    8.2.2 Synthesis from a Bile Acid 130
  8.3 Compounds Related to Cholesterol 132
