INDEX

ACA. See Patient Protection and Affordable Care Act
ACF. See Administration for Children & Families
Acid rain, 320
Action, 239
Action threshold, 362
Adjusted rates, 60
Administration: assessment, 206; public health program, 440–445
Administration for Children & Families (ACF), 420–421
Adopter categories, 256
Advocacy, 283–284
Aeration, 330
Affective methods, of health promotion: film, 277; interactive field trip, 277; overview, 267–268, 271, 272; psychodrama, 273–274; role-play, 271–273; simulation, 272–273; small group discussion, 276–277; stress reduction, 274–276
Age: in population projections, 293–296; in world population trends, 296, 299–300
Agency for Healthcare Research and Quality (AHRQ), 420
Agent: change, 258; definition, 56; factors in epidemiological trial, 56, 57
Age-specific fertility rate (ASFR), 301
Age-specific rates, 59–60; death rates, 66; fertility rate, 301
Agriculture, and climate change, 340–341
AHRQ. See Agency for Healthcare Research and Quality
AIDS. See HIV/AIDS
Air pollution: control of, 321–323; health effects, 318–321; indoor, 316; outdoor, 316–318; overview, 315–316, 342–343
Ajzen, Icek, 242–246; website, 262
Alcohol use, 111–112; underage drinking interventions, 191–192; unintentional injuries from, 350–351
Alcoholism, 40
Alpha, 146–147
Alternate hypothesis, 146
American Public Health Association (APHA), 22, 32, 283; websites, 43, 288
Analysis: situational, 201–202; SWOT, 441–445; TPB, 245–246; water, 328–329
Analysis of variance (ANOVA): example of, 153–158; MANOVA, 157–158; nonparametric counterparts of, 158; one-way, 156; overview, 153; repeated measures, 156; two-way, 156, 157
Analytic learning, 267
Analytical epidemiological studies: association and causation, 100–103; overview, 87–88. See also Intervention studies; Observational studies
Analytical epidemiology: applying, 103; key terms, 115; learning objectives, 87; lifestyle risk factors, 110–114; overview, 52, 80, 87, 114–115; review questions, 115; skill-building activity, 116; websites, 116–117
Ancient civilizations, influences on community and public health: China, 26; Egypt, 25; Greece, 26–27; Indian subcontinent, 24–25; Mesopotamia, 26; Rome, 27
ANOVA. See Analysis of variance
Antecedent, 50–51
Antibiotics, 33
APEXPH. See Assessment Protocol for Excellence in Public Health
APHA. See American Public Health Association
ASFR. See Age-specific fertility rate
Assessment: administrative, 206; ecological and educational, 205–206; epidemiological, 202–205; needs, 428–429; policy, 206; PRECEDE-PROCEED, 201–206; social, 201–202. See also Evaluation
Assessment Protocol for Excellence in Public Health (APEXPH), 219–220, 226
Association: causation and, 100–103, 114–115; overview, 100–103; statistical, 100; testing between two or more variables, 160–163
Association for the Behavioral Sciences and Medical Education, website, 195
Asthma, 180
Attitudes toward a behavior, 243
Attributable risk: calculating, 96–97; definition, 94; population, 94, 96–97
Audience segmentation, 252
Auditory learners, 266
Authoritarian style, 465
Autocratic style, 465
Average, 129, 138

Bacteriological revolution, 32–33
Bandura, Albert, 248–251
Bar graph, 132, 133
Behavior: attitudes toward a, 243; behavior-specific, 176; change techniques, 278–281. See also Health behavior
Behavior change models: community planning models compared to, 232. See also Health behavior theories
Behavioral beliefs, 243
Behavioral control, perceived, 244
Behavioral epidemiology, 185
Behavioral factors, 13–14, 16, 174; BRFSS, 74, 82, 110, 112. See also Health behavior
Behavioral intentions (BI), 243
Behavioral Risk Factor Surveillance System (BRFSS), 74, 110, 112; website, 82
Behavioral sciences: overview, 171–172, 192. See also Social and behavioral sciences
Behavioral theories, 463. See also Health behavior theories
BI. See Behavioral intentions
Bias, 100; definition, 90; information, 90–91; recall, 91; selection, 90
Bioaccumulation, 328
Biological factors, 12–13, 16
Biometry, molecular, 35
Biomagnification, 328, 329
Biostatistics: basic terms, 123–127; core competencies website, 167; graphing methods, 132, 133, 138; for nurses website, 141; overview, 123, 124, 138. See also Descriptive biostatistics; Inferential biostatistics
Bioterrorism, 39
Bottoms-up approach, 186–188
Box and whisker plot, 134–135, 137, 155
Box plot, 134
Breast cancer: incidence rates, 70; research website, 116
BRFSS. See Behavioral Risk Factor Surveillance System
Budgets: definition, 432; public health program, 432–439
CAA. See Clean Air Act
California Tobacco Control Program, website, 194–195
Cancer Prevention Research Center, website, 261–262
Carcinogenesis, 364
Carcinogenic chemical substances, 327
Cardiovascular disease interventions, 181–182
Cardiovascular health problems, and noise pollution, 332–333
Case fatality rate (CFR), 66
Case report, 76
Case series, 76, 88
Case study: overview, 268–270. See also Case-control studies
Case-control studies: advantages and disadvantages of, 92; issues addressed by, 91–92; overview, 87, 88–91, 114
Cases, 88
Causation: association and, 100–103, 114–115; establishing, 55, 101–103; overview, 100–101; web of causality, 179
Cause-and-effect relationship, 102
Cause-specific rates, 59; death rates, 65
CDC. See Centers for Disease Control and Prevention
CEB. See Children ever born
Census Bureau, website, 312–313
Centers for Disease Control and Prevention (CDC), 35, 109, 110, 182, 209, 349
Centers for Medicare & Medicaid Services (CMS), 420
Central limit theorem, 144
Central tendency measures, 129–130, 138
Certified health education specialist (CHES), 39
Certified in public health (CPH), 38
CFR. See Case fatality rate
Chadwick, Edwin, 30
Change agents, 258
Chart: Gantt, 429–430; pie, 132–133, 134
Chemical contamination, 326–327
CHES. See Certified health education specialist
Child: health, 18; maltreatment, 355, 358
Child Safety Protection Act, 353
Children ever born (CEB), 301–302
Child-woman ratio, 301
China, 26
Chi-square test, 159–160
Choking, 352–353
Cholera, 31, 52, 53
Chronic disease epidemiology, 107–109
Chronic diseases, 34; growing prevalence of, 37; infectious diseases compared to, 108; overview, 107, 178–179, 192; risk factors for common, 108–109, 179; social and behavioral sciences research and, 179–180
CICs. See Combined injectable contraceptives
CLAS standards, 476–478, 481
Clean Air Act (CAA), 323
Clean Water Act (CWA), 324, 329
Climate, 337–338
Climate change: effects, 339–341; global warming and, 338; greenhouse effect, 338–339; human creation of, 338, 339; overview, 338, 343
Clinical preventive services, 17
Clinical trials. See Randomized clinical trials
CMS. See Centers for Medicare & Medicaid Services
Coagulation, 330
Coal mining, 370
Coalitions, 283, 284
COCs. See Combined oral contraceptives
Code of Hammurabi, 26; website, 43
Coefficient of determination, 161
Coefficient of variation, 130
Cognitive methods, of health promotion: case study, 268–270; documentary film, 270; field trip, 271; guest speaker, 270; lecture, 268, 269; overview, 267–268; panel-debate, 270–271
Cohort studies: advantages and disadvantages of, 94, 95; calculating attributable risk and population attributable risk, 96–97; concurrent, 93–94; on miners, 94, 95; nonconcurrent, 94; overview, 87, 88, 92–94; topics of, 94, 95
Coinsurance, 406
Coitus interruptus, 308
Combined injectable contraceptives (CICs), 307
Combined oral contraceptives (COCs), 307, 308
Combustion, 337
Commonsense learning, 267
Communicable diseases, 37, 104. See also Infectious diseases
Communication channels, 255–256
Community: definition, 2–3, 186; social and behavioral interventions in defined, 186
Community and public health: basic terms, 5–9; challenges, 37–40; definition, 1–4; introduction, 1–44; issues in, 10; key terms, 41–42; learning objectives, 1; medicine compared to, 8–9, 173; overview, 1, 8–9, 40–41; professionals’ training, 38; review questions, 42; skill-building activity, 42–43; websites, 43–44. See also Community health; Public health; specific community and public health topics
Community and public health factors: behavioral factors, 13–14, 16; biological factors, 12–13, 16; cultural factors, 15, 16; environmental factors, 16; organizational factors, 15, 16; overview, 12, 13, 16; social factors, 14–15, 16. See also Epidemiological factors
Community and public health organizations: global level, 23–24; local level, 19–21; national or federal level, 21–22; overview, 19–24; state or provincial level, 21. See also specific organizations
Community and public health research. See Social and behavioral sciences research
Community building, 186, 188–191, 193
Community capacity, 188–189
Community diagnosis, 54
Community health: definition, 3, 4; functions, 3; public health compared to, 4; status indicators website, 44. See also Community and public health; specific community health topics
Community medicine, 7, 8
Community mobilization, 191, 210
Community organization: factors in community and public health, 15, 16; overview, 186–188, 193. See also Community and public health organizations
Community organization, and community building: lifestyle interventions and, 186; overview, 186–191, 193
INDEX

PRECEDE-PROCEED, 200–209, 226, 228; review questions, 227; skill-building activity, 227; websites, 228
Community readiness: overview, 189; stages of, 189–191
Community resource management, 440–441
Community resources, 426, 431
Community Toolbox, website, 454
Competence: definition, 470; NCHL Health Leadership Competency Model, 467–469, 481. See also Cultural competence
Competition, 252–253
Composite measurement: disability-adjusted life year, 73–74; overview, 72–73, 80
Composting, 337
Concurrent cohort study, 93–94
Conditions of coverage, 406
Condition-specific preexisting conditions clause, 406
Condoms, 307, 309
Confounding, 91, 100
Confucius, 26
Consciousness raising, 239
Consumer orientation, 253
Contagious disease, 104
Contemplation, 238
Context, 208
Contingency management, 240
Contingency theories, 463–464
Continuous monitoring, 253, 254
Contraception, in world population trends, 303–309
Contraceptive methods, 306–309
Control beliefs, 244
Controls, 88. See also specific control topics
Conventional thinking, 459–460
Co-pay (co-payment), 391, 392, 406
Coronary heart disease: decline in deaths from, 415; US prevalence rate, 72
Correlation, 160–161
Correlation efficiency, 160
Correlational study, 75
Cost containment, 406–408, 416–417
Cost sharing, 407
Costs: direct, 436, 437; indirect, 436, 437; of occupational injuries, 375–376
Counterconditioning, 240
CPH. See Certified in public health
Cross-sectional survey, 76
Crude birth rate, 301
Crude rates, 59; death rates, 65
Cues to action, 235
Cultural and linguistic competence, 470
Cultural competence: case study on enhancing, 476; CLAS standards, 476–478, 481; importance of, 471–473; learning objectives, 457; overview, 469–471, 481; skill-building activity, 482–483; study in, 479; techniques of, 473–475; website, 483
Cultural empowerment, 221–222
Cultural factors, 15, 16
Cultural identity, 221
Culture, 470
Cumulative frequency, 128–129
Cumulative relative frequency, 128–129
CWA. See Clean Water Act
Cyclical fluctuations, 76
DALY. See Disability-adjusted life year
Data: collecting and organizing, 210–211; from experiments, 124; from local and regional surveys, 124; from national surveys, 124; organization, 12–13; raw, 12; secondary, 124, 125. See also Frequency distribution
Data sources, 124; website, 141
Days away from work, 374
DDT. See Dichloro-diphenyl-trichloroethane
Death certificates: overview, 62; US, 62, 63–64
Decision balance, 241–242
Deductible, 406
Delegative style, 465
Democratic style, 465
Demographic cycle, 291–292, 310
Demographic indicators, 294
Department of Health and Human Services, US (DHHS), 21, 412; operating divisions, 413
Department of Veterans Affairs, US (VA), 390
Descriptive biostatistics: central tendency measures, 129–130, 138; dispersion measures, 130, 138; key terms, 138–139; learning objectives, 123; overview, 123, 124, 138; review questions, 139; skill-building activity, 139–140; websites, 140–141
Descriptive biostatistics, distribution: frequency distribution, 127–129; normal distribution, 131–132; positively and negatively skewed distributions, 132–137
Descriptive epidemiology: learning objectives, 49; overview, 49, 51–52, 80; studies, 75–76. See also Epidemiology

Descriptive epidemiology, distribution: overview, 52, 75–76; person distribution, 52, 75–76, 78–79; place distribution, 52, 75–76, 77; time distribution, 52, 75, 76–77

Descriptive measure, 129

Descriptive norms, 245

Designs, 447–448

Determinants, 50–51; of health, 204–205

Deterministic effects, 327–328

DHHS. See Department of Health and Human Services, US

Diagnostic criteria, 88

Diaphragmatic breathing, 274–275

Dichloro-diphenyl-trichloroethane (DDT), 360

INDEX

Social and behavioral sciences research: chronic diseases and, 179–180; community-based primary prevention interventions and, 180–184

Social assessment, 201–202

Social cognitive theory (SCT): building blocks, 248–251; goal setting, 250; knowledge, 248–249; outcome expectations, 250; overview, 248; perceived facilitators and impediments, 249; self-efficacy, 249–250

Social determinants, of health, 19

Social epidemiology, 184–185

Social factors, 14–15, 16

Social liberation, 240–241

Social marketing: audience segmentation, 252; building blocks, 252–254; competition, 252–253; consumer orientation, 253; continuous monitoring, 253; exchange theory, 252; marketing mix, 253; overview, 251–252

Social medicine, 7, 8

Social science: overview, 171–172, 192. See also Social and behavioral sciences

Social support, 184–185

Social systems, 257–258

Society of Public Health Education (SOPHE), 262

Socratic method, 27

Solid waste, 335

Solid waste management: disposal, 337; integrated, 335–336; overview, 335–336, 343; recycling, 337, 342; source reduction and waste prevention, 337

SOPHE. See Society of Public Health Education

Source reduction, 337

Spatial epidemiology, 77–78

Spearman’s rank correlation, 161

Specific rates: age, 59–60, 66; cause, 59, 65; death rates, 65–66; sex, 60, 66

Stages of change: action, 239; contemplation, 238; maintenance, 239; overview, 237; precontemplation, 237–238; preparation, 238–239; processes of change and, 241; termination, 239

Stakeholders, 449

Standard deviation (SD), 130

Standardized rates, 60

Stanford Three Community Study, 180–181

State and local health departments, 38

State Children’s Health Insurance Program (S-CHIP), 390

State or provincial level organizations, 21

Statistic, 129

Statistical association, 100

Statistical graphs website, 141

Statistical hypothesis, 145

Statistical significance, 163–164

Statistics: overview, 123, 124, 138; vital, 124; websites, 141, 167–168. See also Biostatistics

Stem and leaf display, 134, 136

Stimulus control, 240

Stochastic effects, 328

Street-level policy implementers, 462

Stress reduction, 274

Stress reduction techniques: overview, 274; relaxation training, 274–276

Strong and weak principles of change, 242

Studies: correlational, 75. See also Research; specific studies

Subjective norms, 243–244, 245

Substance abuse, 19

Suicide, 180

Summative evaluation, 445–446

Super agency, 412

Supplies, 433–434, 437

Surveillance, epidemiological, 74–75

Surveillance, Epidemiology and End Results (SEER), 75

Surveys: data from local and regional, 124; data from national, 124; describing results, 135; overview, 124

SWOT analysis, 441–445

Syndromes: identifying, 55; shaken baby, 355

Systems: characteristics, 458–459; norms, 257; social, 257–258. See also Health care system

Systems thinking: conventional thinking compared to, 459–460; in health care system, 457–460; learning objectives, 457; overview, 457–460–480; public health challenges in applying, 461–462; in tobacco control, 460–461
TDI. See Tolerable daily intake

Teaching methods: overview, 265–268. See also Health education methods

Technology growth challenge, 40

Temporal trends, 76

Termination, 239

Terrorist activities, 39

Tertiary prevention of violence, 357–358

Testing differences, in inferential biostatistics:
  in proportions, 158–160; between three or more groups, 152–158; between two group means, 148–151; between two groups with nonparametric tests, 151–152

Tests. See specific tests

Theory; germ, 29, 32; overview, 231, 232; public health use of, 233. See also Health behavior theories; Models

Theory of planned behavior (TPB), 242, 243; analysis of, 245–246; perceived behavioral control, 244

Theory of reasoned action (TRA): attitudes toward a behavior, 243; behavioral intentions, 243; buildings blocks, 242–244; overview, 242; subjective norms, 243–244, 245

Third phase of demographic cycle, 292

Time building block: adopter categories, 256; innovation-decision process, 256; rate of adoption, 256–257

Time distribution: in descriptive epidemiology, 52, 75, 76–77; in epidemiology, 50

Title X Family Planning Program, website, 313

Tobacco, 19; challenge of, 40; control and systems thinking, 460–461

Tobacco use, 91, 180, 402, 415; overview, 110–111

Tolerable daily intake (TDI), 327

Top-down approach, 186–187

Total fertility rate, 301, 302

TOWS analysis, 441. See also SWOT analysis

Toxicity, 359; genotoxicity, 360

TPB. See Theory of reasoned action

TRA. See Theory of reasoned action

Trait theories, 462–463

Transcational leadership, 464

Transformational theories, 464

Transmission: direct and indirect, 104–105; infectious diseases’ routes of, 104–105; of measles, 105, 106

Travel, training and dissemination, 435, 437

T-test, 148, 149

T-test for dependent samples, 150–151

T-test for independent samples, 148
