Foreword ix
Preface xi
Acknowledgments xv

Chapter 1: Introduction 1
  Defining Fraud 1
  Anomalies versus Fraud 2
  Types of Fraud 2
  Assess the Risk of Fraud 4
  Conclusion 6
  Notes 6

Chapter 2: Fraud Detection 7
  Recognizing Fraud 7
  Data Mining versus Data Analysis and Analytics 10
  Data Analytical Software 11
  Anomalies versus Fraud within Data 12
  Fraudulent Data Inclusions and Deletions 14
  Conclusion 14
  Notes 15

Chapter 3: The Data Analysis Cycle 17
  Evaluation and Analysis 17
  Obtaining Data Files 19
  Performing the Audit 22
  File Format Types 24
  Preparation for Data Analysis 24
  Arranging and Organizing Data 33
  Conclusion 35
  Notes 35

Chapter 4: Statistics and Sampling 37
  Descriptive Statistics 37
  Inferential Statistics 38
Contents

Measures of Center 38
Measure of Dispersion 39
Measure of Variability 40
Sampling 41
Conclusion 65
Notes 65

Chapter 5: Data Analytical Tests 67
Benford’s Law 68
Number Duplication Test 77
Z-Score 81
Relative Size Factor Test 84
Same-Same-Same Test 93
Same-Same-Different Test 94
Even Amounts 98
Conclusion 99
Notes 100

Chapter 6: Advanced Data Analytical Tests 101
Correlation 101
Trend Analysis 104
GEL-1 and GEL-2 109
Conclusion 121
Note 122

Chapter 7: Skimming and Cash Larceny 123
Skimming 123
Cash Larceny 124
Case Study 124
Conclusion 131

Chapter 8: Billing Schemes 133
Data and Data Familiarization 134
Benford’s Law Tests 138
Relative Size Factor Test 139
Z-Score 140
Even Dollar Amounts 141
Same-Same-Same Test 144
Same-Same-Different Test 145
Payments without Purchase Orders Test 146
Length of Time between Invoice and Payment Dates Test 151
Search for Post Office Box 152
Match Employee Address to Supplier 155
Duplicate Addresses in Vendor Master 157
Payments to Vendors Not in Master 158
Gap Detection of Check Number Sequences 161
Conclusion 162
Note 162
## Contents

### Chapter 9: Check-Tampering Schemes  
163  
- Electronic Payments Fraud Prevention  
  164  
- Check Tampering  
  165  
- Data Analytical Tests  
  166  
- Conclusion  
  171

### Chapter 10: Payroll Fraud  
173  
- Data and Data Familiarization  
  175  
- Data Analysis  
  181  
- The Payroll Register  
  193  
- Payroll Master and Commission Tests  
  194  
- Conclusion  
  195  
- Notes  
  196

### Chapter 11: Expense Reimbursement Schemes  
197  
- Data and Data Analysis  
  201  
- Conclusion and Audit Trail  
  219  
- Notes  
  220

### Chapter 12: Register Disbursement Schemes  
221  
- False Refunds and Adjustments  
  221  
- False Voids  
  222  
- Concealment  
  222  
- Data Analytical Tests  
  222  
- Conclusion  
  233

### Chapter 13: Noncash Misappropriations  
235  
- Types of Noncash Misappropriations  
  235  
- Concealment of Noncash Misappropriations  
  237  
- Data Analytics  
  238  
- Conclusion  
  240

### Chapter 14: Corruption  
243  
- Bribery  
  243  
- Tender Schemes  
  244  
- Kickbacks, Illegal Gratuities, and Extortion  
  245  
- Conflict of Interest  
  246  
- Data Analytical Tests  
  247  
- Concealment  
  250  
- Conclusion  
  250

### Chapter 15: Money Laundering  
253  
- The Money-Laundering Process  
  254  
- Other Money Transfer Systems and New Opportunities  
  256  
- Audit Areas and Data Files  
  257  
- Conclusion  
  259
### Chapter 16: Zapper Fraud 261
- Point-of-Sales System Case Study 265
- Quantifying the Zapped Records 294
- Additional POS Data Files to Analyze 296
- Missing and Modified Bills 297
- The Markup Ratios 299
- Conclusions and Solutions 300
- Notes 302

### Chapter 17: Automation and IDEAScript 303
- Considerations for Automation 304
- Creating IDEAScripts 306
- Conclusion 316

### Chapter 18: Conclusion 319
- Financial Statement Fraud 319
- IDEA Features Demonstrated 321
- Projects Overview 323
- Data Analytics: Final Words 325
- Notes 326
