 fabricating on plastic substrates, 337
 in future solution-based process applications, 452
 in heterogeneous three-dimensional integration, 433–434, 435
 high-performance, 16
 ink-jet-fabricated, 141
 in integrated circuits, 431
 next-generation, 14–15
RF performance, 16–17
 single-wall carbon nanotube (SWNT) based, 18
 solution-deposited oxide gate dielectric in, 116
 structure of, 12, 397, 398
 transparent, 21–22
 using μ-Si MOSFETs, 426–429, 430
Thin insulators, 121
Thiourea, desulfuration of, 206
Three-dimensional (3D) structures, next-generation, 462, 463, 464
Three-dimensional integration (3D-HGI), on plastic, 432–436
3D integrated functional electronic system, 370–372
3D NW circuit integration, 370
Tin chalcogenide films, 87. See also K2Sn2Se6; SnSe2−xSx films; Stannic entries
TiO2/CdS/CuSCN solar cell, 257–258
TIPT-based solutions, 43–44. See also Titanium isopropoxide (TIPT)
Titania films, 295. See also Titanium oxide films
Titanium dioxide (TiO2), in DSSCs, 303
Titanium isopropoxide (TIPT), 37, 38, 251. See also TIPT-based solutions
Titanium methoxyethoxide, 38
Titanium oxide (TiO2), in EISA processing, 295
Titanium oxide films. See also Titania films
 mesoporous, 297
SILAR-grown, 246–247, 250–251
Titanium phosphate films, sequential-deposition-grown, 270
INDEX

Tl–Bi–Sr–Ba–Ca–Cu–O, electrodeposition of, 219–222. See also Thallium entries
Toluene, 40
Top-down approaches, 349–350 in macroelectronics, 408 in wafer etching, 410–412
XOR gate, 360
X-ray diffraction (XRD), 97, 98, 161, 247–248. See also Powder XRD analysis; XRD entries
X-ray diffractographs, 227
X-ray fluorescence (XRF), 267
X-ray photoelectron spectroscopy (XPS), 92, 143
X-ray photoemission spectroscopy analysis, 204, 205
X-ray reflectometry (XRR), 289, 294 measurements with, 125
X-ray scans, variable-temperature, 99
XRD analysis, 173, 267. See also X-ray diffraction (XRD)
XRD patterns, 179
XRD spectra, 167–168, 176
Xylene, 40

YBCO films, high-performance, 226
YBCO superconductor, 224
Young’s modulus, 55
Yttrium oxide films, 247
Yttrium-stabilized zirconium (YSZ) oxide, 224

Zero-dimensional (0D) structures, 350–351
Zinc chalcogenide thin films, ECALE-grown, 268. See also Zn entries
Zinc oxide (ZnO) future applications of, 452–453
intrinsic, 191
nanorod carpet, 453
Zinc oxide films, 210
dip-ILGAR-grown, 268
sequential-deposition-grown, 270
SILAR-grown, 246, 247–250
Zinc oxide nanorods, 330
in next-generation applications, 458–459
Zinc oxide nanowires, 335
Zinc selenide (ZnSe) films, SILAR-grown, 253, 257
Zinc silicate films, 247
Zinc species, soluble and insoluble, 203
Zinc sulfide (ZnS) films, SILAR-grown, 253, 256–257. See also ZnS entries
Zinc telluride (ZnTe), 82, 99–100
Zinc telluride films, 98–101
SILAR-grown, 253, 257
Zinc telluride precursor, 99
Zirconium hydroxide films, 247. See also Zn,Zr,F_z films
Zirconium oxide (ZrO_2) films, 247
SILAR-grown, 252
Zirconium oxide sulfate (ZrSO_4) films, 125, 126
ZnS(O,OH) deposition, 203–206
ZnS SILAR growth, 243–244, 245. See also Zinc sulfide (ZnS) films
Zn,Zr,F_z films, SILAR-grown, 264
