CONTENTS

PREFACE vii

LIST OF SYMBOLS xix

Chapter 1 INTRODUCTION 1
  1.1 Mechanics of Materials 2
  1.2 Scope of the Book 3
  1.3 Methods of Analysis 4
  1.4 Engineering Design 5
  1.5 Review of Static Equilibrium 6
  1.6 Internal Force Resultants 10
  1.7 Problem Formulation and Solution 13
  1.8 Application to Simple Structures 15
  Chapter Summary 26
  References 27

Chapter 2 CONCEPT OF STRESS 28
  2.1 Introduction 29
  2.2 Internal Axial Forces 29
  2.3 Normal Stress 31
  2.4 Bearing Stress in Connections 37
  2.5 Shearing Stress 38
  2.6 Stresses in Simple Structures 43
  2.7 Allowable Stress and Factor of Safety 52
  2.8 Design of Bars for Axial Loading 56
  2.9 Case Studies 60
  *2.10 Stress under General Loading 68
     Chapter Summary 77
     References 78

Chapter 3 STRAIN AND MATERIAL PROPERTIES 79
  3.1 Introduction 80
  3.2 Deformation 80
  3.3 Strain 81
  3.4 Components of Strain 84
  3.5 Materials 89
  3.6 Stress–Strain Diagrams 90
  3.7 True Stress and True Strain 97
  3.8 Elastic versus Plastic Behavior 98
  3.9 Hooke’s Law 99
  3.10 Poisson’s Ratio 102
  3.11 Generalized Hooke’s Law 108
  3.12 Strain Energy 113
  *3.13 Impact Strength 115
  *3.14 Fatigue 116
  3.15 Permanent Deformation 119
  3.16 General Properties of Materials 121
  *3.17 Selecting Materials 122
     Chapter Summary 127
     References 129

Chapter 4 AXIALLY LOADED MEMBERS 130
  4.1 Introduction 131
  4.2 Deformation of Axially Loaded Members 131
  4.3 Statically Indeterminate Structures 143
  4.4 Method of Superposition 147
  4.5 Thermal Deformation and Stress 148
  4.6 Stresses on Inclined Planes 156
  4.7 Saint-Venant’s Principle 159
  4.8 Stress Concentrations 160
  *4.9 Ductility and Design 164
  *4.10 Plastic Deformation and Residual Stress 165
Chapter 5  TORSION  174

5.1 Introduction  175
5.2 Deformation of a Circular Shaft  175
5.3 The Torsion Formula  178
5.4 Axial and Transverse Shear Stresses  180
5.5 Stresses on Inclined Planes  183
5.6 Angle of Twist  188
5.7 Statically Indeterminate Shafts  196
5.8 Design of Circular Shafts  202
5.9 Stress Concentrations  206
5.10 Inelastic Torsion of Circular Shafts  211
5.11 Torsion of Noncircular Solid Bars  215
5.12 Thin-Walled Hollow Members  218

Chapter Summary  228
References  230

Chapter 6  SHEAR AND MOMENT IN BEAMS  231

6.1 Introduction  232
6.2 Classification of Beams  232
6.3 Calculation of Beam Reactions  233
6.4 Shear Force and Bending Moment  238
6.5 Load, Shear, and Moment Relationships  243
6.6 Shear and Moment Diagrams  245
6.7 Discontinuity Functions  259
Chapter Summary  268
References  270

Chapter 7  STRESSES IN BEAMS  271

7.1 Introduction  272
PART A  Pure Bending  273
7.2 Beam Deformation in Pure Bending  273
7.3 Assumptions of Beam Theory  275
7.4 Normal Strain in Beams  276
7.5 Normal Stress in Beams  280
7.6 Stress Concentrations in Bending  285
PART B  Shear and Bending  292
7.7 Shear Stresses in Beams  292
7.8 Shear Stress Distribution in Rectangular Beams  297
7.9 Shear Stresses in Beams of Circular Cross Section  299
7.10 Shear Stress Distribution in Flanged Beams  300
7.11 Comparison of Shear and Bending Stresses  304
7.12 Design of Prismatic Beams  308
7.13 Design of Beams of Constant Strength  311

PART C  Special Topics  321
7.14 Composite Beams  321
7.15 Reinforced Concrete Beams  325
7.16 Unsymmetric Bending  327
7.17 Shear Center  332
7.18 Inelastic Bending  334
7.19 Curved Beams  341
Chapter Summary  356
References  359

Chapter 8  TRANSFORMATION OF STRESS AND STRAIN  360

8.1 Introduction  361
8.2 Plane Stress  361
8.3 Principal Stresses  367
8.4 Maximum Shear Stress  368
8.5 Mohr’s Circle for Plane Stress  370
8.6 Absolute Maximum Shear Stress  383
8.7 Principal Stresses for a General State of Stress  384
8.8 Thin-Walled Pressure Vessels  385
8.9 Thick-Walled Pressure Vessels  393
8.10 Plane Strain  402
8.11 Mohr’s Circle for Plane Strain  405
8.12 Measurement of Strain; Strain Rosette  409
8.13 Relation Involving $E$, $\nu$, and $G$  412
Chapter Summary  416
References  418

Chapter 9  COMBINED LOADINGS AND FAILURE CRITERIA  419

9.1 Introduction  420
