PART A PROPERTY VALUE AND PROPERTY VALUATION 1

1 Microeconomic Concepts 3
   1.1 Supply and demand, markets and equilibrium price determination 3
   1.2 The property market and price determination 6
      1.2.1 Rent for land 6
      1.2.2 Land use rents 8
      1.2.3 Land use intensity 12
   1.3 Location and land use 14
   1.4 The economics of property development 22
      1.4.1 Type and density of property development 22
      1.4.2 The timing of redevelopment 25
   Notes 28
   References 29

2 Macroeconomic Considerations 31
   2.1 The commercial property market 31
   2.2 Property occupation 33
   2.3 Property investment 34
   2.4 Property development 43
   2.5 Property and the wider economy 44
   References 48

3 What is Property Valuation 49
   3.1 Introduction 49
   3.2 The need for valuations 50
      3.2.1 Types of property to be valued 52
      3.2.2 Bases of value 57
### Table of Contents

#### 3.3 Determinants of value
- 3.3.1 Property-specific factors
- 3.3.2 Market-related factors

#### 3.4 Valuation procedures
- 3.4.1 Terms of engagement
- 3.4.2 Inspections and investigations
- 3.4.3 Valuation report

#### 3.5 Measurement

#### Appendix – Inspection checklist

#### Notes

#### References

---

#### 4 Valuation Mathematics
- 4.1 Introduction
- 4.2 The time value of money
  - 4.2.1 Single period investments
  - 4.2.2 Multi-period investments
  - 4.2.3 Tax
- 4.3 Yields and rates of return
  - 4.3.1 Yields
  - 4.3.2 Rates of return
  - 4.3.3 Yields and rates of return

#### References

---

#### PART B VALUATION METHODS

#### 5 Comparison Method
- 5.1 Introduction
- 5.2 Sources of data
- 5.3 Comparison metrics
  - 5.3.1 Relative value of retail ground floor ‘zones’
- 5.4 Comparison adjustment

#### References

---

#### 6 Investment Method
- 6.1 Introduction
- 6.2 All-risks yield (ARY) methods
  - 6.2.1 Valuation of rack-rented freehold property investments
  - 6.2.2 Valuation of reversionary freehold property investments
  - 6.2.3 Valuation of leasehold freehold property investments
  - 6.2.4 Example: ARY Investment method
- 6.3 Discounted cash-flow (DCF) methods
  - 6.3.1 A discounted cash-flow valuation model
  - 6.3.2 Applying the DCF valuation model

#### Notes

#### References

#### Further reading
## 7 Profits Method

7.1 Introduction 161
7.2 Method 162
7.3 Example of a profits method valuation 166
7.4 Summary 169

Notes 170
References 170

## 8 Replacement Cost Method

8.1 Introduction 171
8.2 Method 172
8.3 Application 178
  8.3.1 Valuation of an owner-occupied property for accounts purposes 178
  8.3.2 Valuation for insurance purposes 178
8.4 Issues 178
  8.4.1 Definitional problems 179
  8.4.2 Methodological problems 181
8.5 Summary 184

Notes 185
References 186

## 9 Residual Method

9.1 Introduction 187
9.2 Conventional residual land valuation 188
9.3 Problems with the residual method 199
9.4 Cash-flow residual model 202

References 206

## 10 Automated Valuation Models and Computer-Assisted Mass Appraisal

10.1 Introduction 207
10.2 Method 207
  10.2.1 Simple linear regression (dependence of one metric variable on another) 208
  10.2.2 Multiple linear regression (dependence of one variable on two or more variables) 211
10.3 Example 215
  10.3.1 Data 215
  10.3.2 Descriptive statistics 216
  10.3.3 Simple linear regression 216
  10.3.4 Multiple linear regression 220
10.4 Multiple regression analysis: Research and applications 226
  10.4.1 Computer-assisted mass appraisal 228
  10.4.2 Automated valuation models 229
10.5 Advantages and disadvantages of regression-based valuation 230

Notes 231
References 231
14 Valuations for Compulsory Purchase and Compensation 307
14.1 Compensation for land taken (compulsorily acquired) 308
14.2 Compensation for severance and injurious affection 311
  14.2.1 Compensation where part of an owner’s land is acquired 311
  14.2.2 Compensation where no land is taken 314
14.3 Disturbance compensation 315
  14.3.1 Case study 316
14.4 Planning compensation 317
  14.4.1 Revocation, modification and discontinuance orders 318
  14.4.2 Purchase notices and blight notices 318
14.5 A note on CGT and compensation for compulsory acquisition 319
Notes 320
References 321

15 Specialist Valuations 322
15.1 Operational entities or ‘trade-related’ properties 322
  15.1.1 Hotels, guest houses, bed & breakfast and self-catering accommodation 322
  15.1.2 Restaurants, public houses and nightclubs 324
  15.1.3 Care homes 328
  15.1.4 Petrol filling stations 330
  15.1.5 Student accommodation 331
  15.1.6 Serviced offices 332
  15.1.7 Data centres 335
15.2 Valuation of contaminated land 335
15.3 Synergistic value 339
  15.3.1 Physical merger 339
  15.3.2 Legal merger 339
15.4 Special Purpose Valuations 340
  15.4.1 Charitable Valuations 340
  15.4.2 Local authority disposals of land for less than best consideration 341
Notes 341
References 342

16 Investment Valuations – Further Considerations 343
16.1 Short leases and leases with break clauses 343
16.2 Over-rented property investments 346
16.3 Valuation accuracy, variance and uncertainty 349
  16.3.1 Valuation accuracy 349
  16.3.2 Valuation variance 350
  16.3.3 Valuation uncertainty 352
  16.3.4 Sensitivity analysis 353
  16.3.5 Scenario testing and discrete probability modelling 356
  16.3.6 Continuous probability modelling and simulation 359
  16.3.7 Arbitrage (tenant yield approach) 363
Notes 368
References 369
