PREFACE ix

CHAPTER 1 INTRODUCING PSYCHOLOGY’S HISTORY 1

Why Take This Course? 2
Why Study History? 2
Why Study Psychology’s History? 4
Key Issues in Psychology’s History 6
Presentism versus Historicism 7
Internal versus External History 9
Personalistic versus Naturalistic History 10
Close-Up: Edwin G. Boring (1886–1968) 10
This Book’s Point of View 13
Historiography: Doing and Writing History 13
Sources of Historical Data 14
From the Miles Papers: Miles Meets His Academic Grandfather 16
Problems with the Writing of History 17
Data Selection Problems 17
Interpretation Problems 19
Approaching Historical Truth 20
Summary 21
Study Questions 22

CHAPTER 2 THE PHILOSOPHICAL CONTEXT 24

A Long Past 25
René Descartes (1596–1650): The Beginnings of Modern Philosophy and Science 25
Descartes and the Rationalist Argument 27
The Cartesian System 28
Descartes on the Reflex and Mind–Body Interaction 29
The British Empiricist Argument and the Associationists 32
John Locke (1632–1704): The Origins of British Empiricism 32
Locke on Human Understanding 32
Locke on Education 34
George Berkeley (1685–1753): Empiricism Applied to Vision 35
British Associationism 37
David Hume (1711–1776): The Rules of Association 37
David Hartley (1705–1757): A Physiological Associationism 39
Close-Up: Raising a Philosopher 41
John Stuart Mill (1806–1873): On the Verge of Psychological Science 42
Mill’s Psychology 43
Mill’s Logic 44
Rationalist Responses to Empiricism 45
Gottfried Wilhelm Leibniz (1646–1716) 45
Immanuel Kant (1724–1804) 46
In Perspective: Philosophical Foundations 47
Summary 48
Study Questions 49

CHAPTER 3 THE SCIENTIFIC CONTEXT 50

Heroic Science in the Age of Enlightenment 51
Functioning of the Nervous System 52
Reflex Action 53
The Bell–Magendie Law 54
The Specific Energies of Nerves 56
Helmholtz: The Physiologist’s Physiologist 57
Measuring the Speed of Neural Impulses 58
Helmholtz on Vision and Audition 59
Helmholtz and the Problem of Perception 61
Localization of Brain Function 62
The Phrenology of Gall and Spurzheim 62
Close-Up: The Marketing of Phrenology 65
Flourens and the Method of Ablation 68
The Clinical Method 69
The Remarkable Phineas Gage 70
Broca and the Speech Center 71
Mapping the Brain: Electrical Stimulation 73
CONTENTS

Nervous System Structure 74
Neuron Theory 74
Sir Charles Sherrington: The Synapse 76
From the Miles Papers: Miles Visits Sherrington in Oxford 77
In Perspective: The Nervous System and Behavior 78
Summary 78
Study Questions 79

CHAPTER 4 WUNDT AND GERMAN PSYCHOLOGY 81

An Education in Germany 82
On the Threshold of Experimental Psychology: Psychophysics 83
Johann Herbart (1776–1841) 84
Ernst Weber (1795–1878) 85
Two-Point Thresholds 85
Weber’s Law 85
Gustav Fechner (1801–1889) 86
Fechner’s Elements of Psychophysics 87
Wundt Establishes a New Psychology at Leipzig 88
Wilhelm Wundt (1832–1920): Creating a New Science 88
Wundt’s Conception of the New Psychology 90
Studying Immediate Conscious Experience 91
Studying Higher Mental Processes 92
Inside Wundt’s Laboratory 92
Sensation and Perception 92
Mental Chronometry 93
Close-Up: An American in Leipzig 95
Rewriting History: The New and Improved Wilhelm Wundt 96
The Source of the Problem 96
The Rediscovery of Wundt 97
The Real Wundt 97
The Wundtian Legacy 98
The New Psychology Spreads 99
Hermann Ebbinghaus (1850–1909): The Experimental Study of Memory 99
The Ebbinghaus Forgetting Curve 102
Other Contributions by Ebbinghaus 103
G. E. Müller (1850–1934): The Experimentalist Prototype 103
Oswald Külpe (1862–1915): The Würzburg School 104
Mental Sets and Imageless Thoughts 106
In Perspective: A New Science 107
Summary 107
Study Questions 108

CHAPTER 5 DARWIN’S CENTURY: EVOLUTIONARY THINKING 110

The Species Problem 111
Charles Darwin (1809–1882) and the Theory of Evolution 112
The Shaping of a Naturalist 112
The Voyage of the Beagle 114
Darwin the Geologist 115
Darwin the Zoologist 115
The Galapagos Islands 116
The Evolution of Darwin’s Theory 116
Darwin’s Delay 118
Elements of the Theory of Evolution 120
After the Origin of Species 121
Darwin and Psychology’s History 122
The Origins of Comparative Psychology 123
Darwin on the Evolution of Emotional Expressions 123
Close-Up: Douglas Spalding and the Experimental Study of Instinct 125
George Romanes (1848–1894) and the Anecdotal Method 126
Conwy Lloyd Morgan (1852–1936) and his “Canon” 128
Comparative Psychology in America 130
Studying Individual Differences 130
Francis Galton (1822–1911): Jack of All Sciences 130
The Nature of Intelligence 131
The Anthropometric Laboratory 134
Investigating Imagery and Association 134
In Perspective: Darwin’s Century 136
Summary 136
Study Questions 137

CHAPTER 6 AMERICAN PIONEERS 139

Psychology in 19th-Century America 140
Faculty Psychology 140
American Psychology’s First Textbook 141
The Modern University 141
Education for Women and Minorities 142
William James (1842–1910): The First of the “New” Psychologists in America 146
The Formative Years 147
A Life at Harvard 147
Creating American Psychology’s Most Famous Textbook 149
### CONTENTS

Walter Van Dyke Bingham (1880–1952) 237  
Lillian Moller Gilbreth (1878–1972) 238  
Harry Hollingworth (1880–1956) 239  
Applied Psychology in Europe—Psychotechnics 240  
In Perspective: Applied Psychology 241  
Summary 242  
Study Questions 243

### CHAPTER 9  GESTALT PSYCHOLOGY 244

The Origins and Early Development of Gestalt Psychology 245  
Max Wertheimer (1880–1943): Founding Gestalt Psychology 247  
Koffka (1886–1941) and Köhler (1887–1967): Cofounders 249  
Close-Up: A Case of Espionage? 251  
Gestalt Psychology and Perception 252  
Principles of Perceptual Organization 253  
The Gestalt Approach to Cognition and Learning 255  
Wertheimer on Productive Thinking 257  
Other Gestalt Research on Cognition 258  
Kurt Lewin (1890–1947): Expanding the Gestalt Vision 260  
Early Life and Career 260  
From the Miles Papers: Miles Learns about the Nazi Version of Academic Freedom 261  
Field Theory 262  
The Zeigarnik Effect 264  
Lewin as Developmental Psychologist 264  
Lewin as Social Psychologist 266  
Action Research 267  
Evaluating Lewin 268  
In Perspective: Gestalt Psychology in America 268  
Study Questions 271

### CHAPTER 10  THE ORIGINS OF BEHAVIORISM 272

Behaviorism’s Antecedents 273  
Pavlov’s Life and Work 274  
The Development of a Physiologist 275  
Working in Pavlov’s Laboratory—The Physiology Factory 275  
Pavlov’s Classical Conditioning Research 277  
Conditioning and Extinction 278  
Generalization and Differentiation 279  
Experimental Neurosis 279  
A Program of Research 280  
Pavlov and the Soviets 280  
Pavlov and the Americans 282  
Close-Up: Misportraying Pavlov’s Apparatus 283  
From the Miles Papers: Miles Meets Pavlov 284  
John B. Watson and the Founding of Behaviorism 285  
The Young Functionalist at Chicago 285  
The Watson–Carr Maze Studies 286  
Opportunity Knocks at Johns Hopkins 288  
Watson and Animal Behavior 288  
Watson’s Behaviorist Manifesto 289  
Watson’s APA Presidential Address 291  
Studying Emotional Development 291  
The Zenith and the Nadir of a Career: Little Albert 292  
A New Life in Advertising 295  
Popularizing Behaviorism 296  
Evaluating Watsonian Behaviorism 297  
In Perspective: Behaviorism’s Origins 299  
Study Questions 300

### CHAPTER 11  THE EVOLUTION OF BEHAVIORISM 302

Post-Watsonian Behaviorism 303  
Logical Positivism and Operationism 304  
Neobehaviorism 306  
One-Trial Learning 308  
Evaluating Guthrie 309  
Edward C. Tolman (1886–1959): A Purposive Behaviorism 310  
Tolman’s System 311  
Molar versus Molecular Behavior 311  
Goal-Directedness 312  
Intervening Variables 312  
From the Miles Papers: Miles and the Old Boys Network 314  
Tolman’s Research Program 314  
Latent Learning 315  
Cognitive Maps 316  
Evaluating Tolman 317  
Clark Hull (1884–1952): A Hypothetico-Deductive System 319  
Hull’s System 321  
Postulate 4: Habit Strength 322
CONTENTS vii

CHAPTER 12 MENTAL ILLNESS AND ITS TREATMENT 339

Early Treatment of the Mentally Ill 340
  The 19th-Century Asylum Movement 342
  Reforming Asylums: Dix and Beers 345

Close-Up: Diagnosing Mental Illness 346

Mesmerism and Hypnosis 347
  Mesmerism and Animal Magnetism 348
  From Mesmerism to Hypnosis 349

The Hypnotism Controversies 350

Sigmund Freud (1856–1939): Founding Psychoanalysis 352
  Early Life and Education 352
  Breuer and the Catharsis Method 354
  Creating Psychoanalysis 356
  The Importance of Sex 357
  Psychoanalysis Enters the 20th Century 358

The Evolution of Psychoanalytic Theory 358

Freud’s Followers: Loyalty and Dissent 360

Psychoanalysis in America 361

Evaluating Freud 362
  Contributions 363
  Criticisms 363

In Perspective: Treating Mental Illness 364

Summary 364

Study Questions 366

CHAPTER 13 PSYCHOLOGY’S PRACTITIONERS 367

The Medical Approach to Mental Illness 368

A Shock to the System: Fever, Insulin, Metrazol, and Electricity 369

Close-Up: Shell Shock 370

No Reversal: Lobotomy, Transorbital and Otherwise 371

Clinical Psychology before World War II 373

Lightner Witmer (1867–1956): Creating Psychology’s First Clinic 374

Clinical Psychology Between the World Wars 376

The Emergence of Modern Clinical Psychology 377

The Boulder Model 378

The Eysenck Study: Problems for Psychotherapy 379

Behavior Therapy 380

The Humanistic Approach to Psychotherapy 381
  Abraham Maslow and the Goal of Self-Actualization 381

Carl Rogers and Client-Centered Therapy 382

Evaluating Humanistic Psychology 385

The Vail Conference and the PsyD Degree 385

Psychology and the World of Business and Industry 387

The Hawthorne Studies 389

In Perspective: Psychology’s Practitioners 391

Summary 392

Study Questions 393

CHAPTER 14 PSYCHOLOGY’S RESEARCHERS 395

Cognitive Psychology Arrives (Again) 396

The Roots of Modern Cognitive Psychology 396

Frederick C. Bartlett (1886–1969): Constructing Memory 398

A Convergence of Influences 400

Influences within Psychology 400

Influences External to Psychology 401

Close-Up: What Revolution? 403

Magical Numbers, Selective Filters, and TOTE Units 404

Neisser and the “Naming” of Cognitive Psychology 407

The Evolution of Cognitive Psychology 408

Evaluating Cognitive Psychology 410

Other Research Areas 410

The Brain and Behavior 411

Karl Lashley (1890–1958) 411

From the Miles Papers: Miles Visits Lashley 413

Donald O. Hebb (1904–1985) 414

The Psychology of Perception 415
CONTENTS

James J. Gibson (1904–1979) 415
Eleanor Gibson (1910–2002) 417
Social Psychology 418
Leon Festinger (1919–1989) 419
Stanley Milgram (1933–1984) 421
Personality Psychology 423
Henry Murray (1893–1988) 423
Gordon Allport (1897–1967) 424
In Perspective: Psychology’s Researchers 426
Summary 427
Study Questions 428

CHAPTER 15  PSYCHOLOGY IN THE 21ST CENTURY  429

Researchers and Practitioners 429
The Growth and Diversity of Psychology 430
Women in Psychology’s History 431
Minorities in Psychology’s History 432

Trends in Modern Psychology 433
The Future: Psychology or Psychologies? 434
Summary 436
Study Questions 437
