Above-grade exterior walls, 219

Accessibility
“accessible unit”/“Accessible unit,” defined, 167
code data information for example project, 415
code data information template, 395–399
information for construction documents (Step 28), 337
scoping requirements, 160–161
specific building materials and equipment (Step 27), 331–332
Accessibility requirements (Step 20), 264–276
assembly seating (IBC Section 1108.2 and
ICC/ANSI A117.1 Section 802), 265,
265–267
dwelling and sleeping units (ICC/ANSI A117.1
Chapter 10), 268–269
example project, 270–276, 271, 272, 273, 274, 275
kitchens (IBC Section 1109.4 and ICC/ANSI A117.1
Section 804), 267
kitchens, in dwelling and sleeping units, 269
reach and clearance detail requirements,
264–265
recreational facilities, 269–270
Accessible means of egress. See Egress pathways (Step 10)

Accessible routes and requirements (Step 13),
158–171
accessible routes (IBC Section 1104 and ICC/ANSI
A117.1 Chapters 4 and 5), 161–166, 162, 163,
164
dwelling and sleeping units (IBC Section 1107 and
ICC/ANSI A117.1 Chapter 10), 166–167, 168
example project, 169–171, 170, 171
introduction, 158–160, 160
scoping requirements (IBC Section 1103),
160–161
toilet and bathing facilities (IBC Section 1109.2 and
ICC/ANSI A117.1 Chapter 6), 167–169
Access road design, fire department access roads,
153–157, 154, 155, 157
ADA Accessibility Guidelines (ADAAG), 159–160, 245
ADA and ABA Accessibility Guidelines, 2004, 159–160,
160
ADA Standards for Accessible Design, 2010 (ASAD), 117,
159
Additions, to existing buildings, 341, 343, 347
Adopted codes, obtaining list of, 20
Air and water management, 218–220
Air management (leakage and infiltration),
218–219
Air-borne sound transmission, 279
Aircraft-related occupancies buildings  
(IBC Section 412), 63–66
aircraft hangars (IBC Section 412.4), 64–65
aircraft manufacturing facilities (IBC Section 412.7), 65
aircraft paint hangars (IBC Section 412.6), 65
airport traffic control towers (IBC Section 412.3), 64
heliports and helistops (IBC Section 412.8), 65–66
manufacturing facilities, egress pathways, 122
residential aircraft hangars (IBC Section 412.5), 65
Aisles (IBC Sections 1018 and 1029), 125, 125–127, 127
calculation of aisle and aisle accessway widths, 256–257, 257–260
See also Egress pathways (Step 10)
Allowable area and height (IBC Section 504) (Step 7), 76–88
design options, 93–94
determining allowable area (IBC Section 506), 77–88, 78, 79, 81, 82, 83–84, 85–86, 86–88
determining allowable height (IBC Section 504), 76–77
element project, 95–98, 97
introduction to requirements, 75–76
special provisions (IBC Section 510), 88–93, 92
unlimited area buildings, 88, 89–90
Alterations, to existing buildings, 341, 343, 347
Alternative materials, design and methods of construction and equipment (IBC Section 104.11), 15
Ambulatory care facilities (IBC Section 422), 71
American Institute of Architects (AIA)  
construction documents, 338
Standard Form of Agreement Between Owner and Architect (Document B101–2007), 17

  integrating egress details, example project, 301–303, 302, 303
  points of egress (Step 9), 106–115, **109**, 110, 111, 112, 114, 115
  See also Egress pathways (Step 10); Egress widths (Step 19)
INDEX | 425

Egress details (Step 23), 297–303
  example project, 301–303, 302, 303
luminous markings, 300, 301
stairs, ramps, handrails, and guards, 297–299, 300
unenclosed exit access stairways and ramps, 299–300
Egress pathways (Step 10)
  accessible means of egress (IBC Section 1009), 135–137
  example project, 139, 139–141, 140, 141
  exit (IBC Section 1022), 130–133, 132, 133
  exit access (IBC Section 1016), 118–130, 119, 120, 121, 122, 124, 125, 127
  exit discharge (IBC Section 1028), 134–135
general requirements, 116–118
minimum egress pathway capacities, 137–139
Egress widths (Step 19), 250–263
calculation of aisle and aisle accessway widths, 256–257, 257–260
calculation of minimum egress width, 250–256, 251, 252, 253, 254, 255, 256, 257, 257–260
example project, 260–263, 262
See also Egress pathways (Step 10)
Elevators
  accessible means of egress, overview, 136
  accessible routes and requirements (ICC/ANSI A117.1 Sections 407, 408, 409), 164–165
  finishes for, 246
  fire service access, 284–
general requirements, 281–283, 282, 283
  glazing in, 309
  lobbies, 284
  machine rooms, 283–284
  occupant evacuation, 285
  pits and clearances, 283
Emergency escape and rescue, 280–281, 281
Enclosed parking garages (IBC Section 406.6), 59–60
Essential building data (Step 2), 21–30
  building area per story, 25
  building height in feet, 25, 25, 26
  climate zone, 28
  example project, 29–30
  flood hazard areas, 28–29
  number of stories, 22–25, 24, 25
  proposed construction materials, 28
  sprinkler system type, 26, 27
total building area, 21–22, 22, 23
Example project
  Step 1 (applicable building code), 20
  Step 2 (essential building data), 29–30
  Step 3 (occupancy group or groups), 37–38
  Step 4 (construction type based on anticipated materials), 41–42
  Step 5 (mixed uses and occupancies, handling), 48–49
  Step 6 (special use and occupancy), 74
  Step 7 (allowable area and height), 95–98, 97
  Step 8 (occupant load calculation), 104–105
  Step 9 (points of egress), 113–115, 114, 115
  Step 10 (egress pathways), 139, 139–141, 140, 141
  Step 11 (fixture counts), 150–152
  Step 12 (fire department access roads), 156–157, 157
  Step 13 (accessible routes and requirements), 169–171, 170, 171
  Step 14 (confirm Steps 2–13), 179–185, 180, 183
  Step 15 (fire-resistive construction, assemblies, and openings), 201–203, 204, 205, 206, 207
  Step 16 (exterior wall and exposed floor assemblies), 223–228, 224, 227, 228
  Step 17 (roof assemblies), 238–241, 239, 240
  Step 18 (finishes), 247–249
  Step 19 (egress widths), 260–263, 262
  Step 20 (accessibility requirements), 270–276, 271, 272, 273, 274, 275
  Step 21 (special requirements), 288–289
  Step 22 (confirm Steps 14–21), 296
  Step 23 (integrating egress details), 301–303, 302, 303
  Step 24 (safety glazing), 310
  Step 25 (firestopping, fire-resistant joints, fireproofing), 316–317
  Step 26 (portable fire extinguishers and cabinets), 322–326, 324, 325, 326
  Step 27 (building materials/equipment), 332
  Step 28 (code data information), 338, 400–415
Existing buildings, 339–352
  applying step-by-step process to, 349–352
  compliance methods, 342–348, 346
overview, 339
types of work, 341

(IBC Section 406)
General code information
code data information for example project, 400–401
code data information template, 370–371
for construction documents, 336
General Services Administration (GSA), 159
Glass replacement, existing buildings, 344
Glazing. See Safety glazing
Grade plane, 24, 24, 25
Grain processing. See Combustible dusts, grain processing, and storage (IBC Section 426)
Group I-2 occupancies (IBC Section 407), 61
Group I-3 occupancies (IBC Section 408), 61–62
Groups H-1, H-2, H-3, H-4, and H-5 occupancies (IBC Section 415), 67–68, 68
Groups I-1, R-1, R-2, R-3, and R-4 (IBC Section 420), 70
Guards
  egress details, 299, 300
  glazed, 307–308
  roof hatches, guards for, 236
  rooftop equipment, guards for, 236
Gypsum (board), code requirement, 330–331

H
Handrails
  alterations, existing buildings, 344
  clear width within accessible means of egress stairways, 135–136
  egress details, 298–299
  projection into egress width, 117, 251–252, 252
Hangars, for aircraft. See Aircraft-related occupancies buildings (IBC Section 412)
Hazardous materials (IBC Section 414), 66–67
Heat-strengthened glass, defined, 310
Height, building
  building height in feet, essential building data (Step 2), 25, 25, 26
  code data information for example project, 401
  code data information template, 372–373, 378
  information for construction documents, 336
  See also Allowable area and height (IBC Section 504) (Step 7); Stories
Heliports/helistops (IBC Section 412.8), 65–66
High-Hazard occupancy (IBC Section 307), 31, 33–34
High-rise buildings
  additional stairway, where required, 107
  luminous markings, 300–301
  occupant evacuation elevator substitution for additional stairway, 285
  overview, 52–54, 53, 54
  special requirements, 278
Historic buildings, changes to, 341, 345, 347
Hoistways. See Elevators
Horizontal assemblies, 197–198, 198
  opening protection, 201
  overview, 10
  penetrations in (IBC Section 714.4), 313–314
  roof opening fire resistance, 234
  special provisions, 90–93, 92
Horizontal building separation allowance (IBC Section 510.2), 88–91, 92
Horizontal exits (IBC Section 1026), 131–133, 132, 133
Hyperbaric facilities (IBC Section 425), 72
Hydrogen fuel gas rooms (IBC Section 421), 70–71

I
Incidental uses (IBC Section 509), 36–37
Inspectors, 359–360, 360
Institutional occupancy (IBC Section 308), 31, 34–35
Insulation
  fire propagation of, 221–223
  roof, 238
  thermal performance for roofs, 231–233, 232, 233
  thermal performance for walls and exposed floors, 214–217
Interior bearing walls, fire-resistive assemblies and construction, 11, 198–199
Interior finishes
  floor, 244–246
  wall and ceiling, 243–244
  See also Finishes (Step 18)
International Building Code (IBC)
  code alternatives and, 20
  defined, 1
  See also Code basics; Code data information for example project; Code data information template; Code enforcement; individual IBC section descriptions
International Code Council (ICC), 4
International Energy Conservation Code (IECC)
  climate zone data, 21, 28
  construction documents information, 334–335
  defined, 5
  solar reflectance and thermal emittance for roofs, 237
  thermal performance, exterior walls and exposed floor assemblies, 213–219
thermal performance, roof assemblies, 231–233
See also Exterior wall and exposed floor assemblies
(Step 16), Roof assemblies (Step 17)

International Existing Building Code (IEBC)
application of the, 339–352
code alternate, 20
defined, 5

International Fire Code (IFC)
access roads, 153–156
allowable area based on fire flow, 76
combustible dusts, grain processing, and storage, 72–73
defined, 5
Group H, 67
hazardous materials, 66–67
motor fuel-dispensing facilities, 60
portable fire extinguishers, 318–320

International Mechanical Code (IMC)
combustible dust, grain processing, and storage
ventilation, 72
defined, 5
flammable finish ventilation, 69
parking garage ventilation, 59, 61

International Plumbing Code (IPC)
defined, 5
determining fixture counts, 143, 148, 149, 150 (See also Fixture counts (Step 11))
developing roof assemblies (roof drains), 229

International Residential Code (IRC)
care facilities, alternative, 36
code alternate, 20
defined, 5

J
Jails. See Group I-3 occupancies (IBC Section 408)

K
Kitchens
accessibility requirements (IBC Section 1109.4 and ICC/ANSI A117.1 Section 804), 267
accessibility requirements in dwelling and sleeping units, 269

L
Laminated glass, defined, 305
Live/work units
IRC code alternate, 20
special use and occupancy, 69–70
Location on site, changing, 179, 295
Luminous markings, 300, 301

M
Machine rooms. See Elevators
Mall buildings
calculating occupant load, 101–103, 102–103
egress pathways, 121
open and covered (IBC Section 402), 51, 51–52
plumbing fixture access and location, 144
Manufacturing (aircraft) facilities (IBC Section 412.7), 65
Masonry, code requirement, 328–329
Means of Egress. See Egress
Medical care. See Group I-2 occupancies (IBC Section 407)
Membrane structures (IBC Section 3102), 73–74
Mercantile occupancy (IBC Section 309), 31, 34–35
Mezzanines, 25
accessible means of egress from, 135
accessible route, 161
building area, exclusion from, 22
Mixed uses and occupancies, handling (Step 5), 43–49
accessory occupancies, 45
allowable height for, 77 (See also Height)
combination of options, 45–47, 46, 47
example project, 48–49
introduction to mixed occupancies, 43–44
methods, 47–48
nonseparated occupancies, 44–45, 45
overview, 43
plumbing fixture count calculations, 147–148
separated occupancies, 44, 44
See also Allowable area and height (IBC Section 504) (Step 7); Egress
Modifications, to building codes, 15
Moisture/mold resistance, wall and ceiling finishes, 244
Motion picture projection rooms (IBC Section 409), 62
Motor fuel-dispensing facilities (IBC Section 406.7), 60
Motor-vehicle-related occupancies (IBC Section 406), 57–61
enclosed parking garages (IBC Section 406.6), 59–60
motor fuel-dispensing facilities (IBC Section 406.7), 60, 60,
open parking garages (IBC Section 406.5), 58,
58–59, 59
private garages and carports (IBC Section 406.3), 57
public parking garages (IBC Section 406.4), 57
repair garages (IBC Section 406.8), 60–61
Multi-wythe (masonry), defined, 328

N
National Fire Protection Association (NFPA)
automatic-fire extinguishing systems and
standpipes (NFPA 13, IBC Section 903.3), 12–14
codes, 6
references, 418
National Roofing Contractors Association (NRCA), 229
Nonseparated occupancies
defined, 44–45, 45
handling mixed uses and occupancies (Step 5), 43–49
See also Allowable area and height (IBC Section 504)
(Step 7)

O
Occupancy change, to existing buildings, 341, 344
Occupancy group or groups (Step 3), 31–38
Assembly Group A (IBC Section 303), 32
Business Group B (IBC Section 304), 32
Educational Group E (IBC Section 305), 33
example project, 37–38
Factory Group F (IBC Section 306), 33
High-Hazard Group H (IBC Section 307), 33–34
Incidental Uses (IBC Section 509), 36–37
Institutional Group I (IBC Section 308), 34–35
introduction to, 32
Mercantile Group M (IBC Section 309), 34–35
overview, 31
Residential Group R (IBC Section 310), 35–36
Storage Group S (IBC Section 311), 36
Utility and Miscellaneous Group U (IBC Section 312), 36
Occupant evacuation elevators, 285
Occupant load calculation (Step 8), 99–105
accessible routes and requirements (Step 13), 163
calculating, 100–103, 101
example project, 104–105
introduction, 99–100
occupant load for plumbing fixtures, 143, 143–144
organizing data for, 104
Open mall buildings (IBC Section 402), 51, 51–52. See also Mall buildings
Open parking garages (IBC Section 406.5), 58, 58–59, 59
Openings
evacuation and rescue, 280–281, 281
hoistway, 284
open parking garages, 58, 58–59, 59
overview, in fire-resistance assemblies and
construction, 9–11
protection of, in exterior walls, 208–213, 210–213
protection of, in fire-resistive construction and
assemblies, 199–201, 200
roof, 234–236, 235
Organic coatings (IBC Section 418), 69

P
Parking spaces, accessible routes and requirements
(ICC/ANSI A117.1 Section 502), 166
Passenger load zones, accessible routes and
requirements (ICC/ANSI A117.1 Section 503), 166
Pedestrian walkways and tunnels (IBC Section 3104), 74
special requirements, integrating, 287–288
travel distance within, 123
Penetrations, fire-resistant rated assemblies
(IBC Section 714), 311–314
Plan reviews, 361–362
Plans examiners, 358–359, 359
Plaster, code requirement, 330–331
Platform lifts
  accessible routes and requirements (ICC/ANSI A117.1 Section 410), 165–166
  IBC Section 1009.5, overview, 137
Platforms (IBC Section 410.4), 63
Plumbing fixtures. See Fixture counts (Step 11)
Points of egress (Step 9), 106–115
  door operation, 112–113
  example project, 113–115, 114, 115
  introduction to means of egress system, 106–107
  number of egress doors, 107–109, 109
  separation of exit and exit access doorways, 110, 110–112, 111, 112
Pools, accessibility requirements, 269–270
Portable fire extinguishers and cabinets (Step 26), 318–326
  example project, 322–323, 324, 325, 326
  fire extinguisher requirements overview (IBC Section 906), 318–319
  fire extinguisher selection, 319, 319
  location and installation, 320–321, 321, 322
  number of required fire extinguishers, 320
Prisons. See Group I-3 occupancies (IBC Section 408)
Private garages and carports (IBC Section 406.3), 57
Privatized student housing, architectural program for (example project), 367–369
Projections, 213
Public parking garages (IBC Section 406.4), 57–59

Q
Quality assurance (QA), defined, 363, 364
Quality control (QC), defined, 363, 364

R
Rainscreen system, defined, 222
Ramps
  accessible routes and requirements (ICC/ANSI A117.1 Sections 405 and 406), 164
  exit access stairways and ramps (IBC Section 1019), 127–128
  exterior exit stairways and ramps (IBC Section 1027), 133
  integrating egress details for ramps (IBC Section 1012), 298
  integrating egress details for unenclosed exit access stairways and ramps, 299–300
See also Egress pathways (Step 10)
Recreational facilities, accessibility requirements, 269–270
Repair garages (IBC Section 406.8), 60–61
Repairs, to existing buildings, 341, 346
Residential aircraft hangars (IBC Section 412.5), 65
Residential occupancy (IBC Section 310), 31, 35–36
Residential thermal performance
  exterior wall and exposed floor assemblies, 216–218
  roof assemblies, 233
  restricted access facilities. See Group I-3 occupancies (IBC Section 408)
Roof assemblies (Step 17), 229–241
  changing, 295–296
  example project, 238–241, 239, 240
  fire classification and resistance, 230
  roof assembly performance, overview, 229–230
  roof construction materials, 236–238
  roof hatches, 236
  roof openings and penetrations, 234–236, 235
  rooftop structures and equipment, 236
  skylights, 234–235
  thermal performance, 231–233, 232, 233
  wind resistance, 230–231
R-value, 215, 216–217

S
Safety glazing (Step 24), 304–310
  example project, 310
  introduction, 304–305
  sloped glazing assemblies, 310
Sanitation
  wall and ceiling finishes, 244
  floor finishes, 245
Schematic design, 17–171
  accessible routes and requirements (Step 13), 158–171
  allowable area and height (Step 7), 75–98
Schematic design, (Continued)
  applicable building code (Step 1), 19–20
  confirming schematic design steps (Step 14), 175–185
  construction type based on anticipated materials (Step 4), 39–42
  egress pathways (Step 10), 116–141
  essential building data (Step 2), 21–30
  existing buildings and applying step-by-step process, 349–351
  fire department access roads (Step 12), 153–157
  fixture counts (Step 11), 142–152
  mixed uses and occupancies, handling (Step 5), 43–49
  occupancy group or groups (Step 3), 31–38
  occupant load calculation (Step 8), 99–105
  overview, 17
  points of egress (Step 9), 106–115
  special use and occupancy (Step 6), 50–74
Seating, accessibility requirements (IBC Section 1108.2 and ICC/ANSI A117.1 Section 802), 265, 265–267
Separated occupancies
  defined, 44, 44
  handling mixed uses and occupancies (Step 5), 43–49
  See also Allowable area and height (IBC Section 504) (Step 7)
Single-wythe (masonry), defined, 328
Size of space, changing, 176–178, 294
Skylights, 234–235
Slip resistance, floor finishes, 245
Sloped glazing assemblies, 310
Smoke barriers, 194, 197
  horizontal assemblies as, 314
  opening protection, 201
  overview, 10
  penetrations, 312–313
Smoke development. See Flame and smoke performance
Smoke partitions, 196–197, 197
  opening protection, 201
  overview, 10
Sound transmission, 277–279
Space arrangement, changing, 178–179, 294
Spandrel, defined, 305
Special amusement buildings
  egress pathways, 122
  overview, 63
Special construction (special use and occupancy)
  membrane structures (IBC Section 3102), 73–74
  pedestrian walkways and tunnels (IBC Section 3104), 74
Special inspections (IBC Sections 1705.14, 1705.15, 1705.17) for firestopping, fire-resistive joints, and fireproofing, 316
Special requirements for drawing information
  code data information template, 371–372
  information for construction documents, 336
Special requirements (Step 21), 277–289, 278
  elevators and conveying systems, 281–286, 282, 283
  emergency escape and rescue, 280–281, 281
  example project, 288–289
  flood-resistant design, 286–287
  sound transmission, 277–279
  special construction, 287–288
  special uses and occupancies, 277
Special use and occupancy (Step 6), 50–74
  aircraft-related occupancies buildings (IBC Section 412), 63–66
  ambulatory care facilities (IBC Section 422), 71
  application of flammable finishes (IBC Section 416), 68–69
  atriums (IBC Section 404), 55, 55
  children’s play structures (IBC Section 424), 71–72
  combustible dusts, grain processing, and storage (IBC Section 426), 72–73
  combustible storage (IBC Section 413), 66
  covered mall and open mall buildings (IBC Section 402), 51, 51–52
  drying rooms (IBC Section 417), 69
  example project, 74
  Group I-2 occupancies (IBC Section 407), 61
  Group I-3 occupancies (IBC Section 408), 61–62
  Groups H-1, H-2, H-3, H-4, and H-5 occupancies (IBC Section 415), 67–68, 68
  Groups L-1, R-1, R-2, R-3, and R-4 (IBC Section 420), 70
  hazardous materials (IBC Section 414), 66–67
high-rise buildings (IBC Section 403), 52–54, 53, 54
hyberbaric facilities (IBC Section 425), 72
hydrogen fuel gas rooms (IBC Section 421),
  70–71
live/work units (IBC Section 419), 69–70
motion picture projection rooms (IBC Section 409),
  62
motor-vehicle-related occupancies (IBC Section
  406), 57–61, 58, 59, 60
organic coatings (IBC Section 418), 69
overview, 50–51
special amusement buildings (IBC Section 411), 63
special construction, 73–74
stages, platforms, technical production areas
  (IBC Section 410), 62–63
storm shelters (IBC Section 423), 71
underground buildings (IBC Section 405), 56,
  56–57
Sprinkler systems. See Automatic fire-extinguishing
  systems and standpipes
Stages, platforms, technical production areas
  (IBC Section 410)
  platforms (IBC Section 410.4), 63
  stages (IBC Section 410.3), 62–63
Stairs/stairways
  accessible means of egress (IBC Section 1009.3),
    135–136
  exit access stairways and ramps (IBC Section 1019),
    127–128
  exterior exit stairways and ramps (IBC Section
    1027), 133
  integrating egress details for stairs (IBC Section
    1011), 297–298
  integrating egress details for unenclosed exit access
    stairways and ramps, 299–300
  interior exit stairways and ramps (IBC Section 1023),
    130–131
  minimum egress pathway capacities, 137
See also Egress pathways (Step 10)
Statutory AHJ, 356
Steel, code requirement, 329–330
Storage occupancy (IBC Section 311), 31, 36
Stories
  exit width from, 253, 253–254, 254, 255
  number of (essential building data), 22–25, 24, 25
See also Allowable area and height (IBC Section 504)
  (Step 7); Occupant load calculation (Step 8)
Storm shelters (IBC Section 423), 71
Structural frame, fire-resistive assemblies and
  construction, 11, 198–199
Structural materials, changing, 178, 294–295
Structure-borne sound transmission, 279
Student housing, architectural program (example
  project), 367–369
Submittal documents overview (IBC Section 107 and
  IECC Section C103), 333–335

T
Thermal performance
  exterior wall and exposed floor assemblies, 213–218
  roof assemblies, 231–233, 232, 233
Titles I, II, III, IV, V (Americans with Disabilities Act), 158
Toilet and bathing facilities
  accessibility requirements for dwelling and sleeping
    units, 268–269
  accessible routes and requirements for (IBC Section
    1109.2 and ICC/ANSI A117.1 Chapter 6),
    167–169
  planning, 149–152
Travel distance, for exits. See Egress pathways (Step 10)
Trim, selecting finishes for, 246–247
Type I, II, III, IV, V construction, 40–41

U
U-factor, 215–216, 217–218
Uncounterweighted elevator, defined, 283
Underground buildings (IBC Section 405), 56, 56–57
Underlayments, roof, 238
Uniform Drawing System (UDS) (CSI), 201, 337
Uniform Federal Accessibility Standards (UFAS), 159
Unlimited area buildings (IBC Section 507), 88, 89–90
U.S. Department of Defense (DOD), 159
U.S. Department of Housing and Urban Development
  (HUD), 159
U.S. Department of Justice (DOJ), 158–160
U.S. Department of Transportation (USDOT), 159
U.S. Postal Service (USPS), 159
Utility and Miscellaneous occupancy (IBC Section 312),
  31, 36
W
Wall assemblies, changing, 295–296
Wall finishes, interior, 243–244
Water management, 219–220
Wet floodproofing
  defined, 287
  flood-resistant design, 286–287
Wheelchair spaces, seating and, 265–267
Window replacement, existing buildings, 344
Window wells for below-grade openings, 280–281
Wind resistance, roof assemblies, 230–231
Wired glass, 309
Wood, code requirement, 330
