### Subject Index

**A**
- Ability traits, 53
- Academic achievement, 66
- Accessibility, 382
- chronic, 416–17
- Activating links. See Excitatory links
- Active ingredients, 424
- Activity, 102, 331
- Act trends, 67
- Actual/ideal discrepancies, 327
- Actual/ought discrepancies, 327
- Actual self, 324
- Adaptation, personal, 17–18
- Adaptive unconscious, 199–202
- repressed memory debate, 200–201
- self-disclosure, 201–2
- Adjective scales, 24
- Adlerian psychology, 218–20
- Adolescence, struggle for identity versus role confusion in, 224–25
- Adults
  - attachment in relationships, 231–33
  - sex differences, 477
- Affects, 362
- Agentic person, 356
- Aggression
  - construct of, 31–32
  - defined, 31
  - rejection sensitivity and, 419–19
  - twin studies and, 105
  - unexpected, 12–18
- Agreedness, in Big Five Structure, 60
- Akraia, 438
- Allides, 120
- Allport's functional autonomy, 300
- Allport's trait theories, 49–51
- Altruism, 141–44
- reciprocal, 144
  - twin studies and, 105
- Ambivalence, 247
- Ambivalent relationship, 224
- Anorexia, 327
- Anterior attentional system, 444
- Antidepressant medication, 138
- Antipsychotic medication, 138–39
- Antisocial personality, testosterone and, 134
- Anxiety, 399
  - behavioral checklist for, 273
- Appetitive dilemmas. See Approach dilemmas
- Applicability, 383
- Approach-approach conflict, 251
- Approach-avoidance tendencies, 247, 251
- Approach dilemmas
  - cooling strategies, 448–51
  - delay of gratification ability, 447–48
  - interacting influences, 453
  - life-span implications of self-regulatory competence, 451–53
  - self-regulation in, 447–53
- Approach tendencies, 247
- Archetypes, 216
- Anxiety
  - level of, 127
  - optimal level of, 127, 133
  - ascending reticular activation system (ARAS), 127
  - Assertiveness training, 372
  - Assessment, personality, 366–71
  - Ativan, 139
  - Attachment, 229–36
  - in adult relationships, 231–33
  - insecure-ambivalent, 230
  - insecure-avoidant, 230
  - securely attached babies and, 230
  - theory, 229–30
- Attention
  - center, 460–61
  - centered scale, 445
  - directing, 381–82
  - flexible, 450–51
  - selective, 392–4
- Attributes, 104
- Attributes, human, taxonomy of, 57–61
- Attribution, causal, 392–94
- Automaticity, 442–43
- Automatic processing, 199, 421
- Autonomy
  - Allport's functional, 300
  - seven shame and doubt stage, 223
- Availability, 382

*COPYRIGHTED MATERIAL*
Aversion therapy, 283
Aversion dilemmas. See Avoidance dilemmas
Aversion stimulation, 266
Avoidance, 206
Avoidance-avoidance conflicts, 251
Avoidance dilemmas
- cognitive appraisal of stress, 454
- cognitive transformations in, 455–57
- hot and cool systems, interaction of, 457–63
- negative feelings, hiding, 454–55
- self-regulation in, 454–63
Avoidant relationship, 224

Bandura’s social learning theory, 352–57
Basic traits, 56
Beck’s cognitive therapy, 374–75
- steps in, 374–75
Befriending, 480
Behavior
- analysis and modification, 270–91
- changing, 284–90
- conditioned aversion, 283
- conditions controlling, 275–79
- consequences of, 289
- differences in types, 411
- direct measurement, 272–75
- effective rewards for, 274–75
- patterns, 317
- personality, changing, 289–90
- sampling, 272–74
- self-efficacy and, 357
- shaping, 26
- social, 350, 352
- symptoms as, 175
- symptom substitution, 288
- Behavioral activation system (BAS), 128, 432
- behavioral experiences and, 130
- personality traits and, 129–31
- Behavioral assessments
- characteristics of, 271–84
- emotional reactions, changing, 270–84
- Behavioral checklist, 273
- integration in personality system, 413
- self-regulation and, 440
- Behavioral deficits, 286
- Behavioral inhibition system (BIS), 128, 432
- emotional experiences and, 130
- personality traits and, 129–31
- Behavioral signatures, 79–80
- of narcissists, 420
- of personality, 366, 411–12
- Behavioral tendencies, dispositions as, 89
- Behavioral theories, 245–68
- in Dollard and Miller’s approach to psychodynamics, 246–47
- existentialism and, 321
- Behavior genetics, 95
- Behavior-outcome relations, 361
- Behavior sampling, 24–26
- remote, 26
- Benzodiazepines, 139
- Between-culture variability, 467
- Bias, self-enhancing, 394
- Big Five Structure, 60, 100–101, 141
- facet scales for, 61
- mapping cultural differences with, 467
- predicting life outcomes with, 467
- stability of, 61, 62–65
- trait dimensions, 59, 60
- usefulness of, 61–62
- Big Picture theory, 4–5
- Biological level, 8, 9, 14–15, 93–94, 406
- assessment and change and, 135–39
- control in, 443–44
- integration in personality system, 412
- neuroticism, 132
- self-regulation and, 440
- sensation seeking and, 132–35
- Biological preparedness, 145
- Biological restiches, 96–100
- Biological therapies, 137–39
- antidepressants, 138
- antipsychotics, 138–39
- tranquilizers, 139
- Blunting styles, 204–5
- Brain
- amygdala, 136–37
- asymmetry, 128–32
- emotional reactivity and, 128–29
- emotional versus rational, 457–59
- evolution and personality, 124–46
- imaging, 135–36
- level of arousal, 127
- mechanisms and effortful control, 444
- personality links, 124–35
- role of, 487–88
- stress and, 121–22
- Brain imaging, 338
- electrocardiogram (EKG), 26
- electroencephalograph (EEG), 27
- fMRI, 27
- gabaic skin response (GSR), 27
- physiological functioning, 26–28
- plethysmograph, 27
- polygraph, 26
- positron emission tomography (PET), 27
- Breast self-examination, 426–28
- Broad traits, 411
- Cardinal traits, 51
- Case study, of text
- alternative psychodynamic interpretations in, 194
- behavioral signatures in, 79–80
- controlling anxiety, 271–72
- functional analysis, 278–79
- hyperactivity, 284–86
- personal constructs in, 314, 315–16
- psychodynamic clinical inference in, 183–84
- self-description, 20
- Thematic Apperception Test and, 182
- Castration anxiety, 172
- Categorization, 390
- Cattell’s trait theories, 51–53
- Central traits, 51
- Change
- perceived stability of self and, 396–87
- potential for, 487–88
- self-directed, 463
- self-regulation for, 434–35
- well-being and, 339–43
- Cheater detector, 145
- Children
- helpless versus mastery-oriented, 397–98
Delay of gratification ability, 447–48
goal-directed, 447–48
Denial, 166
Dependent variables, 38
Depression
biology and environmental stress in, 120
as insufficient reinforcement, 287
pessimistic explanatory styles, 394–95
rejection sensitivity and, 419
Deposition, conditions of, 249
Desensitization, 279–83
steps in, 281
systematic, 280
Diagnostic council, 185
Direct behavior measurement, 272–75
Directional selection, 141
Direct self-report measures, 37
Discrimination training, 263
Discriminative facility, 146, 450
Discriminative stimuli, 263
Displacement, 167
Dispositions
as behavioral tendencies, 89
consistency and, 73–75
culturally specific personality, 474
expressions of, 72–87
personality, 418
person versus situation debate, 74–75
rejection sensitivity, 418
Distortion, 167
Dizygotic (DZ) twins, 100
DNA (deoxyribonucleotides), 96
as blueprint, 97
differences in, 98
environment interactions, 97–98
Domain of interpersonal behavior, 59
Domain specificity, 145
Double-blind experiment, 38–39
Down syndrome, 117
Emotions
causal attributions influencing, 392–94
cultural differences in meaning of, 470
negative, 454
perceived control and predictability, 394
pride and shame, 393–94
social, 461–62
in stress, 458
Empathic mirroring, 234
Endomorph, 125
Error variance, 75
Ethics, in research, 39–40
Evaluation, organismic, 308
Evaluative (good-bad) factor, 331
Evolution
personality and, 142–44
social emotions and, 461–62
Evolutionary theory
biological preparedness and, 145
constraints on learning, 144–45
personality and, 139–46
psychological mechanisms and, 145–46
Excitatory links, 415
Executive function (EF), 444
Existential anxiety, 304
Existentialism, 299
behavior theory and, 321
phenomenology and, 303–4
Experimental groups, 38
Experimental research, 37–39
control groups, 38
double-blind designs, 38–39
groups, 38
Explicit motives, 190–91
Exploration in Personality (Murray et al.), 184, 185
Extinction, 251
schedule, 287
Extroversion
in Big Five Structure, 60
biological bases of, 125–28
Eysenck's trait theories, 53–55
Factor analysis, 59
limitations of, 67
False memories, 200–201
Family
environment, 111
nonshared environmental influences on, 112–13
therapies, 337
Feeling, in experiencing world, 217
Field theory, 300
Fight or flight reactions, 458
sex differences in, 479–80
Fiction, 172–73
Flexible attention, 450–51
Focus prevention, 431
promotion, 431
Foraging gene, 99
Fixation, 172–73
Flexible attention, 450–51
Focus prevention, 431
promotion, 431
Foraging gene, 99
Fight or flight reactions, 458
sexual differences in, 479–80
Focus, medication for, 443
Freudian psychodynamic theories, 155–76
behavioral signs in, 168
on conflict and anxiety, 164–66
dreams in, 159, 160
free association in, 158
of identification, 173
impact of, 174–75
on neurosis, 167–70
on personality development, 170–72
unconscious mental determinism and, 157–58
Frommian psychology, 220–21
Functional analysis, 276–79
Functional autonomy, 300
Functional magnetic resonance imaging (fMRI), 27, 135
Fundamental attribution error, 74–75
Galvanic skin response (GSR), 27
Gene, 98
Foraging, 99
influence on environment, 115–16
social environments and, 121
Gene-behavior connections, 117–18
Down syndrome, 117
PKU, 117
Gene-environment interaction, 99, 110–22
unique psychological environment, 111–13
Generalization, 263
Generalized conditioned reinforcers, 274
Generalized reinforcements, 263
Generativity versus self-absorption/stagnation, 225–26
Genetics
abnormalities, effects of, 117
behavior, 95
role of, 497
Genital stage, of development, 172
Gestalt therapy, 333
Glucocorticoids (GC), 121
Goal gradients, 247
Goal pursuit
goal hierarchies, 441–42
life tasks, 441
personal, 441
self-regulatory processes in, 441–47
standards and self-evaluation, 442
Goals, 362–63
subordinate, 441
superordinate, 441
Good-bad factor. See Evaluative (good-bad) factor
Good-bad splitting, 228
Group experiences, 334–35
human-relations training, 334
sensitivity training, 334
