oscilloscope, 655
rate, 306
Saturation current of diode junction, 431
Saturation region
of BJT, 431
of MOS, 415
Sawtooth, 612, 624
Second Harmonic Distortion (HD2), 253
Secondary battery, 615
Secondary coil, 573
Segmentation, 313, 316
Selection network in capacitor-based DACs, 312
Selective protection, 403
Sense amplifier, 387
Sensitivity, 162, 227, 280
Sensor, 11
Sequential circuit, 358, 514
SerDes, 351
Serializer, 351
Series linear regulator, 583
Series–series feedback, 551
Series–shunt feedback, 551
Set–Reset NAND (S–R NAND), 514
Set–Reset NOR (S–R NOR), 514
Shift and add, 370
Shift register, 232
Shockley diode equation, 396
Shunt–series feedback, 551
Shunt–shunt feedback, 551
Shutdown, 254
Signal
bus, 230
coding, 64
correlation, 227
integrity, 652
processing, 127, 181
synchronization, 189
Signal-to-Noise plus Distortion Ratio (SNDR), 86
Signal-to-Noise Ratio (SNR), 86, 87, 129
and number of bits, 301
of data converter, 299
Simplex, 350
Sine wave, 38, 144
Single pole frequency response, 453
Single shot pulse, 624
Single-pole model, 276
Sleep mode, 621
Slew-rate, 189, 250, 277
Slope discontinuity, 548
Small signal
π-model, 463
circuit, 255
equivalent circuit diode, 398
equivalent circuit of cells, 446
equivalent circuit of CMOS inverter, 452
gain (A_v), 449
Small-Scale Integration (SSI), 229
Small-signal analysis of BJT inverter, 462
equivalent circuit of BJT, 434
Snapshot, 653
Software-defined radio, 122
Software-programmable hardware, 229
Solar cell, 618
Solar irradiation, 618
Solder joints, 239
Soldering temperature, 245
Source, 411
Source follower, 471
output resistance, 475
small-signal equivalent circuit, 473
Specific energy, 615, 617
Specifications, 33
Spectrum analyzer, 657
Spice, 24
Spur rejection, 303
Spurious Free Dynamic Range (SFDR), 301
Square wave
  multiplication, 223
  spectrum, 225
Stability
  control, 540
  of feedback schemes, 559
  robustness, 559
Standard cell design, 378
State machine, 358
Static
  input–output transfer characteristic, 449
  power, 441
  sensitivity of comparator, 286
Static Random-Access Memory (SRAM), 378, 385
Steady-state condition, 603
Step signal, 42
Stopband of anti-aliasing filter, 303
Storage temperature, 245
Strain gauge, 295
  sensor, 359
Strip-line, 354
Strobe, 223
Sub-threshold region, 415
Subscriber Line Interface Circuit (SLIC), 104
Sum-of-Products (SoP), 502
Super-β transistor, 433
Superposition principle, 189, 208, 227, 261, 262
Supply voltage of op-amp, 246
Surface mounting, 254
Swept Spectrum Analyzer (SSA), 657
Switch leakage, 226
Switched capacitor, 225
  parasitic capacitance, 226
  regulator, 595
Switching regulator, 581, 604
Switching time, 285
Switching transient, 632
Symbol, 347
Symbol of BJT, 426
Synchronization, 351
Synchronous
  circuit, 230
  operation, 355
Synchronous Random-Access Memory (SDRAM), 385
System-in-Package (SiP), 6, 7
Systematic offset, 194

T-small signal model, 434
Tank oscillator, 634
Tantalum capacitor, 600
Tapered inverter, 535, 613
Teamwork, 19, 20
Temperature
  coefficient, 207
  dependent time constant, 268
  drift, 586
  sensor, 621
Testing, 16, 624
Thévenin transformation, 185
Thermal
  diffusion, 406
  shutdown, 593
  transfer capability, 595
Thermocouples, 651
Thermometric decoder, 314
Third Harmonic Distortion (HD3), 253
Threshold, 222
  detection, 284
  voltage, 397, 414
Through the hole, 254
Time constant, 138, 163, 457
Time constant accuracy, 267
Time domain, 45
Toggle operation, 519
Token, 374
Total Harmonic Distortion (THD)
  in data converters, 301
Trade-off, 620
Transconductance
  current, 283
  gain, 280, 587
  gain of BJT, 435
  gain of MOS, 420
Transconductor, 552
Transducer, 11
Transfer function, 147, 168, 203
Transfer gain, 542
Transistor Transfer Logic (TTL), 188
Transmitter, 350
Transresistance, 464, 553
Tree of switches, 307
Tri-state logic, 534
Triboelectricity, 191
Trigger control, 653
Trimming, 77
Triode region of MOS, 415
Truth table, 363, 498, 532
Tuning range, 637
Turn-on time, 576
Two tones, 39
Two’s complement, 365
Two-port equivalent, 459
Two-tone signals, 82

Ultra Large-Scale Integration (USI), 229
UMOS, 443
Unary scheme, 315
Uncorrelated errors, 267
Unity gain, 213
  buffer, 265
  frequency, 250
Unity resistor, 309
Up-counter, 230
Variable clock generator, 596
INDEX

Variance, 37, 244
Varicap (or varactor), 401, 636
Vector diagram, 146
Vector Signal Analyzer (VSA), 657
Vertical Metal–Oxide–Silicon (VMOS), 442
Very Large-Scale Integration (VLSI), 229
Video application, 302
Video compression, 175
Virtual ground, 209
Virtual instrument, 649
Virtual short circuit, 213, 257, 261
Voltage
  amplifier with OTA, 280
  boost, 390, 593
  coefficient, 207
  Controlled Oscillator (VCO), 596, 636
  decoupling interface, 265
  gain of BJT inverter, 464
  headroom, 591
  midpoint, 523
  rectifier, 572
  reference, 492
  regulator, 581
  ripple, 579
  sensing for memory, 389
  to current conversion, 282
Voltage-Controlled Voltage Source (VCVS), 255, 260
Voltage-to-current scheme converter, 209
Von Neumann architecture, 360

Wake-up
  mode, 621
  time, 254
Walter Brattain, 394
Weighted addition of signal, 264
Wien-bridge oscillator, 629
William Shockley, 394
Windowing, 70
Wireless communication, 295
Word-length, 230, 350
Worst case, 32

XNOR gate, 497
XOR gate, 497

Yield, 240

z-transformations, 31
Zener
  mechanism, 402
  regulator, 581
Zero in the right-hand half s-plane, 469
Zero logic, 348
