# Contents

*Preface*  

**Chapter 1**  
**Introduction**  
1.1 Magic bullets  
1.2 Background to modern pharmacology  
  1.2.1 The receptor theory  
  1.2.2 Molecular pharmacology  
  1.2.3 Receptors, signals and enzymes  
  1.2.4 Recombinant DNA technology and target discovery  
1.3 Drug and therapeutic targets in the biomedical literature  
1.4 How many drug targets are there?  
  1.4.1 Systematic target discovery  
1.5 Screening for active molecules  
References  

**Chapter 2**  
**Overview of the drug target compendium**  
2.1 Introductory comments  
2.2 Selection of entries  
  2.2.1 Gene name and symbol  
  2.2.2 Drug/investigational compound name  
  2.2.3 Literature reference  
  2.2.4 Involvement in disease  
2.3 Organization of entries  
  2.3.1 Cell surface and secreted proteins  
  2.3.2 Enzymes  
  2.3.3 Entries classified by subcellular location  
  2.3.4 Non-coding RNAs  
2.4 Summary of data entries  
2.5 How to use this book  
2.6 Final comments  
References  

**Chapter 3**  
**Cell surface and secreted proteins**  
3.1 G-protein-coupled receptors (GPCRs)  
  3.1.1 G-protein-coupled receptor (GPCR) ligands  
3.2 Nuclear hormone receptors (NHRs)  
3.3 Cytokines and receptors  
3.4 Adhesion molecules  
3.5 Host defence molecules  

---
### Contents

**Chapter 3.6 Transporters and channels**

- 3.6.1 ATP-binding cassette families and transporting ATPases 90
- 3.6.2 Solute carrier (SLC) families 96
- 3.6.3 Ligand-gated ion channels 112
- 3.6.4 Voltage-gated ion channels 116
- 3.6.5 Assorted transport and carrier proteins 128

**Chapter 4 Enzymes: Part 1**

- 4.1 Signalling enzymes 136
  - 4.1.1 Protein kinases 136
  - 4.1.2 Protein phosphatases 160
  - 4.1.3 Cyclic nucleotides and phosphodiesterases 168
  - 4.1.4 GTPase signalling proteins 170
  - 4.1.5 Other signalling enzymes 176
- 4.2 Protein modification 179
  - 4.2.1 Peptidases 179
    - 4.2.1.1 Peptidase inhibitors 202
  - 4.2.2 Glycosylation 208
  - 4.2.3 Ubiquitylation and related modifications 218
  - 4.2.4 Chromatin modification 230
  - 4.2.5 Protein synthesis and folding 236
  - 4.2.6 Other protein modifications 241

**Chapter 5 Enzymes: Part 2**

- 5.1 Lipids and related 248
- 5.2 Amino acids and related 267
- 5.3 Nucleotides and related 276
- 5.4 Carbohydrates and related 282
- 5.5 Vitamins, cofactors and related 293
- 5.6 DNA-processing enzymes 296
- 5.7 RNA-processing enzymes 304
- 5.8 Stress response and homeostasis 316
- 5.9 Miscellaneous enzymes 330

**Chapter 6 Remaining annotated entries grouped by subcellular location**

- 6.1 Cell surface and secreted proteins 335
- 6.2 Cytoskeleton 356
- 6.3 Cytoplasm to nucleus 364
- 6.4 Nucleus 375
- 6.5 Internal membranes and organelles 400
- 6.6 Cytoplasmic proteins 417
- 6.7 Subcellular location not annotated 424

**Chapter 7 Non-coding RNAs** 437
