Contents

Preface xi
About the Author xv

Chapter 1: Using Access in Forensic Investigations 1
   An Introduction to Access 2
   The Architecture of Access 4
   A Review of Access Tables 6
   Importing Data into Access 8
   A Review of Access Queries 10
   Converting Excel Data into a Usable Access Format 13
   Using the Access Documenter 20
   Database Limit of 2 GB 24
   Miscellaneous Access Notes 24
   Summary 25

Chapter 2: Using Excel in Forensic Investigations 27
   Pitfalls in Using Excel 28
   Importing Data into Excel 30
   Reporting Forensic Analytics Results 32
   Protecting Excel Spreadsheets 34
   Using Excel Results in Word Files 36
   Excel Warnings and Indicators 40
   Summary 41

Chapter 3: Using PowerPoint in Forensic Presentations 43
   Overview of Forensic Presentations 44
   An Overview of PowerPoint 44
   Planning the Presentation 45
   Color Schemes for Forensic Presentations 46
   Problems with Forensic Reports 50
   Summary 61
Chapter 4: High-Level Data Overview Tests 63
The Data Profile 64
The Data Histogram 67
The Periodic Graph 69
Preparing the Data Profile Using Access 70
Preparing the Data Profile Using Excel 77
Calculating the Inputs for the Periodic Graph in Access 79
Preparing a Histogram in Access Using an Interval Table 81
Summary 83

Chapter 5: Benford’s Law: The Basics 85
An Overview of Benford’s Law 86
From Theory to Application in 60 Years 89
Which Data Sets Should Conform to Benford’s Law? 97
The Effect of Data Set Size 98
The Basic Digit Tests 99
Running the First-Two Digits Test in Access 102
Summary 107

Chapter 6: Benford’s Law: Assessing Conformity 109
One Digit at a Time: The Z-Statistic 110
The Chi-Square and Kolmogorov-Smirnoff Tests 111
The Mean Absolute Deviation (MAD) Test 114
Tests Based on the Logarithmic Basis of Benford’s Law 115
Creating a Perfect Synthetic Benford Set 121
The Mantissa Arc Test 122
Summary 129

Chapter 7: Benford’s Law: The Second-Order and Summation Tests 130
A Description of the Second-Order Test 131
The Summation Test 144
Summary 151

Chapter 8: Benford’s Law: The Number Duplication and Last-Two Digits Tests 153
The Number Duplication Test 154
Running the Number Duplication Test in Access 155
Running the Number Duplication Test in Excel 164
The Last-Two Digits Test 167
Summary 172

Chapter 9: Testing the Internal Diagnostics of Current Period and Prior Period Data 173
A Review of Descriptive Statistics 175
An Analysis of Alumni Gifts 178
An Analysis of Fraudulent Data 182
Summary and Discussion 189

Chapter 10: Identifying Fraud Using the Largest Subsets and Largest Growth Tests 191
Findings From the Largest Subsets Test 193
Running the Largest Subsets Test in Access 195
Running the Largest Growth Test in Access 197
Running the Largest Subsets Test in Excel 200
Running the Largest Growth Test in Excel 203
Summary 210

Chapter 11: Identifying Anomalies Using the Relative Size Factor Test 212
Relative Size Factor Test Findings 213
Running the RSF Test 215
Running the Relative Size Factor Test in Access 216
Running the Relative Size Factor Test in Excel 226
Summary 232

Chapter 12: Identifying Fraud Using Abnormal Duplications within Subsets 233
The Same-Same-Same Test 234
The Same-Same-Different Test 235
The Subset Number Duplication Test 236
Running the Same-Same-Same Test in Access 238
Running the Same-Same-Different Test in Access 239
Running the Subset Number Duplication Test in Access 244
Running the Same-Same-Same Test in Excel 248
Running the Same-Same-Different Test in Excel 252
Running the Subset Number Duplication Test in Excel | 256
Summary | 262

Chapter 13: Identifying Fraud Using Correlation | 263
The Concept of Correlation | 264
Correlation Calculations | 272
Using Correlation to Detect Fraudulent Sales Numbers | 272
Using Correlation to Detect Electricity Theft | 276
Using Correlation to Detect Irregularities in Election Results | 278
Detecting Irregularities in Pollution Statistics | 282
Calculating Correlations in Access | 287
Calculating the Correlations in Excel | 291
Summary | 295

Chapter 14: Identifying Fraud Using Time-Series Analysis | 297
Time-Series Methods | 299
An Application Using Heating Oil Sales | 299
An Application Using Stock Market Data | 303
An Application Using Construction Data | 306
An Analysis of Streamflow Data | 313
Running Time-Series Analysis in Excel | 319
Calculating the Seasonal Factors | 320
Running a Linear Regression | 322
Fitting a Curve to the Historical Data | 324
Calculating the Forecasts | 325
Summary | 330

Chapter 15: Fraud Risk Assessments of Forensic Units | 332
The Risk Scoring Method | 333
The Forensic Analytics Environment | 335
A Description of the Risk-Scoring System | 336
P1: High Food and Supplies Costs | 338
P2: Very High Food and Supplies Costs | 339
P3: Declining Sales | 340
P4: Increase in Food Costs | 342
P5: Irregular Seasonal Pattern for Sales | 344
P6: Round Numbers Reported as Sales Numbers | 346
P7: Repeating Numbers Reported as Sales Numbers | 347
