purpose of, 49
Reflective listening (cont’d)
questioning v., 48–49
rapport and, 51–52
in single behavior patient scenario, 126–27, 132, 133
voice intonation in, 50–51
Relatedness, in self-determination theory, 31
Research
on clinicians, 158, 162, 164–65
on compliance, 9
counselling and, 6
on dental education, 151, 153–58, 159f, 160t, 161t, 163–64
on diet, 63
on frequency, 96
on MI, 62–63
on self-determination theory, 31–32
on socio-economics, 154, 155
on stigma/illness, 154
on stomatological odontological education, 151
on tobacco use, 63, 155, 156–58, 159f, 160t, 161t
Resistance
to advice, 19–20, 66
agreement with a twist in, 81t, 82
amplified reflection, 81t, 82
to change talk, 79–83, 80t
coming alongside in, 81t, 82
commitment v., 87
double-sided reflection, 81t, 82
emphasizing personal choice/control in, 81t, 82
focus shift in, 81t, 83
MI and, 71, 80–83, 81t
reframing in, 81t, 82–83
righting reflex v., 96
rolling with, 71
simple reflection, 80–82, 81t
Responsibility
ethical, 10
legal, 10–11
Righting reflex, 52–53, 65
in brief interventions, 96
in single behavior patient scenario, 127, 128
Rolling with resistance, 71
Self-determination theory, 30–32
Self-efficacy support, in MI, 71
Self-efficacy theory, 24–25
Self-Perception Theory, 23
Single behavior patient scenario
agenda setting in, 127, 128
asking permission in, 127, 128, 130, 131
autonomy in, 133
change talk in, 131, 132, 133, 134–35
closing in, 135
confidence and, 132
elaboration in, 132
EPE in, 134
goal in, 129
greeting in, 126, 128
gum disease in, 130–32
implants in, 127, 129, 131
importance in, 131
information in, 129–33
multiple behavior patient scenario v., 136–37
open questioning in, 126–27, 130
permission in, 127, 128, 130, 131
present clinical features of, 129
prior behavioral features of, 126
prior clinical features of, 125
raising topics in, 133
rapport in, 126–27
readiness in, 131
readiness ruler in, 131, 132, 134
reframing in, 126–27, 132, 133
righting reflex in, 127, 128
setting of, 125
status in, 128
summarizing in, 135–36
before visit, 125
Smoking. See Tobacco use.
Social Cognitive Theory, 24–25
Socio-economics
as behavior change challenge, 154, 155
protective factors, 155
Stages of Change model, 18
Status, body language and, 128
Stress, 13
Student clinic
  confidence in, 157
  MI at, 156
  motivation in, 157
  permission in, 157
  time in, 157
  tobacco use in, 156–58, 159f, 160t, 161t
  transtheoretical model in, 156
Subjective norms, 27f, 28
Summarizing, 35, 42, 57, 57t
  to collect key issues, 55
  to link information, 55–56
  in MI, 75
  in single behavior patient scenario, 135–36
  understanding and, 104t
  to wrap-up, 56
Support
  affirmations for, 47–48, 57t, 72
  importance of, 138–39
Supporting change, 104
  offering strategies for, 105–6
  patient problem solving for, 105
  planning and, 106–7, 107t
Telephone use, for brief interventions, 107–8
Theory of planned behavior, 27–28, 27f
Time
  as behavior change challenge, 20, 48–49, 51–52
  behavior change skills and, 142
  brief advice and, 109
  for computer use, 108
  discussion of, 126–27
  for implementation, 118
  for information, 53
  in student clinic, 157
  for telephone, 108
Tobacco use, 7, 8f, 65, 66
  ambivalence about, 21–22
  as behavior change challenge, 16, 19–20, 137
  continuing education on, 158, 162–63
  dental education on, 153, 156–58, 159f, 160t, 161t, 162–63
  dental team and, 139, 162–63
  giving information v. raising awareness about, 102t
  in multiple behavior patient scenario, 137
  readiness and, 137
  research on, 63, 155, 156–58, 159f, 160t, 161t
  in student clinic, 156–58, 159f, 160t, 161t
  summarizing, 56
Transtheoretical model (TTM)
  for behavior change, 28–30, 29f
  criticism of, 30
TTM. See Transtheoretical model
Understanding
  ambivalence, 104t
  awareness raising v., 103, 104t
  behavior change challenges, 24–32
  conveying, 103, 104t
  of information, 54–55
  for rapport, 103, 104t
  reflections for, 104t
  reflective listening for, 48–52, 50f, 57t
  summarizing and, 104t
Values, exploration of, 79
