How to use your textbook xvi

Part 1

General 1
1 Recognizing the unwell patient 2
2 Managing the critically ill patient 4
3 Monitoring in critical care medicine 6
4 The electrocardiogram 8
5 Cardiopulmonary resuscitation 10
6 Oxygen transport 12
7 Shock 14
8 Circulatory assessment 16
9 Fluid management: pathophysiological factors 18
10 Fluid management: assessment and prescription 20
11 Fluid management: fluid choice 22
12 Inotropes and vasopressors 23
13 Failure of oxygenation and respiratory failure 24
14 Oxygenation and oxygen therapy 26
15 Airways obstruction and management 28
16 Non-invasive ventilation 30
17 Endotracheal intubation 32
18 Mechanical ventilation 34
19 Respiratory management, weaning and tracheostomy 36
20 Arterial blood gases and acid-base balance 38
21 Analgesia, sedation and paralysis 40
22 Enteral and parenteral nutrition 42
23 Hypothermia and hyperthermia 44
24 Assessment of the patient with suspected infection 46
25 Bacteraemia, SIRS and sepsis 48
26 Hospital-acquired (nosocomial) infections 50
27 Fever in the returning traveller 52
28 Fever (pyrexia) of unknown origin 54
29 End of life issues 56

Part 2

Medical 59

Cardiac
30 Acute coronary syndromes I: clinical pathophysiology 60
31 Acute coronary syndromes II: investigations and management 62
32 Arrhythmias: tachyarrhythmias 64
33 Arrhythmias: bradyarrhythmias 67
34 Heart failure and pulmonary oedema 68
35 Cardiac emergencies 70
36 Deep venous thrombosis and pulmonary embolism 72

**Respiratory**
37 Chest imaging and bronchoscopy 74
38 Community-acquired pneumonia 76
39 Hospital-acquired (nosocomial) pneumonia 78
40 Asthma 80
41 Chronic obstructive pulmonary disease 82
42 Acute respiratory distress syndrome 84
43 Pneumothorax and air leaks 86
44 Respiratory emergencies 88

**Renal and metabolic**
45 Acute kidney injury: pathophysiology and clinical aspects 90
46 Acute kidney injury: management and renal replacement therapy 92
47 Electrolyte disturbances: sodium and potassium 94
48 Electrolyte disturbances: calcium 96
49 Electrolyte disturbances: magnesium and phosphate 98
50 Diabetic emergencies 100
51 Endocrine emergencies 102

**Gastrointestinal**
52 Gastrointestinal haemorrhage 104
53 Jaundice 106
54 Acute liver failure 108
55 Acute pancreatitis 110
56 Vomiting and intestinal obstruction 112
57 Diarrhoea 114
58 Ascites 116
59 Abdominal imaging 117

**Neurological**
60 Acute confusional state, coma and status epilepticus 118
61 Stroke 120
62 Other cerebral vascular disorders 122
63 Infective neurological emergencies 123
64 Neuromuscular conditions 124

**Infective**
65 Specific bacterial infections 126
66 Common adult viral infections 128
67 Common fungal and protozoal infections 130
68 The immune compromised patient 132

**Other systems**
69 Coagulation disorders and transfusion 134
70 Drug overdose and poisoning 136

**Surgical** 139
71 Trauma 140
72 Head injury 142
73 Chest trauma 144
74 Acute abdominal emergencies 146
75 Obstetric emergencies 148
76 Burns, toxic inhalation and electrical injuries 150
Appendices
Appendix I  Classification of antiarrhythmic drugs  162
Appendix II  Pacemaker types and classifications  163
Appendix III  Acute injury network staging system 2008 for acute kidney injury (AKI)  164
Appendix IV  Rockall risk-scoring system for GI bleeds  165
Appendix V  Child–Pugh grading  166
Appendix VI  Typical criteria for liver transplantation  167
Appendix VII  Royal College of Physicians’ top nutrition tips  168

Index  169
