Contents

Preface ix
List of contributors xi

1 EEG basics 1
  1.1 Electrode nomenclature, polarity and referential vs. bipolar montages 1
  1.2 Normal EEG: awake and asleep 4
      Suggested reading 6
      Figures 1.0–1.12 7

2 EEG in encephalopathy 39
  2.1 Nonspecific patterns of encephalopathy 39
  2.2 Patterns suggesting specific diagnoses 39
  2.3 Findings in specific clinical scenarios 40
  2.4 Medication effects 40
      Suggested reading 41
      Figures 2.1–2.35 43

3 Seizures and status epilepticus 89
      Suggested reading 89
      Figures 3.1–3.10 91

4 Periodic discharges and other controversial EEG patterns 129
  4.1 PLEDs, BIPELDs, GPEDs and triphasic waves 129
  4.2 SIRPIDs 130
  4.3 Standardized nomenclature 130
      Suggested reading 130
      Figures 4.1–4.18 132

5 EEG in cerebrovascular disease 161
  5.1 Ischemia 161
  5.2 Hemorrhage 161
      Suggested reading 162
      Figures 5.1–5.18 163

6 Artifacts that can mimic seizures or other physiologic patterns 187
      Suggested reading 190
      Figures 6.1–6.20 191

7 Prolonged EEG monitoring and quantitative EEG techniques for detecting seizures and ischemia 217
      Suggested reading 219
      Figures 7.1–7.10 Quantitative EEG (QEEG) basics 222
      Figures 7.11–7.17 Basics of seizure detection 240
      Figures 7.18–7.21 Cyclic seizures and PLEDs 250
      Figures 7.22–7.25 Other QEEG techniques and uses in patients with seizures 256
      Figures 7.26–7.31 Detecting other (non-seizure) events 262
      Figures 7.32–7.35 Long-term trends 272
      Figures 7.36–7.46 ICU artifacts 276
      Figures 7.47–7.48 Spreading depression/peri-injury depolarizations 288
      Figures 7.49–7.54 Multimodality monitoring and intracranial EEG in the ICU 290
CONTENTS

8 Evoked and event-related potentials in the ICU
   8.1 Median nerve somatosensory evoked potentials
   8.2 Brainstem auditory evoked potentials
   8.3 Flash visual evoked potentials
   8.4 Event-related potentials
      Suggested reading

Appendix  ACNS Standardized EEG Research Terminology
and Categorization for the investigation of rhythmic and
periodic patterns encountered in critically ill patients:
July 2009 version
