Index

A
A posteriori error, 77
A posteriori error vector, 96
A posteriori signal-to-noise ratio, 240
A priori error, 77
A priori error vector, 96
A priori signal-to-noise ratio, 240
Acoustic echo, 31
Adaptive decorrelation filter, 167, 170
Adaptive highpass filter, 139
Adaptive line enhancement, 130
Affine projection algorithm, 95
All-pole filter, 62
All-zero filter, 62
Allpass-transformed filterbank, 230
Analysis–synthesis scheme, 224, 230
Analysis filterbank, 200
Arithmetical error, 382
Artificial mouth, 10
Artificial Voice, 39
Attenuation factor, 139
Autocorrelation matrix, 56
Automatic gain control, 147–148, 255

B
Background noise-level estimation, 149
Backward predictor, 61
Bark scale, 230
Bartlett window, 227
Beamformer, 267
Behind-the-ear hearing aid, 12
Bi-frequency response, 418
Block processing algorithm, 175
Blocking matrix, 293
Broadside direction, 272

C
Calibration, 376
Car interior communication system, 10
Car noise, 24
Cascaded polyphase filterbank, 234
Center clipper, 2
Cepstral analysis, 259, 333
Cepstral coefficient, 49
Cepstral distance, 43, 48
Chebyshev’s recursion, 410
Chebyshev polynomial, 410
Chi square density, 31
Closed-loop correlation analysis, 330
Comfort noise, 248
Command correctness, 267
Completely-in-the-canal hearing aid, 12
Complex cepstrum, 48, 414
Complex impulse response, 54
Composite source signal, 39
Computational complexity, 182, 186
Constrained least mean square (LMS) algorithm, 291
Constraint, 185
Contraction parameter, 83
Control, 299
Control matrix, 112
Control structure, 79
Control
  basic aspect, 301
  design aspect, 301
  hardware aspect, 302
Convergence plane, 89
Correlation analysis, 330
Cost function, 43
Coupling factor, 321
Critical band, 230

D
  Decorrelation filter, 62, 91, 166
  Delay coefficient, 323
  Dereverberation, 268
  Deterministic data model, 45
  Diffuse field distance, 374
  Directional gain, 278
  Directional pattern, 276
  Directivity factor, 278
  Directivity index, 278
  Dolph–Chebyshev filter, 47, 408
  Double talk, 48
  Double talk detection, 51
  Downsampling, 191
  Dynamic limiter, 158

E
  Echo-return loss enhancement (ERLE), 35
  Echo cancellation filter, 163
  Eigenvector, 47
  Endfire direction, 272
  Engine noise, 24
  Envelope tracker, 148
  Equiripple filter, 47
  Error criterion, 43
  Error criterion for adaptive filters, 43
  Error criterion for filter design, 46
  European Telecommunication Standards Institute, 37
  Expansion parameter, 84
  Exponentially weighted stepsize NLMS algorithm, 383
  Extended LMS algorithm, 217
  Extended state vector, 124
  Extended system matrix, 124

F
  FAP algorithm, 99
  Far-field assumption, 373
  Fast affine projection algorithm, 99
  Fast recursive least squares algorithm, 110
  Fast transversal filter algorithm, 111
  Feedback canceling filter, 11
  Fetal electrocardiography, 131
  Filter characteristics, 235
  Filter design, 401
  Filter order, 209
  Filterbank, 189
  Final misadjustment, 80, 86
  Finite impulse response filter, 76
  Fixed decorrelation filter, 170
  Forgetting factor, 45, 105
  Formant frequency, 16
  Forward predictor, 61, 64
  Fourier matrix, 181
  Fractional delay filter, 282
  Freezing of coefficients, 383
  Frequency shift, 137–138
  Frequency shifting, 222
  Fricative spreading, 255, 260
  Front-to-back ratio, 278
  Fullband processing, 165
  Fundamental frequency, 16

G
  Gain vector, 106
  Gamma probability density, 19
  Gaussian probability density, 19
  Generalized sidelobe canceler, 293
  Grating lobe, 267, 271
  Group delay, 402

H
  Half-band filter, 46
  Hamming window, 227
  Hands-free telephone, 9
  Hanning window, 226
  Hard–soft limiter, 159
  Hard limiter, 158
  Harmonic product spectrum, 260
  Headset, 131
  Hearing aid, 12
  Hermitian matrix, 58
  Highpass-lowpass power ratio, 337
  Hilbert filter, 141

I
  Implementation, 381
  Inner cost function, 44
  International Telecommunication Union, 37
  Intonation, 16

K
  Kalman algorithm, 111
Kalman gain, 114–115, 119
Lagrange interpolation, 283
Laplacian probability density, 19
Lattice filter, 70
Leakage, 217
Levinson–Durbin algorithm, 64, 91
Levinson–Durbin recursion, 67
Limiter, 147
Line spectral frequency, 355
Linear prediction, 61
Linear wave equation, 269
Linearly constrained minimum variance (LCMV) beamformer, 287
Lombard effect, 255
Loss control, 146, 151
Loudspeaker–enclosure–microphone system, 163
Lower sideband, 141
Masking, 211
Matrix inversion lemma, 106
Mean square error, 43, 45
Measurement equation, 112
Measurement noise, 120
Memory requirement, 182, 186
Microphone array, 267
Microphone calibration, 376
Minimum criterion, 43, 47
Minimum mean square error estimation, 240
Minimum statistics, 355
Mismatch vector, 82
Modified filter coefficient vector, 101
Modulation effect, 246
Multichannel system, 218
Musical noise, 241, 364
NLMS algorithm, 77–78
Noise suppression, 222
Noncausal subband impulse response, 206
Noncausal Wiener filter, 60
Nonpersistent signal, 16
Nonuniqueness, 164, 214
Normal equation, 57, 106
Normal equations, 62
Normalized autocorrelation coefficient, 16
Notation, 7
Notch filter, 11
Number representation error, 382
Office impulse responce, 35
Office noise, 23
Open-loop correlation analysis, 330
Orthogonality principle, 55, 114
Outer cost function, 44
Overestimation factor, 366
PARCOR coefficient, 68
Perfect reconstruction, 226, 404
Persistent signal, 73
Phase center, 274
Pitch, 255
Pitch-adaptive filtering, 222, 255–256
Pitch-frequency estimation, 259
Pitch frequency, 16
Polar plot, 276
Polyphase filterbank, 197
Postecho, 230
Power spectral density, 59
Prediction error filter, 61
Predictor order, 61
Prewhitening structure, 84
Prolate sequence, 47
Prototype lowpass filter, 189, 197, 203
Public address system, 11
Quadrature mirror filterbank, 192
Quantization, 383
Quantization error, 381
Rayleigh density, 31
Rectangular time window, 44
Recursive least squares algorithm, 105
Reflection coefficient, 68, 70
Regularization, 97
Regularization parameter, 79
Remez exchange algorithm, 47
Rescue detector, 333
Residual echo suppression, 222, 244
Reverberation time, 8, 33
RLS algorithm, 107
Rolling noise, 27
Scaled filter vector, 386
Saturation, 382
Scaling matrix, 386
Selective coefficient update, 171
Shadow filter, 334
Sidelobe cancellation path, 293
Signal cancellation, 373
Signal identification, 73
Signal matrix, 96
INDEX

Sliding unit, 216
Sortline algorithm, 174
Spatial aliasing, 271
Spatial frequency response, 272
Spectral floor, 243, 367
Spectral subtraction, 238
Speech-activated switching, 146
Speech-level estimator, 150
Speech recognition system, 267
Speech signal, 15
Speed of convergence, 86
Stability analysis, 80
Standards, 37
Stationarity, 49
Stepsize matrix, 79
Stepsize parameter, 78–79
Stereophonic echo cancellation, 213
Stochastic data model, 45
Subband cancellation, 185
Subband system, 204
Superdirective microphone array, 278
Synthesis filterbank, 200
Synthesis windowing, 225
System distance, 74, 86, 321
System equalization, 73–74
System equation, 112
System identification, 73
System identification problem, 35
System noise vector, 112

T
Test signal, 39

Toeplitz matrix, 58
Transition matrix, 112
Transversal echo cancellation filter, 37
Two-filter structure, 91

U
Upper sideband, 141
Upsampling, 192

V
Ventilator noise, 28
Voice activity detection, 148, 150, 157
Voiced/unvoiced classification, 259

W
White noise gain, 278
Whitening filter, 62
Wiener–Hopf equation, 56
Wiener filter, 53, 115, 237
Wiener solution, 57
Wind noise, 24
Window, 44
Window functions
  exponentially decaying window, 45
  rectangular time window, 44
Woodbury’s law, 106
Wrapping, 382

Z
Zero-crossing rate, 259, 354
Zero saturation, 382
