Addison’s disease, 45
aging, 106–109
  and blood flow, 108
  and Langerhans cells, 107
  and mucins, 109
  and oral environment, 108
  and permeability barrier, 120–121
  and wound healing, 107
alveolar mucosa, 11, 78, 82, 88
amalgam tattoo, 45
anchoring fibrils, 55
angioenic factors, 125
anti-inflammatory cytokines, 125; see also cytokines
antimicrobial peptides, 123–135, 125, 128
  immune properties, 134–135
  induction and regulation, 132–134
antimicrobial proteins, 123
arteriovenous shunt, 70; see also thermal regulation
atrophy, and aging, 106–109
attachment plaques, 33; see also desmosomes
autoantigens, 57
  barrier function, 4, 113
  and alcohol, 122
and mouth rinse, 122
and tobacco, 121
and toothpaste, 122
Bartholin’s glands, 149
basal complex, 55, 56, 57
   in blistering diseases, 57–58
basal layer, 26, 29, 33, 43
basement membrane, 15, 55
Birbeck granule, 46
blistering diseases, 34, 57–58
blood supply, 68–70, 69
   of lamina propria, 93–94
bradykinin, 72
buccal mucosa, 12, 20, 23
   epithelial cell proliferation, 150
   permeability of, 152
   structure of, 78
buccopharyngeal membrane, 100
bullous pemphigoid antigen, 55, 57
Burton’s line, 46
cadherin, 33–34
cathelicidins, 124, 130
caviar tongue, 108
cell differentiation, 34, 35
cell division, 27
   control of, 133
ceramides, 118–119
cheek, 9
chemokines, 123, 12
circumvallate papillae, 72, 85, 8
clear cells, 41, 4
col, 95
collagen, 66, 67
   anchoring fibrils of, 55
communicating junctions, 34
connective tissue, 93
connective tissue papillae, 14
   embryologic development, 101
cornified layer, 22; see also keratinization
cytokeratins, 27, 30, 32, 86–87
   in non-keratinized mucosae, 152
cytokines, 49, 72, 123
   anti-inflammatory, 125
induce defensins, 133
proinflammatory, 124
decorin, 68
defensins, 124
    alpha defensins, 124, 130
    beta defensins, 124, 130–131
    in immunity, 134
    induce cytokines, 133
dendritic cells, 46; see also Langerhans cells
dentogingival junction, 80, 88, 90
    blood supply of, 93
    connective tissue, 96
    epithelial differentiation, 96
    inflammation of, 96
    nerve supply of, 94
dermis, 14
desmoglein, 34
desmoplakin, 33
desmosomes, 20, 31, 33, 101
desquamation, 40
development of the oral mucosa, 99–106
differentiation
    cellular basis of, 29
    embryologic development, 99–103
    in oral epithelium, 23, 35
elastic fibers, 66
    staining of, 67, 89
elastin. See elastic fibers
embryologic development, 100
endothelial cell, in lamina propria 61
epidermis, 14
epithelial cell proliferation, 24–29, 150
epithelial turnover, 28
epithelial-mesenchymal interaction, 104
epithelium
    aging, 107
    embryologic development, 100
    lining mucosa, 81
    masticatory mucosa, 80
    specialized mucosa, 83
    turnover time, 28
epithelium connective tissue
aging, 107
embryologic development, 101
esophagus, 145–146, 146, 149, 150
epithelial differentiation, 149
inflammatory cells, 154
non-keratinocytes, 153
permeability of, 152
esthetics of oral mucosa, 6
extra parotid glycoprotein, 132
fibrillin, 66
fibroblasts, 62
in lamina propria, 61, 63
