Index

Note to the Reader: Throughout this index boldfaced page numbers indicate primary discussions of a topic. Italicized page numbers indicate illustrations.

A

aaa authentication command
  RADIUS, 354
  TACACS+, 355
aaa group server command
  RADIUS, 354
  TACACS+, 355
aaa new-model command
  RADIUS, 353
  TACACS+, 354
AAA (authentication, authorization, and accounting)
  security, 352
  RADIUS, 352–354
  TACACS+, 354–356
access connectivity options, 248–253, 249, 252–253
access control lists (ACLs)
  APIC-EM, 338–341, 339, 341
troubleshooting, 199–200, 208, 210, 216–219
access layer, 17
access layer threats, 311, 311
  802.1x, 312, 312
  access lists. See access lists
  DHCP snooping, 312–314, 313
access links for VLANs, 75
access-list command
  extended access lists, 322
  NAT, 295–296, 300, 302
  standard access lists, 315–316
access-list deny command
  extended access lists, 327, 329, 332
  standard access lists, 316–325
access-list permit command
  extended access lists, 325–327, 329
  standard access lists, 319, 321
access lists, 314–315
  configuring, 396
  extended, 216–219, 334–337, 334
  monitoring, 331–333
  named, 329–331
  standard, 315–322, 319–321
  wildcard masking, 317–319
access mode for switch ports, 77
access points, 10
acknowledgment numbers in TCP segment, 7
ACLs (access control lists)
  APIC-EM, 338–341, 339, 341
troubleshooting, 199–200, 208, 210, 216–219
active mode in NBAR, 261
active routers in HSRP, 281–283, 282, 285
Active state in HSRP, 290
active timers in HSRP, 284
AD (administrative distance)
  routing tables, 125–127
  static routing, 140
Adaptive Security Appliance (ASA), 10
address-family ipv4 command, 181
address ipv4 command
  RADIUS, 353
  TACACS+, 354
address learning in MAC tables, 62–63, 62–63
Address Resolution Protocol (ARP), 117, 119–121
  addresses
  IP. See IP addresses
  MAC. See MAC addresses
addressing classification in QoS, 261
administrative distance (AD)
  routing tables, 125–127
  static routing, 140
advanced distance-vector protocols, 138
Alert severity level in syslog messages, 365
all Is broadcasts, 32
all nodes addresses, 32
allowed VLANs on trunks, 78–79
anycast addresses, IPv6, 56
APIC-EM (Application Policy Infrastructure Controller
  Enterprise Module), 338–341, 339, 341
APIs
  northbound, 420–421, 420
  southbound, 419–420, 419
application planes, 418
Application Policy Infrastructure Controller Enterprise
  Module (APIC-EM), 338–341, 339, 341
application signatures in QoS, 261
ARP (Address Resolution Protocol), 117, 119–121
arp command, 37, 117, 121
AS (autonomous systems)
  description, 139
  in EIGRP, 179
authentication
  device security, 342–346
  LCP, 227
  PPP, 228–232
authentication, authorization, and accounting (AAA)
  security, 352
  RADIUS, 352–354
  TACACS+, 354–356
compression in LCP, 227
config-register command, 406, 409–410
configuration register, 404
  bits, 404–405, 404–405
  boot system commands, 406–408
  changing, 409
  password recovery, 408
  resetting, 410
  values, 406
configure terminal command
  router modes, 394
switches, 104
configured VLANs, 75
confreg command, 409
congestion management, 264–268, 265–267
connection-oriented communication, 6
connectionless communication, 8
connectivity, troubleshooting
  DNS, 275
  end-to-end, 199–209, 199
  IPv6 network, 209–216, 209
consistency checks in VTP, 81
console passwords, 343–344
console ports, 392
control planes, 417–419, 418
controller functions, 417–418
copy command, 412
copy running-config command, 373
copy running-config startup-config command, 373, 410
copy running-config tftp command, 373
copy startup-config running-config command, 374, 410
copy tftp flash command, 402–403
copy tftp running-config command, 374
core in fiber-optic cable, 26, 26
core layer, 16
CoS (Class of Service) frames, 260
CQ (custom queueing), 266
CRC (cyclic redundancy check), 66, 69, 118, 118, 120
Critical severity level in syslog messages, 365
crossover cable, 22–23, 22
crypto key generate command, 348
Ctrl+Break key, 409
custom queueing (CQ), 266
cyclic redundancy check (CRC), 66, 69, 118, 118, 120

D
DAI (dynamic ARP inspection), 314
data communication equipment (DCE) devices, 248–249
data field
  Ethernet frames, 67
  TCP segment, 7
  UDP segment, 9
data in QoS, 263
data planes, 417–419, 418
Data technology package, 384
data terminal equipment (DTE) devices, 248–249
dCE (data communication equipment) devices, 248–249
debug ip nat command, 296, 298
debug ppp authentication command, 232
debug standby command, 290–291
debugging
  NAT, 296
  PPP authentication, 232
Debugging severity level in syslog messages, 365
dedicated connections, 249, 249
default boot filename in configuration register, 405
default-information originate command
  OSPF, 153
  RIPv2, 198
default-router command, 277, 279
default routers for DHCP servers, 276–277
default routes
  gateways of last resort, 126
  RIPv2, 198
static routing, 144
default VLANs, 76
delay in QoS, 259
DELAY state, 213
delete command, 412
deny ipv6 any command, 216, 334
deny tcp any host command, 331
deny tcp host command, 217, 335
description in syslog messages, 365
desktop layer, 17
Destination Address (DA) in Ethernet frames, 66
destination ports
  TCP segment, 6
  UDP segment, 9
Device ID field for CDP neighbors, 97, 377
device maintenance
configuration register, 404–408
enterprise network architecture, 417–421, 418–420
file system management, 410–412
IOS upgrades and recovery, 402–404
passwords, 408–410
troubleshooting tools, 413–417, 416
device management, 371
backups, 372–373
bringing up devices, 392–393
CDP. See Cisco Discovery Protocol (CDP)
CLI, 393–396
configuration
  erasing, 374–375
  initial, 392–401
  restoring, 374
licensing, 383–390
LLDP, 382–383
logging, 390
loopback, 390–391
time zones, 390
device-monitoring protocols
SNMP, 360–364, 360, 362
syslog server, 364–369, 367
device security, 341–342
  access control, 348–349
  local authentication, 342–346
  login banners, 349–351
  secure passwords, 346–347
device trusts in QoS, 261–262, 261
DHCP. See Dynamic Host Configuration Protocol (DHCP)
DHCPv6, 49–50
diagnostic address, 35
Differentiated Services Code Point (DSCP) fields, 260
DiffServ fields, 260
Diffusing Update Algorithm (DUAL), 187
dir command, 411
disable command, 394
disabling trunking, 78
distance-vector protocols, 138
distribution layer, 16–17
divide and conquer troubleshooting, 28
DMVPNs (Dynamic Multipoint Virtual Private Networks), 252
DNS. See Domain Name Service (DNS)
dns-server command, 277, 279
do clear ip ospf process command, 156
do show host command, 216, 335
do show hosts command, 273
do show interface command, 77, 400
do show interface trunk command, 77–78
do show ip ospf command, 156
do show ip route command, 141–144, 195–196
do show ipv6 route command, 51, 53
do show mac address-table command, 308
do show monitor command, 416
do show run command, 141–143, 398, 401, 407
do show standby command, 289
do show version command, 406
DoD model, 4–5, 5
Domain Name Service (DNS)
  connectivity issues, 275
  host tables, 272–274
  name resolution, 274–275
  troubleshooting, 36
dropped packets, 68
DSCP (Differentiated Services Code Point) fields, 260
DTE (data terminal equipment) devices, 248–249
DTP (Dynamic Trunk Protocol), 72–73, 79
DUAL (Diffusing Update Algorithm), 187
dual-homed WAN connections, 248
duplex command, 204
duplex settings, 204–205
dynamic ARP inspection (DAI), 314
Dynamic Host Configuration Protocol (DHCP), 276
clients, 278
  connectivity issues, 278–281
  gateways, 278
  relay, 277–278, 277
  servers, 276–277, 276
  snooping, 312–314, 313
dynamic MAC addresses, 309
Dynamic Multipoint Virtual Private Networks (DMVPNs), 252
dynamic routing vs. static, 136–137
Dynamic Trunk Protocol (DTP), 72–73, 79

E
EBGP (external Border Gateway Protocol), 254, 254, 256–259
echo-based IP SLAs, 369–371
EGPs (exterior gateway protocols), 139
802.1d standard, 85
802.1q standard, 82–83, 82
802.1s standard, 85
802.1w standard, 85
802.1x access layer threats, 312, 312
EIGRP. See Enhanced Interior Gateway Routing Protocol (EIGRP)
Emergency severity level in syslog messages, 365
enable command passwords, 342
  privileged exec mode, 394
  enable password command, 342
  enable secret command, 342, 410
  enabling passwords, 342–343
  encapsulation, mismatched, 232–233, 233
  encapsulation command
    inter-VLAN routing, 130, 133
  PPP, 229
  encapsulation ppp command, 240
  end-to-end connectivity troubleshooting, 199–209, 199
Enhanced Interior Gateway Routing Protocol (EIGRP)
  IPv4

    verifying, 190–193
    multicasts, 45, 45
enterprise network architecture, 417
APIs, 419–421, 419–420
  control planes and data planes, 418–419
  controllers, 417–418
erase command, 412
erase startup-config command, 374
erasing configurations, 374–375
e-r disseal recovery of MAC addresses, 310–311
er disable recovery command, 311
er error detection in LCP, 227
Error severity level in syslog messages, 365
ers in QoS, 259
Ether-Type field, 118, 118, 121
EtherChannel
  layer 3, 107–108
  overview, 102–104, 104
PAGP and LACP, 104–107
static, 104
Ethernet frames, 66–67
EUI-64 addresses, 48–49, 48
events, logging, 415
excluded addresses with DHCP servers, 276
exec banners, 350
exec-timeout command
  console port, 344
  examples, 326–329, 326, 328
  overview, 322–326
  troubleshooting, 216–219
  working with, 334–337, 334
extended access lists, 216–219,
  334–337, 334
exterior gateway protocols (EGPs), 139
external Border Gateway Protocol (EBGP), 254, 254,
  256–259
external cloud resources, traffic paths to, 12
extranet VPNs, 252–253, 253

F
facility in syslog messages, 365
FCS (Frame Check Sequence) field, 67, 118, 118, 120
feasible distance (FD) in EIGRP, 183
fiber-optic cable, 26–27, 26–27
FIFO (first in, first out) queuing, 266
file system management, 410–412
firewalls, 10
first in, first out (FIFO) queuing, 266
flash memory for configuration register, 404
floating static routing, 145
format command, 412
forward/filter tables, 64–65, 64
forwarding planes, 418
forwarding routing, 122
fragmentation in MLP, 236
Frame Check Sequence (FCS) field, 67, 118, 118, 120
frame flooding, 64–65, 64
frame rewrite process, 122
frame switching, 64
frequency command, 369–370
full mesh WAN connections, 247, 247

gateways
  DHCP, 278
  gateways of last resort, 126
Generic Routing Encapsulation (GRE) tunneling
  protocol, 241–242, 241
  configuring, 242–244, 242
  verifying, 244–245
GET messages, 360–362, 360
GET BULK messages, 361
giant frames, 69
global addresses, 209
global configuration mode, 394
global synchronization, 266
global unicast addresses, 55, 55
GRE (Generic Routing Encapsulation) tunneling
  protocol, 241–242, 241
  configuring, 242–244, 242
  verifying, 244–245
group roles in HSRP, 285–286

H
HDLC (High-Level Data-Link Control), 226,
  233–234
header length in TCP segment, 7
Hello packets, 187
hello timers, 283–284, 284
hierarchical IP addressing, 29–34, 30
hierarchy in three-layer hierarchical model, 15–18, 15
High-Level Data-Link Control (HDLC), 226,
  233–234
hold timers in HSRP, 284
Holdtime field for CDP neighbors, 97, 377
holdtime in CDP, 95–96, 95, 375–377, 375
host addresses in IP, 30
host routes in static routing, 145
host tables in DNS, 272–274
hostname command, 229
HSRP protocol, 281–283, 282
  configuring and verifying, 287–288, 287
  group roles, 285–286
  interface tracking, 286–287, 286
  load balancing, 291, 292
  preemption, 292
  priority, 288–291
timers, 283–284, 284
troubleshooting, 293
version, 292
virtual MAC addresses, 283
hub-and-spoke WAN connections, 246–247, 246
hybrid topologies, 19

I
ICMP (Internet Control Message Protocol)
  IP SLAs, 369–371
  ping, 37
  routing, 116–119, 121–122
icm command, 369
icmp-echo command, 369
Identity Service Engine (ISE), 339
IEEE 802.1d standard, 85
IEEE 802.1q standard, 82–83, 82
IEEE 802.1s standard, 85
IEEE 802.1w standard, 85
IFS system, 410–411
Ignored packets message, 68
IGPs (interior gateway protocols), 139
in-band connections, 392
IP (Internet Protocol) routing process, 116–121, 118. See also IP addresses
ip access-group command, 319, 321, 326–329, 331
ip access-list command, 330, 396
ip access-list extended command, 331, 333
ip access-list standard command, 330
ip address command, 400–401
ip address dhcp command, 280
ip address negotiated command, 240
IP addresses
access lists. See access lists configuring, 400–401
IPv4
EIGRP, 178–187, 179
hierarchical scheme, 29–34, 30

spanning-tree bpduguard command, 94
spanning-tree mode rapid-pvst command, 91
spanning-tree portfast command, 93–94
Spanning Tree Protocol (STP), 84
PortFast, 92–94, 92
root bridge selection, 85–86, 85–86
troubleshooting, 85–92
varieties, 85
Speak state in HSRP, 290
special addresses
IPv4, 31
IPv6, 56–57
speed command, 204
speed settings, 204–205
SSH (Secure Shell)
device security, 348–349
in-band connections, 392
StackWise technology, 109–110, 109
STAKE state, 213
standard access lists, 315–322, 319–321
standby command, 288, 292
standby routers, 281–283, 282, 285
Standby state, 290
standby timers, 284
star topologies, 19
Start Frame Delimiter (SFD) in Ethernet frames, 66
startup-config file, 410
stateless IP autoconfiguration, 48–49, 48, 53–55, 54
static MAC addresses, 308–309
static NAT, 294
static routing, 139–140
configuring, 140–144, 141
default routes, 144
vs. dynamic, 136–137
floating static, 145
host routes, 145
network routes, 145
sticky command, 309
sticky MAC addresses, 309–310
STP (Spanning Tree Protocol), 84
PortFast, 92–94, 92
root bridge selection, 85–86, 85–86
troubleshooting, 85–92
varieties, 85
straight-through cable, 21–22, 21
stubs, 144
subinterfaces in inter-VLAN routing, 130
subnets, routing, 124
switch ports in VLANs, 73–75
switched virtual interface (SVI), 129, 135–136, 136
switches and switching technologies
access ports, 75–76
CDP, 94–101, 95, 99, 101
configuring, 70–72
Etherchannels, 102–108, 104
Ethernet frames, 66–67, 66
frame flooding, 64–65, 64
frame switching, 64
interfaces, 396–399
interswitch connectivity, 76–84, 80, 82
LLDP, 101–102
MAC tables, 62–63, 62–63, 65
PortFast, 92–94, 92
SFP, 85–91, 85–86
switch ports, 73–75
switch stacking and chassis aggregation, 109–110, 109
troubleshooting, 68–70
trunking on, 76–84
switchport command, 73–74
switchport access vlan command, 74, 132, 134
switchport mode command, 74
switchport mode access command, 77–78, 309
switchport mode dynamic command, 77–78
switchport mode trunk command, 76, 78, 105–106, 131–134
switchport nonegotiate command, 78
switchport port-security mac-address command, 309–310
switchport port-security maximum command, 309–310
switchport port-security violation command, 309–310
switchport trunk allowed vlan command, 78–79
switchport trunk encapsulation command, 76, 105–106
switchport trunk native vlan command, 83, 313
Synch field in Ethernet frames, 66
synchronization, clock for, 302–304, 303
syslog server, 364–365
configuring, 366–367, 367
verifying, 367–368
TACACS+ (Terminal Access Control Access Control System), 354–356
TCP (Transmission Control Protocol)
congestion management, 266, 266
overview, 5–8, 6
TCP/IP, 4–5, 5
telnet application
device security, 348–349
extended access lists, 335
in-band connections, 392
passwords, 344–345
in troubleshooting, 207–209, 216–218
telnet command, 335
temporary IPv6 addresses, 213
10Base-T standard, 20
10GBase-T standard, 20
terminal monitor, 415
terminal monitor command, 364
testing NAT, 297–302, 299–301
TFTP
copying configurations to, 373
IOS upgrades, 402–403
server address assignment, 278
tftp-server flash command, 403
three-layer hierarchical model, 15–18, 15
TID (Traffic Identifier) fields, 260
time zones, 390
timed-out messages, 120
timers
CDP, 95–96, 95, 375–376, 375
HSRP, 283–284, 284
timestamp in syslog messages, 365
TLV (Type-Length-Value) support, 81
Token Ring support, 81
top-down troubleshooting, 28
topologies
network, 18–19, 18
WAN technologies, 246–248, 246–248
ToS (Type of Service) fields, 260
traceroute command
connectivity problems, 202
IP addresses, 37
working with, 414–415
tracert command
connectivity problems, 202
IP addresses, 37
IPv6 networks, 211–212
working with, 414
Traffic Identifier (TID) fields, 260
traffic paths to cloud resources, 12
Transmission Control Protocol (TCP)
congestion management, 266, 266
overview, 5–8, 6
transparent mode in VTP, 71
transport input command, 349
TRAP messages in SNMP, 360, 360, 362
troubleshooting
device maintenance, 413–417, 416
DHCP connectivity issues, 278–281
DNS connectivity, 275
end-to-end connectivity, 199–209, 199
HSRP, 293
interfaces and cables, 68–70
IP addressing, 34–41, 35, 38–41
IPv6 extended access lists, 216–219
IPv6 network connectivity, 209–216, 209
methodologies, 28
NAT, 297–302, 299–301
STP, 85–92
switches, 68–70
trunk ports, 76–78
trunks
switches, 76–84
VLANs allowed on, 78–79
trust boundaries, 262
trusted domains, 262
tunnel destination command, 243–244
tunnel mode command, 243
tunnel source command, 243–244
Type-Length-Value (TLV) support, 81
Type of Service (ToS) fields, 260

U

U/L (universal/local) bit, 48
UDP (User Datagram Protocol), 8–9, 8
unicast addresses
description, 43–44, 44
IPv6, 55
Unified Communications technology package, 384
uninstalling licensing, 390
unique local addresses, 56
universal images, 384
universal/local (U/L) bit, 48
unshielded twisted-pair (UTP) cabling, 19
untrusted domains, 262
upgrades for IOS, 402–404
upper layers in OSI Reference Model, 3–4, 3
upstream inter-VLAN routing, 130
urgent field in TCP segment, 7
user-tacacs password option, 342
User Datagram Protocol (UDP), 8–9, 8
user exec mode, 393
username command
device security, 348
PPP, 229
RADIUS, 353
TACACS+, 354
UTP (unshielded twisted-pair) cabling, 19
UTP Gigabit Wiring (1000Base-T), 23, 23

V

version-dependent transparent mode in VTP, 81
versions
HSRP, 292
SNMP, 361
video QoS, 263
violation actions for MAC addresses, 310
virtual accounts, 390
virtual circuits, 6
virtual LANs (VLANs), 10
configuring, 70–72
default, 76
inter-VLAN routing. See inter-VLAN routing (IVR)
native, 83–84
nondefault native, 314–315
switch ports, 73–75
on trunks, 78–79
verifying, 72–73
virtual MAC addresses, 283
virtual private networks (VPNs), 251–253
virtual routers, 285
virtual services in cloud resources, 13–14, 13
vlan command, 71
VLAN Trunk Protocol (VTP), 79–80
operation modes, 80–81, 80
transparent mode, 71, 80–82
VTPv2, 81–82
VLANs. See virtual LANs (VLANs)
voice
access ports, 75–76
QoS, 262–263
VPNs (virtual private networks), 251–253

W

WALK messages in SNMP, 362
Warning severity level in syslog messages, 365
weighted fair queuing (WFQ), 266
weighted fair scheduling, 265
weighted random early detection (WRED), 266
WFQ (weighted fair queuing), 266
wide area network (WAN) technologies, 226
access connectivity options, 248–253, 249, 252–253
BGP. See Border Gateway Protocol (BGP)
GRE, 241–246, 241–242
PPP. See Point-to-Point Protocol (PPP)
PPPoE, 239–240, 239
QoS, 259–263, 261–262, 264–267
topologies, 246–248, 246–248
VPNs, 251–253
wildcards
access lists, 317–319
OSPF, 147–150, 149
window field in TCP segment, 7
wireless controllers, 10–11
workgroup layer, 16–17
WRED (weighted random early detection), 266

Z

Zero Touch Deployment, 339
