SUBJECT INDEX

Page references followed by fig indicates an illustrated figure; followed by t indicates a table; followed by e indicates an exhibit.

A
Abraham Fund for Jewish-Arab Coexistence, 1081–1082
Abu Sayyaf Group (Philippines), 775
Accountability: BSA-LGBTA community conflict and, 646; creating complementary processes to address postagreement, 759; integration-adaptation model on strategies for, 643t; multiculturalism conflict management, 641–642; potential trade-offs between inclusion during conflict phases and, 753–754; as remedy for bias, 271
Accuracy: BSA-LGBTA community conflict and, 645; individual level of reading multiculturalism situations, 638; integration-adaptation model on strategies for, 643t; negotiation motivation, 545–546; organizational level of reading multiculturalism situations, 638–639; processing motivation, 539–542
Acknowledgment of suffering, 986–987
Action evaluation research initiative, 1076–1077
Action science: to examine gap between stated and realistic behavior, 561; mapping possible set of causal links in Sue’s case, 572e; sexual harassment in the workplace map using, 573t
Actions: bungling, 4; effective, 4; substitutability of, 4, 5; three types of nonviolent, 26
Active unconscious, 402
Acts of protest, 26. See also Nonviolent struggle
Adaptivity: BSA-LGBTA community conflict and, 645–646; individual level of reading multiculturalism situations, 639–640; integration-adaptation model on strategies for, 643t; organizational level of reading multiculturalism situations, 640–641
Administrative Dispute Resolution Act (1990), 822
Adolescence development: educators for social responsibility and, 457; raising inclusively caring children with moral
courage, 991–992; role of conflict in, 456–457; stage theories of, 453–456
Adult learning theory: action science, experiential learning, and reflection contributions to, 561–562; Dewey’s learning from experience contribution to, 559; Mezirow’s critical reflection and “habits of mind” contribution to, 559–560
Adulthood development: conflict coaching for the individual, 459–460; on conflict resolution skills, 457–458; fifth-order consciousness, 459; fourth-order consciousness, 459; role of conflict in, 458–459
AEIOU communication behavior, 861–863
Afghanistan War, 345
Aggression: bullying, 687; defining, 681–683; implications for practice related to interventions for, 693–699; nonviolent vs. violent responses to, 697–699; sometimes confused with assertion, 682; structural violence and, 150–151, 691–692; violence and resistance response to, 698–699. See also Violence
Aggression interventions: conflict resolution programs to change behavior, 695–697; deescalation, 694–695; perspective taking, 693–694; self-reflection, 693
Aggression theories: aggression and violence as frustration, 685–686; biological, 683–684; cultural theories of aggression and violence, 689–691; moral theories on aggression and violence, 687–689; personality, 684–685; social learning and behavior, 686–687
Agreeableness personality dimension, 419–420
Agreement Circumplex: dimensions of the subtypes, 497–499; eight basic types of products in the, 499–503; illustrated diagram of, 495fig; main types of agreements, 496–497
Agreements. See Integrative agreements
Airplane hijackings, 772, 777, 784–785
Al Qaeda, 339, 767, 769, 770, 774, 780
Alcoholics Anonymous, 520
Algerian colonization era, 698
Allocation biases: egocentrism and fairness, 264–266; reactive devaluation, 266–267, 292
Alternative dispute resolution (ADR) systems, 822, 823
Alternatives to Violence Project, 694
Altruism born of suffering, 981
Americans for Indian Opportunity, 607
AmericaSpeaks, 923, 925fig, 926–927
Amygdala: emotions and the role of, 287–288; hot reactions of the, 315–316
Analitical reasoning, 273–274
Analogy learning, 1073–1074
Anchoring: as cognitive bias, 216
Anger-conflict interactions, 291–292, 867–869
The Angry Roommates study, 839
Anterior cingulate (ACC), 288, 290
Anxiety: intrapsychic conflict and, 403–407; safety needs to be free from, 411
Apartheid (South Africa), 285, 293, 302, 732
Applied linguistics (AL), 186
Appreciative inquiry (AI): description of, 189–190; research on conflict resolution and, 190–191
Appreciative Inquiry Summit, 923, 925fig
AQIM, 770
Al-Aqsa Martyrs brigades (Palestinian nationalist movement), 766
Arab-Israeli conflict. See Israel-Palestinian conflict
Argentina: blanket pardons for perpetrators of the disappearances in, 985; Nunca Mas report (1986) on disappearances in, 983
Armenia-Azerbaijan conflict (1994), 1027
The Art and Science of Love (ASL), 911–912, 914–919
The Art of Powerful Non-Defensive Communication (Ellison), 191
Arts-based conflict resolution approaches, 595–597
Arusha Accord, 1029
Assertion, 682
Assertiveness of mediators, 831
Attack conflict resolution strategy, 423
Attitude change: constructive controversy benefit of positive, 89–90; humanizing and developing positive orientation of the other, 51–52, 981–982; psychological factors affecting the, 519–527. See also Perspective taking
Attitudes (cathexis): cooperation-competition theory on role of, 4, 5–6; definition of, 5; pathologies of, 11
Attribution theory, 292
Authoritarianism, 145
Authority (BART system), 955
Avoidance, 405
Avoidance conflict resolution strategy, 423
Awareness: BSA-LGBTA community conflict and, 644–645; individual level of multiculturalism, 636–637; integration-adaptation model on strategies for, 643; organizational level of multiculturalism, 637–638

B
“Bargaining in the shadow of the law” phenomenon, 756–757
BART system: Case of Pink Power using the, 955–958; components of, 954–955; joining Well’s taxonomy of group conflict with, 964–966
BATNAs (best alternative to a negotiated agreement): attribution error during, 262; dealing with power differences through use of, 807; defining the, 799–800; developing autonomy through, 160; reaching a settlement, 804–805. See also Outcomes; Solutions
Beckhard’s managed change model, 518
Behavior: malignant social processes and, 720–721; mediator, 824–831; normalization of hostility and violence, 722; regulated by feedback loops, 289; role of framing in moral, 303; scope of justice influence on, 688–689
Behavior change: conflict resolution programs to, 695–697; self-reflection used for, 693. See also Change process; Perspective taking
Belongingness and love needs, 411
Berlin Wall fall (1989), 1043
Betrayal process, 910–911
Biased punctuation of conflict, 262
Biases: of cognition, 257–260; definition of, 256–257; systematic processing and sources of, 538–539. See also Negotiator bias
Biological theories of aggression and violence, 683–684
Bisexuals. See LGBTQ community
Black Stone of Mecca story, 490
“Black widows” suicide terrorists, 769
Blaming communication, 889
Blind Trust (Volkan), 293
Bonn Agreement (2002), 747
Bottom-up power, 141
Boy Scouts of America (BSA): accountability and the, 646; background information on, 642; 1-AM used to examine LGBTQ community conflict with, 642, 644–647; “Open Letter to America’s Families” sent out by, 645
Boycotts, 1054. See also Nonviolent struggle
Boycotts and the Labor Struggle (Laidler), 1052
Brain: amygdala of the, 287–288, 315–316; anterior cingulate (ACC) of the, 288, 290; orbital frontal cortex of the, 288; self-regulation and hot reactions of the emotional, 314–316; ventromedial frontal cortex (VMFC) of the, 288
Bridging Cultural Conflicts (LeBaron), 584
Bridging solutions, 207, 500–501, 804
Bringing Baby home (BBH) workshop, 909, 912
Bringing Peace into the Room (Bowling and Hoffman), 582
Broaden-and-build model, 301–302
Brooklyn Friends School (BFS), 66–69
Brown v. Board of Education, 56
Bullying, 687
Bungling actions, 4
Burton’s human needs theory, 412

C

Calculus-based distrust (CBD): characterizing relationships based on, 113–115; description of, 112; strategies to manage, 116–117
Calculus-based trust (CBT): actions that build, 115–116; characterizing relationships based on, 113–115; Chutes and Ladders game as metaphor for, 107–108; description and formation of, 106–107, 112; managing violations of, 120; repairing, 121–126; required for creating trust in a relationship, 126–127
Caring justice framework, 58
Catalyst, 637
Cathectic. See Attitudes (cathectic)
Causal modeling, 1070–1072
Center for Cognitive Liberties, 285
Centers for Disease Control and Prevention, 285
Change agents: conflict resolution practitioners developing skills as, 1116–1117; fostering commitment of, 530; generating motivation, 528–529; identifying and handling resistance, 529
Change process: for changing collective memories and toward shared views of history, 983–984; considering the relationship between conflict and, 513–514; context of intractable conflicts bringing instability and, 717–718; coordinating attention to short-term violence and long-term structural changes, 754–755; implications for training, 528–530; nonviolent struggle to bring about, 1043–1056; psychological factors affecting the, 519–521; the theoretical conceptions of the, 514–518. See also Behavior change
Change process factors: gaining commitment, 526–527; motivation and unfreezing, 519–521; movement and resistance, 521–526
Change process theory: Beckhard’s model for managing planned change, 518; Lewin’s unfreezing framework, 514–518
Change resistance: additional factors which may increase, 523; change agent’s role in identifying and handling, 529; conflict and, 522–523; constructively handling, 524–526; movement stalled by, 521–522; when movement overwhelms, 526
Checkpoint Watch (Keshet), 60
“Chicken game” negotiation, 772–773
Childhood development stages: egocentric, impulsive stage, 436–437; egocentric orientation, 435–436; Kohlberg moral development, 433, 434t–435t; neuroscientific contributions to, 437–438; Piaget’s social cognitive approach to, 433t; post-Piagetian theories on, 437; proproational, 433t
China: cooperation-competition theory used to examine conflict in, 654–671; leadership in the hierarchical society of, 665
Chinese cooperation-competitive studies: cooperation, open-minded discussion, and effectiveness experiments, 659–660; cooperation, open-minded discussion, and effectiveness surveys in Chinese organizations, 660–661; cooperative conflict between organizations, 661–662; cross-cultural, 662–663; developing conflict resolution theory through the, 666–670; findings on Chinese values for conflict management in China, 663–665; research methods used during, 656–659
Chinese society: antecedents to cooperative goals in, 666; becoming a cooperative conflict team in context
subject index

Civil disobedience, 93–94. See also Nonviolent struggles

Civil Disobedience (Thoreau), 94

Civil disobedience, 93–94. See also Nonviolent struggles

Collective memories, 983–984

Commitment: ability to forgive dependent on relationship, 124–125; change process and gaining, 526–527; fostering change agent’s, 530

Communication: AEIOU communication behavior, 861–863; of conflict resolution research findings, 1032–1034; constructive communication (CC) approach to, 192–195; cooperation-competition theory on, 7; cosmopolitan communicative virtuosity of, 302–303; creating new social worlds made from dialogic, 895–896; dialogic paradigm of, 177–178; elements of the process of, 877, 878; encoding-decoding paradigm of, 169–171; establishing supportive conditions for, 178; form versus substance of, 178–179; internationalist paradigm of, 171–174; peace linguistics, 182–199; perspective-taking paradigm of, 174–176; “silent seething,” 322–323; universal acknowledgement on importance of, 168; war model of, 191–192. See also Dialogue; Messages

Communicative inquiry project, 873

Collaboration: comparing individual creative solutions with, 480–482; egg drop exercise on creative, 481–482; large group intervention methods for embedding new patterns of, 939; negotiation culture for, 372

Collaborative inquiry project, 873

Communication problems: during conflict, 888–889; medium as remedy for bias, 272; preventing and overcoming, 889–895; unwanted repetitive patterns (URPs), 888–889, 895, 896

Communication process elements: context, 878fig; culture, 879, 879fig; meaning making through relationship, 878fig, 879; other, 878fig; self, 878fig

Commission of the African Union (AU), 757

Columbia: FARC (Fuerzas Armadas Revolucionarias de Colombia) violence in, 748–749, 753, 755, 766, 768, 771, 776, 783; guerrilla war (1960s to 2007) in, 748–749; human rights and negotiations agendas in, 748–749; peace-building efforts in, 748–749, 755

Columbine High School massacre, 684

Commemorations for healing, 979–980

Codex, 943

Cognition biases: anchoring, 257–258; decision fatigue, 259; fixed-pie perception, 259–260; framing, 258

Cohesiveness: groupthink driven by, 78, 237–238; as source of intergroup conflict, 237

Collaboration: comparing individual creative solutions with, 480–482; egg drop exercise on creative, 481–482; large group intervention methods for embedding new patterns of, 939; negotiation culture for, 372

Collaborative inquiry project, 873

Communication: AEIOU communication behavior, 861–863; of conflict resolution research findings, 1032–1034; constructive communication (CC) approach to, 192–195; cooperation-competition theory on, 7; cosmopolitan communicative virtuosity of, 302–303; creating new social worlds made from dialogic, 895–896; dialogic paradigm of, 177–178; elements of the process of, 877, 878fig–879; encoding-decoding paradigm of, 169–171; establishing supportive conditions for, 178; form versus substance of, 178–179; internationalist paradigm of, 171–174; peace linguistics, 182–199; perspective-taking paradigm of, 174–176; “silent seething,” 322–323; universal acknowledgement on importance of, 168; war model of, 191–192. See also Dialogue; Messages

Communication problems: during conflict, 888–889; medium as remedy for bias, 272; preventing and overcoming, 889–895; unwanted repetitive patterns (URPs), 888–889, 895, 896

Communication process elements: context, 878fig; culture, 879, 879fig; meaning making through relationship, 878fig, 879; other, 878fig; self, 878fig

Communicaty Leadership Center (CLC), 886

“Community game,” 257
Comparative case analysis: framework for, 1075; of interactive conflict resolution, 1075–1076
Compensation (nonspecific) solution, 502, 803
Competition: Chinese cultural studies on avoidance of conflict and, 667; constructive and destructive, 9–11; cooperation-competition theory on effects of, 6–9; democratic governance and fair, 10–11; initiating, 12–14; situational model of power and conflict and role of, 155–159
Competitive orientation: comparing cooperative and, 3; as source of integrative negotiation impasse, 806
Complementary movement, 759
Comprehensive Peer Mediation Evaluation Project (CPMEP), 1077–1079
CompStat's New York City Police Department project, 520–521
Concurrence seeking: constructive controversy theory on process of, 78, 79t; description of, 78; structuring, 81–82; theoretical assumptions for creating outcomes through, 85–86
Con-div group dynamic: conflict management process and role of, 348–349; description of the, 335/fig–336; during Iraq War, 338–340
Conference Model, 929–930
Confidence: confidence/warmth-conflict interactions, 298–301; social learning theory on, 412–413
Conflict across Cultures (LeBaron and Pillay), 584
Conflict coaching, 459–460
Conflict Intelligence: Harnessing the Power of Conflict and Influence (Coleman and Ferguson), 160
Conflict management: using fair rules for, 52; measures of conflict style used for, 421; of trust and distrust, 115–129. See also Conflict resolution
Conflict mapping: Mozambique conflict and peace process, 728, 729/fig; useful for identifying aspects of social systems, 730
Conflict resolution: as collaborative effort, 467; conflict within the field of, 1119–1121; cooperation-competition theory implications for, 19–21; direct social psychological approaches to, 385–386; encouraging innovation in, 1122; examining interconnectedness of peace, language, and, 182–186; gender differences and, 355–375; global cooperative interdependence challenge for, 1122;
implications of applied peace linguistics to, 186–195; importance of point of view in, 471–476; indigenous knowledge and practice for, 604–620; indirect social psychological approaches to, 386–389; intergroup conflict intractability and resistance to, 239–240; intractability as powerful psychological barrier to, 239–240, 384–385; learning to learn about, 1121–1122; multiple motives for, 543–548; neuroscience as a resource for, 591–592; overcoming judgmental biases in, 255–276; persuasion during, 533–553; PSDM model of, 204–227; readiness for, 1095–1097, 1114–1116; situation versus personality influence on, 423–425; task-oriented learning-mastery orientation toward, 302; training for inventing solutions for, 52–53. See also Conflict management

Conflict resolution education: about conflict and conflict resolution, 990–991; ICCCR’s role and commitment to, 1111–1113; implications of peaceful language for, 195–198; language in peace-building teacher education, 198

Conflict resolution initiatives (CRI)s: action research on, 1064–1065; basic research questions on, 1062; consumer research on, 1064; developmental research on, 1062–1063; evaluation of, 1074–1083; examining, 1061–1062; field research on, 1063–1064

Conflict resolution initiatives (CRI)s research: audiences for, 1065–1069; different types of, 1062–1065; for evaluating CRI, 1074–1083; strategies used for, 1069–1074

Conflict resolution motives: accuracy motivation, 545–546; defense motivation, 546–547; impression motivation, 547–548; social motivation, 544–545

Conflict Resolution Network (CRN), 1116

Conflict resolution practitioners: change process implications for, 528–530; cooperation-competition theory implications for, 21–27; CRI research implications for, 1067–1068; cultural fluency implications for, 597–599; developing change agent skills, 1116–1117; implications of multiple motives of conflict resolution for, 548; knowledge of systematic forms of injustice in society, 45–47; situated model of power and conflict implications for, 159–162; workshop for teaching conflict resolution skills to, 849–875

Conflict resolution programs: diagnosis of the problem, 695; ethical difficulties, 697; evaluation, 696–697; intervention, 696. See also specific program

Conflict resolution research: applying findings of, 1034–1037; audiences for, 1065–1069; case studies: emic, qualitative, 1024t, 1025–1029; case studies: etic, quantitative, 1024t, 1029–1031; communicating findings of, 1032–1034; on conflict resolution initiatives (CRI), 1061–1083; Gottman lab on marriage and divorce, 899–919; growing interest and trends in, 1020–1024; learning gains from, 1037–1039; recent findings on negotiation, 1097–1198

Conflict resolution research audiences: executives and administrators, 1066–1067; funding agencies, 1065–1066; practitioners, 1067–1068; researchers, 1068–1069

Conflict resolution research strategies: Appreciative inquiry (AI), 190–191; causal modeling, 1070–1072; experience surveys, 1072–1073; experimental and quasi-experimental, 1069–1070; learning by analogy, 1073–1074; survey research, 1072; time series analysis, 1026–1028

Conflict resolution research types: action research, 1064–1065; basic research, 1062; consumer research, 1064; developmental research, 1062–1063; field research, 1063–1064

to teach, 443–445; middle childhood development of, 445–453; self-control, 442; workshop for learning, 849–875

Conflict resolution strategies: for addressing aggression and violence, 693–699; arts-based approaches and, 595–597; attack, 423; avoidance, 423; contending, 422; naive, 457; neuroscience to understand process of conflict, 591–595; personality influence on, 421–422; self-affirmation, 550–551; situation versus personality influence on, 423–425; social network role in, 1009–1010. See also Negotiation strategies

Conflict Resolution: Strategies for Collaborative Problem Solving workshop: AEIOU communication behavior, 861–862; AEIOU communication behavior taught during, 861–863; attitude objectives of the, 853–854; case study examples on the effectiveness of the, 871–875; Coleman Raider “Bare-Bones” Model of Stages of Negotiation, 863–865; Coleman Raider Filter Check Model, 866fig–867; Coleman Raider Mediation Model, 869fig–870; Coleman Raider Negotiation Planning Form: A Community Dialogue, 858fig; Coleman Raider Reframing Formula, 856–860; Coleman Raider Resolution Continuum, 855fig; knowledge objectives of the, 852–853; overview of the, 851–852; seven workshop modules of the, 854–870; skills objectives of the, 853

Conflict resolution training: for addressing aggression and violence, 693–699; change process implications for, 528–530; cooperation-competition theory implications for, 21–27; cultural fluency implications for, 597–599; Dynamical Systems Theory (DST) implications for, 738–739; enlarging the scope of one’s moral community, 47–48; on forgiveness and reconciliation, 48–52; implications of multiple motives for, 548; to increase empathy, 48; intergroup conflict, 245–249; on inventing solutions, 52–53; justice and conflict interactions and implications for, 45–53; knowledge of systematic forms of injustice in society, 45–47; mediation implications for, 841–843; PSDM model of conflict resolution implications for, 224–227; research on Chinese cooperative conflict team, 668; situated model of power and conflict implications for, 159–162; substantive content of, 23; workshop for teaching conflict resolution skills, 849–875. See also Mediators

Conflict resolution workshop: the Coleman Raider design for, 851–875; insights from practice for teaching a, 849–850

Conflict situations: conflict resolution influenced by personality vs., 423–425; constructive controversy, 77–101; managing trust and distrust in, 115–129; PSDM model process applied to, 220–224. See also Social situations

Conflict Style Inventory, 358

Conflict symbolism, 718

Conquest of Violence (Bondurant), 1053

Conscientiousness personality dimension, 419

Conscientization, 296

Constructive communication (CC): how to writing constructively, 193; for interacting positively, 192–193; research on, 194–195

Constructive competition, 9–11

Constructive conflict resolution: reframing, 15–16; values underlying, 18–19

Constructive controversy: benefits of, 86–90; concurrence seeking, debate, and individualist learning during, 78; conditions determining the constructiveness of, 90–93; deliberate discourse for, 77; democracy and role of, 100–101; description of, 77–78; gender preference when choosing a strategy for, 358–359; processes of interaction during, 82–93; structuring, 78–82, 93–100

Constructive controversy benefits: attitude change about the issue, 89; changed attitudes toward controversy and decision making, 89–90; cognitive reasoning, 88; creativity, 88–89; enhancing self-esteem, 90; improved decision making, problem solving, and learning, 87–88; interpersonal attraction and
support among participants, 90; motivation to improve understanding, 89; perspective taking, 88
Constructive controversy processes: concurrence seeking, 78, 79t, 81–82, 85–86; theoretical assumptions of, 82–85
Constructive controversy requirements: cooperative goal structure, 91; rational argument, 93; skilled disagreement, 91–93
Constructive controversy theory: on controversy and concurrence seeking processes, 78, 79t; on structuring the situation, 78–82
Contact hypothesis, 299
Contending conflict resolution strategy, 422
Context: consideration of dialogue, 881–882; cooperative, 667–670; dialogue thought of as, 879; as element of communication, 878
Contextual mediator interventions, 829–830
Contingent mediation, 1099–1101
Control and defense mechanisms, 402, 404t, 405–406
Controversy: constructive, 76–102; theory of, 80
Cooperation strategies: moral values appeal, 24; self-actualization appeal, 24–25; self-interest appeal, 24
Cooperation-competition theory: applied to China, 654–671; on effects of cooperation-competition, 6–9; implications for managing conflict, 19–21; implications for understanding conflict, 14–19; on positive or negative goal interdependence, 4–5; on social psychological processes, 4–6
Cooperation-competition theory implications: importance of cooperative orientation, 15; for managing conflict, 19–21; on norms of cooperation, 16–18; reframing constructive conflict resolution, 15–16; on social context of application, 22–27; on social context of learning, 22; for training, 21–27; on values underlying constructive conflict resolution, 18–19
Cooperative conflict teams: Chinese cultural studies on, 667–669; for cross-cultural teamwork, 669–670; research on training for, 668
Cooperative context: description of, 79; structuring concurrence seeking by establishing, 82
Cooperative Home Care Association (CHCA), 71
Cooperative orientation: comparing competitive and, 3; cooperation-competition theory on importance of, 15
Cosmopolitan communicative virtuosity, 302–303
Cost cutting solution, 207, 501–502, 804

Counterphobic defenses, 406
Couples’ conflict intervention: challenges involved in, 898; stage 1: discovery of reliable patterns of interaction, 899–901; stage 2: prediction and the replication of the predication, 901–905; stage 3: theory building, understanding, and prevention and intervention, 905–911; study of gay and lesbian couples, 905; summary of effectiveness evidence for prevention and, 911–919
Couples’ interactions scoring system (CISS), 900
Couples Together Against Violence (CTAV), 910, 912
Creative Response to Conflict (CRC), 452–453
Creative solutions: ability to see other’s point of view, 506; developing novel point of view, 479–480; egg drop exercise, 481–482; encouraging conflict resolution innovation and, 1122; general guidelines for developing, 482–487; individual compared to collaborative, 480–482; playfulness as part of the process, 480; techniques for stimulating novel ideas for, 487–488; time required to develop, 480
Creative solutions guidelines: adequately define the problem, 486–487; challenge the myths about creativity, 482–483; develop a serious but playful atmosphere, 484; foster confidence to take risks, 485; foster optimal tension, 484–485; have appropriately phased divergent and convergent thinking, 485–486; use time and space arrangements to prepare creative oasis, 483–484
Creativity: conflict resolution through efforts of, 467–468; constructive controversy facilitation of, 88–89; encouraging conflict resolution innovation and, 1122; evolving systems approach to conflict resolution, 468–471; play ethic and, 470; resulting from conflict, 478–488, 490–508; shadow box experiments, 471–475; techniques for stimulating, 487–488; time and irreality of, 470, 506
Creativity in conflict perspectives: creative products from creative persons in a creative process, 504–507; creative products of integrative agreements, 495–503; integrative agreement as creativity, 492–494; overview of the person, process, and product, 491
Criminal terrorist groups, 767–768
Critical reflection, 894–895
Crude Law of Social Relations, 12–14, 239, 302, 683
Cuban missile crisis, 269
Cultural differences: aggression and violence responses to, 691; Chinese vs. Western, 691; Coleman Raider Filter Check Model on, 866–867; negotiation bias related to, 266; perception of fairness and, 266; readiness for conflict resolution and issues of, 1117–1119
Cultural fluency: building, 587–591; capacities enhanced by, 584, 585–586; conflict and conflict resolution context of, 585–587; description of, 584; elements of cultural intelligence (CQ) related to, 587; implications for conflict resolution pedagogy, 597–599; implications for theory and practice, 599; meaning-making processes and, 584–585; neuroscience to better understand, 591–595
Cultural framing of dialogue, 892
Cultural imperialism: cultural reconstruction of “differences” under, 41; definition of, 30; double identity of culturally dominated groups under, 42
Cultural intelligence (CQ): definition of, 587; four elements related to cultural fluency, 587
Cultural theories of aggression and violence, 689–691
Culture: collaborative negotiation, 372; comparing multiculturalism and, 630–631; cooperation-competitive studies of Chinese, 654–671; defining, 583–584; as element of the communication process, 879, 879; human security by increasing cultural diversity, 305; interrelatedness between conflict and, 581–583, 730–731, 865–867; justice sustained by peaceful, 700; power distance dimension of, 148–149; of terrorist groups, 773–774
Cyberbullying, 1003
Cycles of humiliation, 295–296

D
Dayton Accords (1995), 747
The Decent Society (Margalit), 297
Decision fatigue, 259
Decision makers: groups as, 98–100, 217–220; individual as, 214–217
Decision making: constructive controversy and improved attitudes toward, 90; constructive controversy
and improved quality, 87–88; PSDM model integrating problem solving and, 204–227; destabilizing through dynamic adaptivity of, 737–738; risk of, 216–217; structuring constructive controversy for, 97–100. See also Group decision making

Deep structure of power relations, 148

Deescalation strategies, 694–695

Defense and control mechanisms, 402, 404, 405–406

Defense motivation of conflict resolution, 546–547

Defense processing motivation, 539–542

Delay of gratification, 311–312, 318–319

Deliberate discourse, 77

Democracy/democracies: civil disobedience role in, 93–94; conflict resolution techniques rooted in goals of, 615; constructive controversy role in, 100–101; historic evidence on willingness to negotiate with terrorism, 774–775; power of constructive conflict as driving, 100–101; reconciliation role played by fair institutions of, 988–990; respect and recognition concepts of, 616–617

Denial, 405

Destructive competition, 9–11

Deutsch’s Crude Law of Social Relations, 12–14, 239, 302, 683

Dewey’s learning from experience, 559

Dialogic communication: stage 1: preparation, 890–892; stage 2: in the moment, 892–894; stage 3: reflection, 894–895

Dialogic paradigm of communication: on focusing on establishing conditions for communication, 178; overview of, 177–178

Dialogue: additional uses of, 886–887; approaching communication through, 879–882; Buberian, 880; consideration as relationship, event, or context, 881–882; creating new social worlds made from, 895–896; different meanings of, 879; having a dialogue form of, 880–881; I-It relationships expressed in, 284–285, 880; I-Thou relationships expressed in, 284–285, 305, 880; preventing and overcoming problems in communication during, 889–895; problems in communication during conflict, 888–889; as techniques used to create space for co-inquiry, 881. See also Communication; Information processing

Dialogue processes: Public Conversations Project (PCP), 885–886; sustained dialogue, 882–883; world Café, 884–885
