1 Research Methods    1
Julian A. Rubel and Wolfgang Lutz
Introduction    1
Research on the Frequency, Cause, and Prevention of Psychological Problems, and Disorders    1
   Epidemiology    1
   Etiology and Analytical Epidemiology    2
   Prevention    3
Evaluating Clinical Interventions and Treatments    3
   Does the Intervention Work?    4
   Quantifying the Effects of an Intervention    6
   Integrating the Results from Multiple Studies—Meta-analyses    7
   Is the Intervention Effective for this Specific Patient?    8
   How, for Whom, and under which Conditions do Clinical Interventions Work?    10
Summary    12

2 Classification Systems across the Globe    15
Jan Christopher Cwik and Jürgen Margraf
Introduction    15
Classification Systems in Western Cultures    16
   Atheoretical Classification Systems    16
   The Diagnostic and Statistical Manual of Mental Disorders (DSM)    16
   The International Classification of Diseases, Injuries and Causes of Death (ICD)    17
Classification Systems in Non-Western Cultures    19
   The Chinese Classification of Mental Disorders (CCMD)    20
Specific Classification Systems    22
   Specific Categorical Classification Systems    22
   Specific Noncategorical Classification Systems    23

3 Clinical Interviewing with Adults    29
Christopher C. Conway, Michelle L. Bourgeois, and Timothy A. Brown
Introduction    29
Goals of the Clinical Interview    29
