Steam trap, in steam condensate recovery, 179–180
Steam turbines, 100. See also Turbines
  accident with over-speed, 256
  controlling, 167–173
  hand valves for, 167, 169–172
  over-speed trip on, 172–173
  problems with, 205–206
  retrofitting for automatic speed control, 172
  theory of, 167–169
  wet steam and salt deposits in, 217
  driven pumps, 99–100
Steam valve, in controlling asphalt viscosity, 81–83
Strippers
  control of, 55, 60
  constant, 55
  efficiency, 60
  pressure, 58
Stripper tower, in deaeration, 226
Stripping, wet steam and, 216
Stripping steam rate, in controlling, 59
  asphalt viscosity, 81–83
Stripping trays, de-ethanizer reboiler control and, 80
Subcooling, of steam condensate, 185–186
Suction filter, 160
Suction head pressure, nonlinear response to, 273
Suction pressure
  in air blowers, 153–154, 156
  centrifugal pump control and, 159–161
  level control vs., 159–161
Suction pressure control
  origination of, 161
  for variable-speed pumps, 162–163
Suction pressure tap, 160
Suction pressure transmitter, in control valve safety enhancement, 130
Suction screen, pump pressure sensing point and, 160
Suction set point pressure, determining, 161–162
Suction throttle valve, wet gas compressor and, 156–158
Suction throttling
  flow control via, 147
  limitations on, 154–155
  pressure control, 155
Sulfur deposits, in automatic temperature control, 92
Sulfuric acid plant booster blower, problems with, 206–210
Sulfur plant furnace, temperature monitoring for, 17
Sulfur recovery plant
  centrifugal compressor at, 151–158
  steam turbines at, 170
Superheated steam, 215–216
Surge control, 162
Surge, in centrifugal compressors, 119, 151–158, 195
Surge point, in air blowers, 153
Synergism, 284

Taps, plugging of, 243
Temperature, 281. See also Heat; High temperature trips; Mollier diagram; Trip temperatures in combining noncondensable vapors and total condensation, 48–49 combustible analyzers and, 93–96 in combustion air control, 94–96 in condensate level control, 182 condenser and refrigerant, 31 as dependent variable, 26 in diesel oil draw-off, 78–79 in distillation, 26–27 forced condensation dew point, 268–269 hot vapor bypass control and, 46–48 of kettle waste heat boiler, 223–224 measuring, 12–16, 244–245 measuring liquid level and, 233–234 override control for, 129 in oxygen analyzer air control, 90 in refrigeration, 66–67 in saturated steam moisture capture, 221
Temperature control, automatic, 91–93
Temperature control valve (TRC), 104. See also TRC set point on fired heaters, 129 full flooding and, 72–73 in tower pressure control, 52
Temperature drop, in isenthalpic expansion, 220–221
Temperature indication (TI), 14. See also TI point temperature
Temperature indicators, 254 in temperature monitoring, 16
Temperature points, 16
Temperature probe, temperature measurement via, 245
Temperature profile, optimizing fractionation efficiency by, 69–76
Temperature response curve, wash water and, 268–269
Testing (test procedures). See also Field testing alarm points and trip parameters and, 247, 249–250 of high temperature trips, 254 of level trips, 253 of liquid level alarms, 252–253 of new pressure alarms, 249–250 safety and, 206–210
Thermal cracking, 192, 193
Thermal cracking endothermic heat of reaction, 192
Thermocouple assembly, temperature measurement via, 244–245
Thermocouples, 14–15 for kilns, 16 velocity, 16
Thermocouple length, 280–281
