I Processes in Marine and Freshwater Biofouling

i Larvae and Spores

Chapter 1 Reproduction and Larvae/Spore Types 1
Jon N. Havenhand and Craig A. Styan
Introduction 1
Some Terminology 2
Asexual Production of Propagules 3
Sexual Reproduction – Mechanisms Facilitating Fertilisation 5
Demographic Effects on Fertilisation Success – Allee Effects 7
Environmental Factors Affecting Fertilisation 8
Links Between Fertilisation and Subsequent Larval Attributes 8
Hatching and Development 9
Mobility and Survival of Larvae/Spores 10
Carry-over Effects 10
Conclusions 11
References 11

Chapter 2 Larval Supply and Dispersal 16
Christopher D. McQuaid and Karen Miller
Introduction 16
The Significance of Scales of Larval Dispersal 16
Factors Influencing Dispersal Scales 18
Estimating Dispersal 21
Practical Consequences of Dispersal Scales 22
Conclusions 24
References 24

Chapter 3 Settlement and Behaviour of Marine Fouling Organisms 30
Gabrielle S. Prendergast
Introduction 30
Cues 31
Contents

Planktonic Propagules 32
Inert Surface Encounter, Followed by (Active?) Attachment or Rejection 45
Behavioural Surface Encounter, Exploration and Attachment or Rejection 46
Conclusions 51
References 51

ii Fouling Community Processes

Chapter 4 Succession on Hard Substrata 60
Stuart R. Jenkins and Gustavo M. Martins
Introduction 60
Succession and the Role of Disturbance 60
Models of Succession 62
Extension of General Models 63
Life History Characteristics 64
Patch Characteristics 65
Mode of Colonisation 66
Seasonality 67
Variable Endpoints of Succession 67
Conclusions 68
References 69

Chapter 5 Patterns of Fouling on a Global Scale 73
João Canning-Clode and Martin Wahl
Background 73
Is There a Latitudinal Cline in Fouling Organisms? 74
The Pattern Revealed by a Global Modular Fouling Experiment 76
Are Biofouling Communities Saturated? The Relationship Between Local and Regional Diversity 80
Discussion and Future Perspectives 81
Conclusions 83
Acknowledgements 83
References 83

Chapter 6 Biofouling Patterns with Depth 87
Phillip R. Cowie
Introduction 87
Major Forcing Factors Determining Subtidal Sessile Assemblages 89
Patterns of Vertical Zonation on Natural Substratum Subtidal Communities 92
Patterns of Vertical Zonation in Biofouling Communities on Man-made Structures 94
Conclusions 95
References 96
iii Epibiosis and Anti-epibiosis

Chapter 7 Epibiosis
Martin Wahl

Sessile Mode of Life
Consequences of Epibioses
Distributional Patterns of Epibioses
Conclusions
References

Chapter 8 Natural Control of Fouling
Rocky de Nys, Jana Guenther and Maria J. Uriz

Biofouling and Its Biological Consequences
Defence Mechanisms Against Biofouling
Conclusions
References

iv Introduction to Microbial Fouling
Sergey Dobretsov, Anna M. Romaní, David A. Spratt, Derren Ready and Jonathan Pratten

Chapter 9 Marine Biofilms
Sergey Dobretsov

Biofilm Development
Composition of Microbial Biofilms
Biofilm Dynamics
Signalling in Biofilms
Prokaryote–Eukaryote Interactions in Biofilms
Conclusions
Acknowledgements
Dedication
References

Chapter 10 Freshwater Biofilms
Anna M. Romaní

Introduction
Structure and Architecture of Freshwater Biofilms
Biofilm Biomass
Biofilm Metabolism and Its Role on the Aquatic Food Web
Dynamic Structure–Function in Freshwater Biofilms
Conclusions
Acknowledgements
References

Chapter 11 Biofilms in Medicine
David A. Spratt, Derren Ready and Jonathan Pratten

## II Biofouling Processes in Industry

### Chapter 12 Fouling on Artificial Substrata
*Antonio Terlizzi and Marco Faimali*

- The Influence of the Nature of Artificial Substrata on Fouling Assemblages  | 170  |
- Environmental, Physical–Chemical and Biological Interactions During Fouling Colonisation of Artificial Substrata  | 171  |
- Man-made Structures as Extra Habitat for Biofouling Organisms  | 176  |
- Artificial Substrata for Biofouling Monitoring in Cooling Water Systems  | 177  |
- Conclusions                                                            | 179  |
- References                                                             | 179  |

### Chapter 13 Paint and Coatings Technology for the Control of Marine Fouling
*Alistair A. Finnie and David N. Williams*

- Introduction                                                            | 185  |
- Biocidal Antifouling Paints                                             | 186  |
- Non-biocidal Coatings                                                  | 193  |
- Paint Selection – Economic Considerations                              | 199  |
- Future Perspectives                                                    | 200  |
- Conclusions                                                            | 201  |
- References                                                             | 201  |

### Chapter 14 Fouling on Shipping: Data-Mining the World’s Largest Antifouling Archive
*Jeremy C. Thomason*

- Introduction                                                            | 207  |
- Digging the Data-mine                                                   | 208  |
- The First Nuggets                                                      | 210  |
- Conclusions                                                            | 213  |
- Acknowledgements                                                       | 214  |
- References                                                             | 214  |

### Chapter 15 Consequences of Fouling on Shipping
*Robert Edyvean*

- Introduction                                                            | 217  |
**Contents**

- Biofilms and Their Effect on the External Hull of Ships 218
- The Effects of Biofilms on The Internal Operating Systems of Ships 219
- The Effects of Biofilms in Water Systems 221
- Biofilm Effects in Fuel and Hydraulic Systems 222
- Other Areas of Biofilm Effects 223
- Conclusions 223
- References 223

Chapter 16  Consequences of Antifouling Coatings – The Chemist’s Perspective 226
*Dickon Howell and Brigitte Behrends*

- Introduction 226
- History of AF Technologies 227
- Constituents of Biocidal Coatings 227
- Biocides in AF Paints 228
- Distribution of Biocides in the Environment 237
- Conclusions 238
- References 239

Chapter 17  Consequences of Antifouling Systems – An Environmental Perspective 243
*Cato C. ten Hallers-Tjabbes and Simon Walmsley*

- Antifouling Systems 244
- Tributyltin – Behaviour and Fate in Natural Systems 244
- Environmental Risks Associated with AFS and Alternative AFS 245
- AFS Ecotoxicity 246
- AFS in the Presence of Other Contaminants 246
- Sensory–Behavioural Effects 247
- Conclusions 248
- References 248

Chapter 18  Fouling and Antifouling in Oil and Other Offshore Industries 252
*Henry M. Page, Jenifer E. Dugan and Fred Piltz*

- Introduction 252
- The Biofouling Assemblage 253
- Fouling Assemblage Development 258
- Ecological Effects of the Fouling Assemblage 259
- Novel and Exotic Species 260
- Economic Value of the Biofouling Assemblage 261
- Management of Biofouling and Economic Impacts 262
- Conclusions 263
- References 264

Chapter 19  Biofouling and Antifouling in Aquaculture 267
*Simone Dürr and Douglas I. Watson*

- The Cost of Fouling in Aquaculture 267
