1 Introduction to UMTS Networks 1
Patrick Chan, Andrea Garavaglia and Christophe Chevallier

1.1 UMTS Network Topology 2
   1.1.1 GSM Network Architecture 2
   1.1.2 UMTS Overlay, Release 99 4
   1.1.3 UMTS Network Architecture beyond Release 99 4

1.2 WCDMA Concepts 5
   1.2.1 WCDMA Physical Layer Procedures 6
   1.2.2 UMTS Signaling Concepts 9
   1.2.3 Physical, Logical, and Transport Channels 12

1.3 WCDMA Network Deployment Options 17
   1.3.1 1:1 Overlay with GSM, Macro Network 17
   1.3.2 1:1 Overlay with GSM, Macro, Micro, and In-Building 18
   1.3.3 WCDMA-Specific Network Plan 18

1.4 The Effects of Vendor Implementation 19
References 20

2 RF Planning and Optimization 21
Christophe Chevallier

2.1 Introduction 21
2.2 Overview of the Network Deployment Process 21
   2.2.1 Network Planning 21
   2.2.2 Initial Optimization 23
   2.2.3 Continuous Optimization 25

2.3 Link Budgets 25
   2.3.1 Uplink Link Budgets 26
   2.3.2 Downlink Link Budget for CPICH 36
   2.3.3 Downlink Link Budget for Various Services (Connected Mode) 37
   2.3.4 Uplink and Downlink and Service Comparison 47

5 Service Optimization

Andrea Forte, Patrick Chan and Christophe Chevallier

5.1 KPI and Layered Optimization Approach 153

5.1.1 Main KPI Definitions 153

5.2 Voice Service Optimization 156

5.2.1 Adaptive Multirate Codec 156

5.2.2 AMR Service 157

5.2.3 Call Setup, Events, and Signaling 158

5.2.4 Call Retention Event and Signaling 164

5.2.5 Connection Supervision and Link Quality Indicators 167

5.2.6 Troubleshooting AMR Failures 171

5.2.7 Parameter Optimization 182

5.2.8 Call Quality Metrics and Test Process 183

5.3 Video-Telephony Service Optimization 185

5.3.1 Video-Telephony and Voice Comparison 187

5.3.2 Video-Telephony: Test Process and Metrics 189

5.3.3 VT versus AMR Optimization 195

5.4 PS Data Service Optimization 196

5.4.1 PS Data versus AMR Optimization 196

5.4.2 Typical PS Data Applications and QoS Profiles 197

5.4.3 Channel Reconfiguration and Resource Planning 199

5.4.4 Quality Metrics and Test Process 204
6 Inter-System Planning and Optimization

Andrea Garavaglia, Christopher Brunner and Christophe Chevallier

6.1 Introduction

6.2 Inter-System Boundary Planning
  6.2.1 Inter-System Borders
  6.2.2 Typical Inter-System Scenarios
  6.2.3 Boundary Determination

6.3 Inter-System Transitions in Connected Mode
  6.3.1 Inter-System Change Procedures
  6.3.2 Message Flows and Delays
  6.3.3 Compressed Mode Issues
  6.3.4 Compressed Mode Performance Metrics
  6.3.5 Compressed Mode Triggering and Inter-System Handover Parameters

6.4 Inter-System Transitions in Idle Mode
  6.4.1 Overview of the Inter-System Cell Reselection Procedure
  6.4.2 Message Flow and Delays
  6.4.3 Idle Mode Performance Metrics
  6.4.4 Inter-System Cell Reselection Parameters

6.5 Test Setup for Inter-System Handover and Cell Reselection Performance Assessment

6.6 Optimizing Inter-System Parameters
  6.6.1 Interplay between Inter-System Handover and Cell Reselection Parameters
  6.6.2 Optimizing Inter-System Handover Parameters
  6.6.3 Optimizing Inter-System Cell Reselection Parameters

6.7 Additional Inter-System Planning and Optimization Issues
  6.7.1 Inter-System Handover when more WCDMA Carriers are Present
  6.7.2 Inter-System Triggered for Capacity Reasons

References

7 HSDPA

Kevin P. Murray and Sunil Patil

7.1 Motivations for High Speed Downlink Packet Access (HSDPA)

7.2 HSDPA Concepts
  7.2.1 Common Channel with Multicode Operation
  7.2.2 Adaptive Modulation and Coding
  7.2.3 Fast Scheduling and Retransmissions

7.3 HSDPA Planning
  7.3.1 HSDPA Deployment Scenarios
  7.3.2 HSDPA Link Budget
  7.3.3 HSDPA Capacity and Performance

References
## 7.4 HSDPA Operation and Optimization

7.4.1 HSDPA Configuration
7.4.2 HSDPA Serving Cell Change
7.4.3 HSDPA Parameter Tuning
7.4.4 RLC Parameters and HSDPA

## 7.5 HSDPA Key Performance Indicators (KPI)

7.5.1 Physical Layer Metrics
7.5.2 MAC Layer Metrics
7.5.3 Serving Cell Change Metrics

## 7.6 Test Setup

References

## 8 Indoor Coverage

Patrick Chan, Kenneth R. Baker and Christophe Chevallier

8.1 Introduction
8.2 Design Approach and Economic Considerations
  8.2.1 Indoor Coverage: The Traditional Approach
  8.2.2 Indoor Coverage: A Hypothetical Approach
  8.2.3 Indoor Coverage: The Hybrid Approach
8.3 Coverage Planning and Impact on Capacity
  8.3.1 Indoor Coverage Systems
  8.3.2 Service Indoors from the Outdoors
  8.3.3 Service Indoors from the Indoors
  8.3.4 Indoor RF Models
  8.3.5 Capacity Dimensioning
  8.3.6 Achieving Higher Throughput Indoors
8.4 Optimizing Indoor Systems
  8.4.1 Practical Considerations for Indoor Deployments
  8.4.2 Indoor System Deployment and Postdeployment Optimization
  8.4.3 How Indoor Parameter Settings Differ from Outdoor Systems
