facts related to, 259
gum arabic vs. OSA starch, 220
hydrocolloid dressing stabilizers and, 23–24
for typical alginates, 173, 174
typical ranges of hydrocolloids, 260t
verification of, 292
Water in bakery fillings, 83–84
bakery filling stabilization and, 81–82
carrageenan fully hydrated in, 41
in salad dressings, 20
Water gels, meat products and synergism in, 40
Water purification system, hydrocolloids use and, 17
Water source, checking, hydrocolloids use and, 17
Waxes, flavor protection and, 216
Waxy corn, components and properties of, 219t
Waxy corn starch micrographs of, showing maximum and lower viscosity, 147
in sour cream, 155
in yogurt, 144
Waxy maize, in yogurt, 143
Waxy potato, components and properties of, 219t
Index

Waxy rice, components and properties of, 219

Welinga, W. C., 87

Wheat
components and properties of, 219
in meat products, 38

Whey, flavor protection and, 216
Whey solids percent, for ice cream and frozen desserts, 116
Whipped yogurts, 148
Written language skills, clarity of communications, supplier evaluation and, 295

Xanthan gum, 2, 32, 53
in application blends, 269
in bakery fillings, 96–98
benefits/liabilities with, in salad dressings, 25
boilout in bakery fillings and, 103
in bread, 53
in cake, 55
in cheeses, 162
competitive era of hydrocolloid history and, 251
in cottage cheese, 157, 158
in cream cheese, 159
in cream fillings, 79
in custard filling, 77
in egg pasta, 59
in fried cornbread muffins, 63
in frozen dairy desserts, 111
hydrocolloid dressing stabilizers and, 23
locust bean synergy with, 87
in nonbaked fried cornbread, 65
in pancakes, 60, 61
in pizza dough, 66
pumpkin pie and stabilizing with, 76
in reduced oil flour tortillas, 58
in Ricotta cheese, 159
solubility of, in cold water, 97
special stabilities, grade differentiation and, 262
superior freeze-thaw ability with, 97
synergistic hydrocolloid blends and, 267, 268
synergy between tara gum and, 97
transparent versions of, 7
viscosity and, 258
range for, 260
wide use of, 52
Xanthomonas campestris, 96
XG. See Xanthan gum

Yamada, T., 226

Yogurt
alternative stabilizers in, 143–144
for children and toddlers, 148
consumption of, 142
cup set, 143
digestive benefits with, 147–148
dips, 148
drinkable, 149–151
low-fat, formulation and processing parameters for, 152
equipment for mixing and packaging, 142–143
freeze-stability for, 145
Greek-style, 149
increasing sales of, 149
inulin in, 148
new products, 148
pasteurization for, 143
pectin in, 150, 151
protein aggregate size and, 150–151
spoonable, 143
gelatin in, 146–147
Index

Yogurt (Cont.)

- low fat, formulation and processing parameters for, 152
- stirred, 143
- Stoke’s law, protein stabilization and, 150
- strawberries in, 142

- textual defects in, 148
- vat set, 143
- viscosity and cross-linking and processing, 145
- effects of shear and starch cross-linking level on, 146
