air–liquid interfaces

1-butyl-3-methylimidazolium
trifluoromethanesulfonate, 151, 151
C–H stretching region, 149
C–N stretching region, 149
Coulombic and chain-chain interactions, 149
numbering scheme and molecular orientation, [C₄mim]+, 148, 148
sum-frequency spectra
[C₄mim][BF₄], 150
[C₄mim][N(CN)₂], 149
surface potential, 150
tetraalkylammonium and 1,1-dialkylpyrrolidinium ionic liquids, 152
vibrational peak assignments, [C₄mim][BF₄], 149, 150
1-alkyl-3-methylimidazolium salts
–CH₂CH₂–, introduction of, 449
[C₄mim][NTf₂], structure of, 450
Coulombic interactions, 449
halide salts, 450
methylene groups, 449
monoclinic and orthorhombic forms, [C₄mim]Cl, 451
room temperature, 450
volume-based thermodynamics approach, 449

amides
bis(fluorosulfonyl)amide, 42, 42
bis[bis(pentafluoroethyl)phosphinoyl]amide, [NDf2]−, 42, 42–43
physical properties, 42, 42
APPLE&P see Atomistic Polarisable Potential for Liquids, Electrolytes and Polymers
Arrhenius expression, 16
Atomistic Polarisable Potential for Liquids, Electrolytes and Polymers, 86
aza-heterocycles, salts of, 383–385
(1,5-dimethoxyl-3-phenyl)-5a,6,7,8,9,9a-hexahydro-1H-1,5-benzodiazepin-5-ium perchlorate, 461, 462
2-acetyl-9-azoniabicyclo[4.2.1]nonan-3-one trifluoroethanoate, 461, 462
5-azonia-2-oxa-spiro[4.4]nonane tetrafluoroborate, 461, 462
1,3-diethyl-3,4,5,6-tetrahydropyrimidinium hexafluorophosphate, 461, 461
3-(3-ethenyl-1,2,4-oxadiazol-5-yl)-1,2,5,6-tetrahydropyridinium trifluoroethanoate, 461, 462
aza-heterocycles, salts of (cont’d)
5-ethoxy-1-ethyl-3,4-dihydro-2-ooxochinoline, hexachloroantimonate, 461, 463
[1-ethyl-1,4-diazabicyclo[2.2.2]octanum][NTf₂], structure of, 460–461
5-hydroxy-1-methyl-3,4-dihydropyrrrolonium chloride, 461, 462
3-hydroxy-1-tert-butyl-1,2-dihydropyrrrolium picrate, 461, 461
3-methyl-2-phenyl-3,4,5,6-tetrahydropryrimidinium trifluoromethanesulfonate, 461, 461
1-(piperidinium-1-ylidene)-3-(piperidin-1-yl)-2-azapropene hexafluorophosphate, 461, 463
2-tert-butyl-3,3,5-trimethyl-1,2-diaza-3-sila-5-cyclopentenium tetrachloroaluminate, 461, 463
volume-based thermodynamics approach, 463

BATIL see Biodegradability and Toxicity of Ionic Liquids

benzene:1,3-dimethylimidazolium hexafluorophosphate aromatic and cation/anion, interactions, 69
molecular dynamics simulations, 68–69
neutron diffraction experiments on [C₄mim][PF₆], 68
spatial probabilities, 68, 68
