adolescents
  Mann test (advanced Romberg test) in 89
  neuromotor immaturity in 6–8
  Tandem Walk test in 40
adult screening questionnaire 75, 76–80
advanced Romberg test (Mann test)
  in adolescents 89
  in adults 85, 86, 89–90
age, neurological tests and 85
agoraphobia 8, 27, 64, 66, 68–9, 70, 74
Alzheimer’s disease, primitive reflexes in 4
ampulla 11
antihistamines 65
anxiety 2, 3, 4, 8, 10, 72, 80
  hyperventilation and 68
  Neuromotor Immaturity (NMI) in 74–5, 79
  pathway to 63
  primitive reflexes and 12
  retention of Moro reflex in adults and 18, 73
  Reticular Activating System and 18
  Romberg test and 86
  somatogenic/psychosomatic basis 68–71
  vestibular-cerebellar dysfunction and 64–8
arm extension test see Hoff-Schilder test
Asperger’s disorder 27
Asymmetrical Tonic Neck Reflex (ATNR) 6, 11
  in adults 70–1, 73
  in children 13
  in infants 12–13, 46
  in neonate 13
  tests in adults 95–8
  tests in children 46–9
attention deficit disorder 1, 6
Attention Deficit Hyperactivity Disorder (ADHD) 1, 27
  attention span, diminished 4
autism, infant 4
awkwardness 4
Ayres, A. Jean 5, 21–2
Ayres quadruped test for ATNR
  in adults 95, 96
  in children 46, 47
Ayres Sensory Integration (ASI) 22
balance 3
  definition 9, 12
  dynamic, learning and 10
  problems in control of 10
  reasons for assessment 9–10
  static, learning and 10
  tests for 84–94
behavioral disorders 1, 3, 4, 5, 6
Beuret, Dr Lawrence 6
bipolar disorder 80
Blythe, Peter 19
Bobath therapy 26–7
brain injury, acquired 21, 27
cerebellar-vestibular dysfunction see vestibular-cerebellar dysfunction
cerebral palsy 19
  primitive reflexes, retention of in 3–4
  use of Bobath therapy in 26
  use of Vojta therapy 22
cupula 11
clavicle, fractured 17
Clements, Samuel 5
CNS dysfunction 66
coordination 3
Cox, Joseph Mason 64
cranial nerve, XIth accessory 62
Cullen, William 2
depression 2
Development Coordination Disorder (DCD) 1, 27
Developmental Screening Questionnaire 6
diabetic neuropathy 36
directional awareness 10
dizziness 10, 11, 64
general medical causes 84
panic disorder and 66–8
symptoms and underlying mechanisms 67–8
in Tonic Labyrinthine Reflex (TLR) erect test 53
vestibular dysfunction and 68–9
Dramamine 65
dynamic balance 10
dysdiadochokinesia fingers 44
dyslexia 6, 27, 46
vestibular-cerebellar dysfunction and 65
dyspraxia 27
eating, STNR affecting 16
educational under-achievement 27
endolymph 11, 61
epileptic symptoms 4
Erb's palsy 17
finger and thumb opposition test 44–5
Fishponds Lunatic Asylum, Bristol 64
Fog walk
in adults 84, 85, 91, 93–4
in children 39, 40, 42–3
Freud, Sigmund 2
Friedreich's ataxia 36
gravitational security 69
gravity 64, 69
head injury 26
use of Bobath therapy in 26
Head Righting Reflexes (HRRs) 70, 71
hip dysplasia, use of Vojta therapy 26
Hoff-Schilder test, adapted
in adults 46, 95, 97–8
in children 46, 48–9
hyper-arousal 63
hyper-reflexia 4
hyperventilation 68
hypocondria 2
hysteria 2
INPP screening test 7, 8–11
aims 8
for balance and proprioception 86–94
for balance and soft signs of neurological (NSS) dysfunction (ND) 84–5
categories of exercises 21
development of 19–20
diagnostic categories for 27–8
general instructions 83
method 20–1
observation sheets 57, 108
posture, reasons for assessment 9
for primitive reflexes 46–55, 95–106
score interpretations 58–9, 109–10
score sheet 56, 107
scoring 83–4
stimulation-integration-inhibition 21
use in adults 83–110
use in children 32–59
use of 28, 74–5
Institute for Neuro-physiological Psychology (INPP) see under INPP
inter-modality conflict 65
intra-labyrinthine conflict 65
intra-modality conflict 65
Jackson's Law 7
Jung, Carl 2
Kinematic Imbalance due to Sub-occipital Strain (KISS) 26
Labyrinthine Head Righting Reflex (LHRR) 71–2
learning disabilities 4
learning outcomes 4–6
Mann test (advanced Romberg test)
in adolescents 89
in adults 85, 86, 89–90
mathematics, problems with, Moro reflex and 6
McGlown, David J. 19
Minimal Brain Dysfunction (MBD) 5
Moro reflex 12, 17–18, 21
erect (drag) test 73, 105–6
in adults 72–4
in infancy 17–18, 72–3
mathematics, problems with and 6
standard test 54, 73, 103–4
motion sickness 7, 11, 65
motor training programmes
effectiveness of 18–19
comparisons between 24–5
see also INPP programme; Sensory Integration; Vojta therapy
multiple sclerosis
primitive reflexes in 4
use of Bobath therapy in 26
myopia, Moro reflex and 74
neurosis 2, 64
secondary 4
nystagmus 11, 66, 68
spontaneous 64

obsessive-compulsive symptoms,
vestibular-cerebellar dysfunction and 65
Oculo-head Righting Reflex (OHRR) 71
oculo-motor function 3, 9
STNR affecting 16
tests for 20, 66, 84
one-leg stand see Unipedal Stance Test (UPST)
orientation 10
otoconia crystals 61–2
otoconia layer 61
otoliths 11, 61
Paine, R.S, 4
panic disorder 2, 27, 63, 66, 68–9
dizziness and 66–8
symptoms and underlying mechanisms 67–8
parachute reflex 73
Parkinson’s disease, use of Bobath therapy in 26
phobias 2
vestibular-cerebellar dysfunction and 65
plexus, palsy of 26
postural reflexes, under-development of 7
postural righting reactions see Labyrinthine Head Righting Reflex (LHRR)
posture
definition 9
learning, and control of 10–11
reasons for assessment 9
primitive reflexes 12–18
assessment of 4
educational under-achievement and 6
effectiveness of movement programmes 18–19
exercises to inhibit, before INPP 19
residual 4
retained 3–4
see also primitive reflexes, tests for
primitive reflexes, tests for
in adults 95–106
in children 46–59
see also Asymmetrical Tonic Neck Reflex (ATNR); Moro reflex; Symmetrical Tonic Neck Reflex (STNR); Tonic Labyrinthine Reflex (TLR)
proprioception, tests for 84–5
psychomotor syndromes 4
psychosis 80
reading 17, 18, 19
difficulties in 5, 6, 7
ATNR as barrier to 13, 46
reflex profile 20
reflexes see primitive reflexes
Reticular Activating System (RAS) 63
reticulospinal system 62
reticulospinal tract 63
Romberg test
eyes closed 35, 88
eyes open 35, 88
in adults 66, 83, 84, 85–8
in children 32, 34–6
see also advanced Romberg test (Mann test)
saccule 61
schizophrenia 80
school phobia 27
secondary neuroses 4
selective mutism 27
semi-circular canals 11
sense of self, gravity and 69
Sensory Integration (SI) 5–6, 21–2
key features 22
Sharpened Romberg (SR) see Mann test (advanced Romberg test)
sitting posture, STNR and 15–16
soft signs 3, 7–8
tests for 39, 84–5
see also Fog walk; Tandem walk
space
mental operations in 10
and motion discomfort 69
spina bifida, use of Vojta therapy 22, 26
spinal cord injury, use of Bobath therapy in 26
stability
  perceptual 69
  in space 69
startle response 18, 73
  see also Moro reflex; Strauss reflex
static balance 10
Strauss reflex 73
strokes, use of Bobath therapy in 26
Symmetrical Tonic Neck Reflex (STNR) 5, 11, 14–16
  in adults 99–100
  in infant 50
  retention of, effects of 70
  test for 50–1

Tabes dorsalis 36
  Tandem Romberg test see Mann test
Tandem walk
  in adults 84, 85, 91–2
  in children 39, 40–1
thumb and finger opposition test 44–5
timed unipedal stance test see Unipedal Stance Test (UPST)
Tonic Labyrinthine Reflex (TLR) 6, 11, 16–17, 70
  in adults 73
  test
    in adults 101–2
    in children 52–3
    erect test 52–3, 101–2
tremor 4
truncal ataxia 40, 91

Unipedal Stance Test (UPST) 32, 37–8
  developmental norms 38
  test position 37–8

Unklammerung reflex 73
urticaria 65
utricle 61
vertical synkinesia 43
vertigo, phobic postural 68
  see also dizziness
vestibular-cerebellar connections 62
vestibular dysfunction
  as cause or effect 68
  historical background 64–8
  network alarm theory 75
  psychosomatic model 74
  somatopsychic model 74, 75
Vestibular-Ocular Reflex (VOR) 62
vestibular-proprioceptive mismatch 7, 66, 69
vestibular-proprioceptive–visual ‘mismatch’ 66
vestibular–spinal system 62
vestibular system (labyrinth)
  functioning of 11–12
  role of 61–4
vestibular–visual mismatch 66
vestibulocollic reflex (VCR) 62, 71
visual perception 3
Vitamin B12 deficiency, Romberg test and 36
Vojta therapy 22–6
  advantages 26
  assessment 23
  disadvantages 26
  indications 23–6
  theoretical basis 23

Wide Range Achievement Test (WRAT) 5
writing
  ATNR as barrier to 13
  STNR and sitting posture in 15
