A biocultural tribute to a biocultural scholar: Professor George J. Armelagos, May 22, 1936–May 15, 2014, 1
Debra L. Martin & Molly K. Zuckerman
References, 6

1 Introduction: the development of biocultural perspectives in anthropology, 7
Molly K. Zuckerman & Debra L. Martin

Introduction, 7
The origins and development of the biocultural approach, 8
Using a biocultural model, 12
Difficulties in using the biocultural approach, 15
The case studies in this volume, 15
Conclusion, 24
References, 24
Notes, 26

Part I: Critical and synthetic approaches to biocultural anthropology

2 Exploring biocultural concepts: anthropology for the next generation, 29
R. Brooke Thomas

Introduction, 29
Background, 29
Case study: the Quechua of southern Peru, 1964 to the present, 31
Discussion, 41
Conclusion, 42
References, 44
Notes, 47
Endnotes, 47

3 Local nutrition in global contexts: critical biocultural perspectives on the nutrition transition in Mexico, 49
Thomas L. Leatherman, Morgan K. Hoke & Alan H. Goodman

Introduction, 49
Part II: Biocultural approaches to identity

4 Disease and dying while black: how racism, not race, gets under the skin, 69
   Alan H. Goodman
   Introduction, 69
   Background, 72
   Case study: race versus racism, 81
   Discussion and conclusion, 85
   References, 86

5 Beyond genetic race: biocultural insights into the causes of racial health disparities, 89
   Christopher W. Kuzawa & Clarence C. Gravlee
   Introduction, 89
   Background, 90
   Case study #1: hypertension in the African Diaspora, 99
   Case study #2: does the experience of racial discrimination in the United States have intergenerational health consequences?, 101
   Discussion and conclusion, 101
   References, 102

6 Political economy of African forced migration and enslavement in colonial New York: an historical biology perspective, 107
   Michael L. Blakey & Lesley M. Rankin-Hill
   Introduction, 107
   Background, 108
   Case study, 109
   Discussion, 125
   Conclusion, 127
   References, 129
   Notes, 131

7 Identifying the First African Baptist Church: searching for historically invisible people, 133
   Lesley M. Rankin-Hill
   Introduction, 133
   Case study: Afro-American biohistory, 134
   Conclusion, 152
References, 153
Notes, 155

**Part III: Biocultural approaches to health and diet**

8 "Canaries in the mineshaft": the children of Kulubnarti, 159
   *Paul A. Sandberg & Dennis P. Van Gerven*
   Introduction, 159
   Case study: Nubia and Kulubnarti, 160
   Conclusion, 176
   Acknowledgments, 176
   References, 176

9 Biocultural investigations of ancient Nubia, 181
   *Brenda J. Baker*
   Introduction, 181
   Background, 183
   Case study: operationalizing a biocultural investigation: the Bioarchaeology of Nubia Expedition, 191
   Conclusion, 194
   Acknowledgments, 194
   References, 194

10 Life and death in nineteenth-century Peoria, Illinois: taking a biocultural approach towards understanding the past, 201
   *Anne L. Grauer, Laura A. Williams & M. Catherine Bird*
   Introduction, 201
   Case study: life and death in nineteenth-century Peoria, 203
   Discussion, 210
   Conclusion, 212
   Acknowledgments, 213
   References, 213

11 Does industrialization always result in reduced skeletal robusticity?, 219
   *Ann L. Magennis & Joshua G.S. Clementz*
   Introduction, 219
   Background, 220
   Case study: testing ideas about robusticity and industrialization, 225
   Discussion, 232
   Conclusion, 235
   Acknowledgments, 236
   References, 237
12 Stable isotopes and selective forces: examples in biocultural and environmental anthropology, 241
Christine D. White & Fred J. Longstaffe
Introduction, 241
Background, 244
Case study: isotopes and epidemiological risk factors/synergies at Wadi Halfa and surrounding regions, 247
Discussion and conclusion, 252
Acknowledgments, 253
References, 254

13 The cuisine of prehispanic Central Mexico reconsidered: the "omnivore’s dilemma" revisited, 259
Randolph J. Widmer & Rebecca Storey
Introduction, 259
Case study: prehispanic cuisine of Central Mexico, 263
Conclusion, 272
Acknowledgments, 273
References, 274

Part IV: Biocultural approaches to infectious disease

14 The specter of Ebola: epidemiologic transitions versus the zombie apocalypse, 279
Ronald Barrett
Introduction, 279
Case study: Ebola and the epidemiologic transitions, 282
Discussion and conclusion, 290
References, 291
Notes, 293

15 Beyond the differential diagnosis: new approaches to the bioarchaeology of the Hittite plague, 295
Nicole E. Smith-Guzmán, Jerome C. Rose & Kathleen Kuckens
Introduction, 295
Case study: investigating the cause of the Hittite plague, 297
Discussion and conclusion, 313
Acknowledgments, 313
References, 313

16 Paleopidemiological and biocultural approaches to ancient disease: the origin and antiquity of syphilis, 317
Molly K. Zuckerman & Kristin N. Harper
Introduction, 317
Background, 319
Case study: biocultural and paleoepidemiological approaches to the origin and antiquity of syphilis, 324
Discussion, 328
Conclusion, 330
References, 331
Notes, 335

Part V: Biocultural approaches to understanding population dynamics

17 Population and disease transitions in the Åland Islands, Finland, 339
   James H. Mielke
   Introduction, 339
   Background, 340
   Case study: Åland archipelago, 346
   Discussion, 352
   Conclusion, 357
   Acknowledgments, 358
   References, 358

18 The hygiene hypothesis and the second epidemiologic transition: using biocultural, epidemiological, and evolutionary theory to inform practice in clinical medicine and public health, 363
   Molly K. Zuckerman, Jonathan R. Belanich & George J. Armelagos
   Introduction, 363
   Background, 366
   Case study: applying the hygiene hypothesis to practice in public health and clinical medicine, 373
   Discussion and conclusion, 377
   References, 379

19 An emerging history of indigenous Caribbean and circum-Caribbean populations: insights from archaeological, ethnographic, genetic, and historical studies, 385
   Theodore G. Schurr, Jada Benn Torres, Miguel G. Vilar, Jill B. Gaieski & Carlalynne Melendez
   Introduction, 385
   Case study: exploring Caribbean genetic history, 387
   Discussion, 394
   Conclusion, 395
   Acknowledgments, 396
20 Explorations in paleodemography: an overview of the Artificial Long House Valley agent-based modeling project, 403
   Alan C. Swedlund, Lisa Sattenspiel, Amy Warren, Richard S. Meindl & George J. Gumerman III
   Introduction, 403
   Background, 407
   Case study: the Artificial Long House Valley (ALHV) Project models, 408
   Discussion, 419
   Conclusion, 422
   Acknowledgments, 424
   References, 424

Part VI: Biocultural approaches to inequality and violence

21 Biocultural perspectives in bioarchaeology, 429
   Bethany L. Turner & Haagen D. Klaus
   Introduction, 429
   Background, 430
   Case study: understanding European contact in the Americas, 437
   Conclusion, 446
   Acknowledgments, 446
   References, 447
   Notes, 451

22 The poetics of violence in bioarchaeology: Integrating social theory with trauma analysis, 453
   Ventura R. Pérez
   Introduction, 453
   Background, 454
   Case study: the Sierra de Mazatán massacre, 458
   Conclusion, 465
   Acknowledgments, 467
   References, 467

23 Broken bodies and broken bones: Biocultural approaches to ancient slavery and torture, 471
   Debra L. Martin & Anna J. Osterholtz
   Introduction, 471
   Background, 474
   Case study: slavery and torture in the prehispanic Southwest, 475
   Discussion, 486
Conclusion, 487
References, 488
Notes, 490

Part VII: The next generation

24 Concluding thoughts: a bright future for students trained in using a biocultural perspective, 493
   Debra L. Martin & Molly K. Zuckerman
   Introduction, 493
   Teaching, pedagogy, and ethics, 494
   The past as a guide, 496
   A bright future for biocultural scholarship, 496
   References, 498
   Notes, 498

Index, 499
