1 Introduction  1
   Reference  2

2 Gamete Quality and Broodstock Management in Temperate Fish  3
   Herve Migaud, Gordon Bell, Elsa Cabrita, Brendan McAndrew, Andrew Davie, Julien Bobe, Maria Paz Herráez and Manuel Carrillo
   Executive Summary  3
      Background  3
      Principal Findings  3
      Scientific Significance  4
      Practical Application  4
      Introduction  4
   Egg and Sperm Quality and Assessment  5
      Egg Quality  6
      Sperm Quality  7
   Germ Cell Preservation  8
      Eggs  8
      Sperm Storage and Management  9
      Other Sources of Germplasm: Undifferentiated Germ Cells and Surrogate Production  10
      Knowledge Gaps and Research Needs  11
   Broodstock Nutrition  12
      Background  12
      Salmonids  13
      Bass, Bream and Related Sparids  14
      Atlantic Cod  16
      Flatfish  16
      Carp  18
      Knowledge Gaps and Research Needs  18
   Applications of Genetics and Genomics to Broodstock Management  18
      General Considerations and New Advances  18
Selective Breeding Programmes 19
Genetic Markers 23
Functional Genomics 24
Chromosome Set Manipulation 25
Gene Transfer Technologies 27
Knowledge Gaps and Research Needs 28
Broodstock Environmental and Hormonal Manipulations 28
General Concepts 28
Entrainment of Reproduction: Proximate Factors 29
Photoperiod Regimes Used in Aquaculture 31
Temperature as an Ultimate Factor 32
Spawning Induction Techniques 33
Knowledge Gaps and Research Needs 36
Overall Conclusions 36
Acknowledgements 39

3 Feeding Behaviour and Digestive Physiology in Larval Fish: Current Knowledge, and Gaps and Bottlenecks in Research 53
Ivar Rønnesetad, Manuel Yúfera, Bernd Ueberschär, Laura Ribeiro, Øystein Sæle and Clara Boglione
Executive Summary 53
Background 53
Principal Findings and Conclusions 53
Scientific Significance 54
Practical Application 54
Introduction 54
Feeding Behaviour and Appetite 55
Detection 55
Capture and Ingestion 58
Feeding Rhythms 60
Neuroendocrine Control of Appetite and Ingestion 60
Adaptation of Feeding Protocols to the Feeding Behaviour 62
Digestive Physiology 62
Ontogeny and Plasticity of the Digestive System 62
Accessory Digestive Organs 65
Intestinal Modelling and Remodelling 66
Digestion: An Overview 68
Digestion of Proteins and Peptides 69
Pancreatic Enzymes 69
Enzymes in the Mucosal Layer 74
Exogenous Enzymes 74
Absorption 75
Free Amino Acids 75
Peptides 76
Extrapolation from Juveniles 142
Feed Formulation 144
Live Feed Enrichment 144
Basic Levels of Nutrients in Rotifers and Artemia 144
Opportunities and Limitations in Enrichment of Live Feed 147
Formulated Diets 150
General Characteristics of Formulated Larval Diets 150
Types of Formulated Microdiets 151
Technical Limitations 152
Microdiet Formulation and Nutrition Experiments 153
Gaps and Bottlenecks in Obtaining Knowledge on Nutritional Requirements of Marine Fish Larvae 154
Acknowledgements 155

5 What Determines Growth Potential and Juvenile Quality of Farmed Fish Species? 173
Luísa M.P. Valente, Katerina A. Moutou, Luís E.C. Conceição, Sofia Engrola, Jorge M.O. Fernandes and Ian A. Johnston
Executive Summary 173
Background 173
Principal Findings and Conclusions 173
Scientific Significance 174
Practical Application 174
Introduction 174
Development of Skeletal Muscle 175
Embryonic, Larval and Juvenile Muscle Growth: The Origin and Regulation of Myogenic Progenitor Cell Activity 175
Control of Muscle Mass 182
Protein Synthesis 182
Protein Degradation 183
Genetics of Muscle Growth 184
Environmental Factors and Growth 190
Seawater Temperature 190
Nutrition 191
Available Methodology to Assess Growth and Quality 192
Histology, Histochemistry and Immunohistochemistry 192
In situ Hybridization 193
Real-time PCR 194
Microarrays 194
Transcriptome Analysis and Genome Editing 195
Proteomics 197
Cell Culture 197
Tracer Studies 198
Concluding Remarks 198
Acknowledgements 199

6 Skeletal Anomalies in Reared European Fish Larvae and Juveniles. Part 1: Normal and Anomalous Skeletogenic Processes 215
Clara Boglione, Paulo Gavaia, George Koumoundouros, Enric Gisbert, Mari Moren, Stéphanie Fontagné and Paul Eckhard Witten
Executive Summary 215
  Background 215
  Principal Findings 215
  Scientific Significance 216
  Practical Application 216
Introduction 216
Plasticity, Ontogenesis, Remodelling and Resorption of Skeletal Elements in Teleost Fish 221
Teleost Skeletal Tissues 222
The Notochord 224
Regulatory Mechanisms of Skeletal Tissues in Fish 224
Bone Formation and the Replacement of the Cartilaginous Anlage 225
  Endochondral Ossification 225
  Perichondral Ossification 227
  Parachondral Ossification 228
  Intramembranous Ossification 228
Modulation and Transformation 230
  Dedifferentiation, Transdifferentiation and Metaplasia 230
Late Events in Teleost Skeletal Tissue Modelling and Remodelling 231
Bone Resorption and Remodelling 232
  Osteocytic Osteolysis 233
Main Gaps in Scientific Knowledge and Further Research Needs 234
  Acknowledgements 235

7 Skeletal Anomalies in Reared European Fish Larvae and Juveniles. Part 2: Main Typologies, Occurrences and Causative Factors 249
Clara Boglione, Enric Gisbert, Paulo Gavaia, Paul Eckhard Witten, Mari Moren, Stéphanie Fontagné and George Koumoundouros
Executive Summary 249
  Background 249
  Principal Findings 249
  Scientific Significance 250
  Practical Application 250
Introduction 250
Early Developmental Anomalies 252
Vertebral Column Anomalies 256
  Non-salmonid Group 257
  Salmonid Group 260
Vertebrae Anomalies 261
  Non-salmonid Group 262
  Salmonid Group 263
Anomalies of the Fins 264
Skull Anomalies 266
## Contents

Effects of Skeletal Anomalies on Fish Biological Performance 268
Causative Factors of Skeletal Anomalies in Reared Fish 269
  Genetic Factors 269
  Non-genetic Factors: Nutrition 272
    Proteins and Amino Acids 273
    Lipids and Fatty Acids 274
    Vitamins 278
    Minerals 289
  Non-genetic Factors: Miscellaneous 292
Sorting Methods 296
Elements of Solutions 296

9 Fantastically Plastic: Fish Larvae Equipped for a New World 363
Karin Pittman, Manuel Yúfera, Michail Pavlidis, Audrey J. Geffen, William Koven, Laura Ribeiro, José L. Zambonino-Infante and Amos Tandler

Executive Summary 363
  Background 363
  Principal Findings 363
  Scientific Significance 364
  Practical Application 364

Introduction 364

Mediating Environment – Structural Basis of Plasticity 368
  Pineal 368
  Thalamus/Hypothalamus 371
  The Pituitary 372
  Thyroid and Thyroactive Compounds 373
  The Adrenals (Early Development of the Adrenocortical and Chromaffin Tissues (‘Adrenals’) in Fish) 374
  The Gonads 375
  The Acoustic-Lateralis System 378
    Structure of the Otolith System and its Components 378
    Otolith Formation 378
    Otolith Growth – Biomineralization and Control 379
  Osmoregulation System 380

Functional Plasticity – Interactions Between the Internal and External Environment Which Define the Phenotype 380
  Sex Differentiation 380

Implication of TH in Metamorphic Processes 383
  Thyroid Hormone and Metamorphic Transformations 383
  Thyroid Hormone Response Genes in the Intestine 384
  Environmental Iodine as a TH Precursor 385
  Dietary Iodine and the Superiority of Natural Larval Zooplankton Prey 386
  Does Dietary Iodine, as a TH Precursor, Drive Metamorphosis? 387

The Cortisol Stress Response 388
  Profile of Whole-Body Cortisol Concentrations During Early Ontogeny 388
  Onset of the Cortisol Stress Response 389

Digestive Tract Development and Remodelling 391
  Pigmentation 392

Consequences of External Factors 396
  Environmental Information Content of the Otoliths 396
  Adapting to Salinity 398
  Effects of Temperature 399
    Common Effects of Temperature in Metabolic Rates 399
    Effects on Spawning and Embryonic Development 400
    Effects on Muscle and Skeletal Development 400
  Effect of Dietary Factors 402
    Consequences on Skeletal Structures and Anatomy 403
    Consequences on Metabolic Pathways 404
    Consequences on Cardiovascular Performance 405
Contents

Consequences on Reproduction 406
  Integrating the Effect of External Factors 406
Conclusions 408

10 Quality Descriptors and Predictors in Farmed Marine Fish Larvae and Juveniles 435

George Koumoundouros, Enric Gisbert, Ignacio Fernandez, Elsa Cabrita, Jorge Galindo-Villegas and Luís E. C. Conceição

Executive Summary 435
  Background 435
  Principal Findings and Conclusions 435
  Scientific Significance 436
  Practical Application 436
Introduction 436
Morphology and Malformations 437
Biochemical and Molecular Biomarkers of Bone Formation and Remodelling 440
  Markers for Cell Differentiation and Proliferation 440
  Markers of Extracellular Matrix (ECM) Mineralization and Resorption 441
  Biomarkers of Bone Resorption 442
  Mineralization Ontogenesis and Mineral Content of Skeletal Structures 442
  Conclusions and Future Trends 442
Nutritional Condition 443
Growth Potential 447
Immunology and Microbiology 450
Sperm and Oocyte Quality as Predictor of Fertilizing Capacity 452
Conclusions and Perspectives 454
References 456

11 Conclusions 467

Broodstock and Egg Quality 468
Microbiology, Immunology and Larval Health 469
Feeding Biology and Digestive Function 469
Nutritional Requirements 470
Growth Potential and Dispersion 471
Skeletal Deformities and Other Abnormalities 471
Quality Indicators and Predictors 472
