</tbody>
</table>
2.5. A fertile ground for the creation of the linear and hierarchical model of innovation ............... 25
  2.5.1. The institutionalization of science ............... 25
  2.5.2. The lack of technical thought .................. 27
2.6. Impact of the model with respect to the
definition of research and innovation policies .......... 28
2.7. Limitation of the linear and hierarchical model ...................................... 30
  2.7.1. Too much importance given to R&D ............. 30
2.8. The design process at the core
of the innovation process .................................. 36
2.9. The design process, what are we speaking about exactly? .......................... 40
  2.9.1. The two models of the design
process according to L. Blessing ....................... 40
  2.9.2. The stages of the design process ................. 41
  2.9.3. Overall convergence of the design process .......... 42
  2.9.4. Rule-based design regime versus innovative design regime ............ 44
2.10. Validity of the model .................................. 46

Chapter 3. Artificialism ............................................. 51

  3.1. Artificial world as a set of artifacts ...................... 52
  3.2. Contribution of the Simonian theory
to the understanding of the design process ............ 55
    3.2.1. Bounded rationality and satisficing ............. 55
    3.2.2. Design as a process obeying satisficing .......... 56
    3.2.3. Specificities of the design process ............... 60
  3.3. Simonian empiricism .................................. 61
  3.4. Key propositions of Artificialism ...................... 62
  3.5. Interest in thinking about innovation
from the artificial perspective ......................... 68
    3.5.1. Developing a comprehensive organizational
system to ensure the effectiveness and
efficiency of the design process ......................... 69
    3.5.2. Thinking of the user ............................ 70
Chapter 4. Innovating by Implementing Creative Rationality

4.1. Creative rationality: what exactly are we talking about? 78
  4.1.1. Thinking in terms of relation 78
  4.1.2. A form of thought that can replace the inexplicable with the rational 81

4.2. The reality of creative rationality 84
  4.2.1. What are innovation biographies? 84
  4.2.2. The example of Gutenberg’s printing press 86
  4.2.3. The example of the printing press is not an isolated case 88
  4.2.4. Towards an adventurous transgression 90
  4.2.5. The Solar Impulse project 96
  4.2.6. A journey to the center of the production of knowledge 99
  4.2.7. The basis of a creative rationality model 99
  4.2.8. A limited production of knowledge 102
  4.2.9. A production of knowledge that must be interpreted beyond the reasoning at work 103

Chapter 5. Creative Rationality and the Education System 107

5.1. Teaching innovation: a political project 108
5.2. A harmful confusion between innovation and entrepreneurship 110
  5.2.1. The Beylat–Tambourin report 110
  5.2.2. Confusion deriving from J. Schumpeter 112
  5.2.3. The skills of innovators versus the skills of entrepreneurs 114

5.3. School environment and creative rationality 116
  5.3.1. Challenging traditional school 117
  5.3.2. The parable of the “flea trainer” 119
  5.3.3. An education system that kills creativity 122

5.4. Rehabilitating creativity rationality in the training of engineers 125
5.5. Towards the pedagogy of adventure
5.5.1. Observing to innovate
5.5.2. Otherness: recognizing the other
5.5.3. How to move from the idea of pedagogy of adventure to its implementation?

Conclusion
