SECTION I GIS&T IN THE ACADEMIC CURRICULUM – INTRODUCTION 1

1 GIS&T in higher education: challenges for educators, opportunities for education 3
   Kenneth E. Foote, David J. Unwin, Nicholas J. Tate and David DiBiase

2 Making the case for GIS&T in higher education 17
   Diana S. Sinton

3 The internationalization of Esri higher education support, 1992–2009 37
   Michael Phoenix

4 Reflections on curriculum development in the US and abroad: from core curriculum to body of knowledge 47
   Karen K. Kemp

SECTION II ISSUES IN CURRICULUM AND COURSE DESIGN 61

5 Using the GIS&T Body of Knowledge for curriculum design: different design for different contexts 63
   Steven D. Prager

6 Scope and sequence in GIS&T education: learning theory, learning cycles and spiral curricula 81
   Kenneth E. Foote
CONTENTS

7 Building dynamic, ontology-based alternative paths for GIS&T curricula 97
    Marco Painho and Paula Curvelo

8 Addressing misconceptions, threshold concepts, and troublesome knowledge in GIScience education 117
    Matthew Bampton

9 Active pedagogy leading to deeper learning: fostering metacognition and infusing active learning into the GIS&T classroom 133
    Richard B. Schultz

10 Where to begin? Getting started teaching GIS&T 145
    Eric West

11 Issues in curriculum and course design: discussion and prospect 159
    Kenneth E. Foote

SECTION III PERSPECTIVES ON TEACHING GIS&T 165

12 The University of Minnesota master of geographic information science (MGIS) program: a decade of experience in professional education 167
    Susanna A. McMaster and Robert B. McMaster

13 Geospatial education at US community colleges 185
    Ann Johnson

14 The GIS Professional Ethics project: practical ethics for GIS professionals 199
    David DiBiase, Francis Harvey, Christopher Goranson and Dawn Wright

15 An exploration of spatial thinking in introductory GIS courses 211
    Injeong Jo, Andrew Klein, Robert S. Bednarz and Sarah W. Bednarz

16 Teaching spatial literacy and spatial technologies in the digital humanities 231
    David J. Bodenhamer and Ian N. Gregory

17 Discussion and prospect 247
    David J. Unwin

SECTION IV DIGITAL WORLDS AND TEACHING GIS&T 255

18 Virtual geographic environments 257
    Gary Priestnall, Claire Jarvis, Andy Burton, Martin Smith and Nick J. Mount
CONTENTS

19 Using web-based GIS and virtual globes in undergraduate education 289
  Lynn Songer

20 Trying to build a wind farm in a national park: experiences of a geocollaboration experiment in Second Life 301
  Nick J. Mount and Gary Priestnall

21 From location-based services to location-based learning: challenges and opportunities for higher education 327
  David M. Mountain

22 GIS is dead, long live GIS&T: an educational commentary on the opening of Pandora’s Box 345
  Nicholas J. Tate

SECTION V  DISTANCE AND E-LEARNING 359

23 Media and communications systems in cartographic education 361
  William Cartwright

24 UNIGIS – networked learning over a distance 383
  Josef Strobl

25 The Esri Virtual Campus 395
  Nick Frunzi

26 Delivering GIScience education via blended learning: the GITTA experience 405
  Robert Weibel, Patrick Lüscher, Monika Niederhuber, Thomas Grossmann and Susanne Bleisch

27 GIS&T in the open educational resources movement 421
  David DiBiase

28 Experiences in ‘e’ and ‘distance-’ learning: a personal account 439
  David J. Unwin

CONCLUSION 451

29 Ways forward for GIS&T education 453
  David DiBiase, Kenneth E. Foote, Nicholas J. Tate and David J. Unwin

Index 469
