INDEX

Active space, 104, 157, 158
actinides, 128
active orbitals, 126
atoms and atomic ions, 126
double-shell effect, 128
lanthanide, 128
molecules, 128
rules, 130
transition metals, 127
Algebraic approximation, 13, 137
Angular momentum quantum number, 25
ANO, 75
Anticancer drugs, 167
annihilation operator, 86, 115, 148
Antibonding orbital, 106, 158, 164
Atom
helium atom, 26
hydrogen, 24
Ni atom, 76
Atomic orbitals, 24, 162
Atomic natural orbital (ANO), 75
starting orbitals, 162
Basis set
5Z, 75
Cartesian angular momentum functions, 72
contracted Gaussian type orbitals (CGTO), 71, 74
contraction coefficients, 71
contraction schemes, 73
correlation, 77
density matrix averaged atomic natural orbitals, 76
design criteria, 72
double zeta (DZ), 74
effect of Hamiltonian, 79
exponents, 71, 73
Gaussian type orbitals, 71
general concepts, 69
GTO, 71
MB, 74
minimal basis, 74
polarized valence double zeta (pVDZ), 75
primitive function, 71
QZ, 75
Raffenetti contraction, 75
real spherical harmonics, 72
Rydberg orbitals, 81
segmented contraction, 74, 75
Basis set (Continued)
  superposition error, BSSE, 72, 101
  selection, 79
  Slater type orbitals, 70
  split valence (SV), 75
  STO, 70
  TZP, 75
  valence double zeta (VDZ), 75
Basis set expansion, 160
Bergman reaction, 167
BLB theorem, 3
Bond order, 200
Bonding orbitals, 158, 164
Born–Oppenheimer approximation, 29
Brillouin theorem, 3
BSSE, 72, 101

Cartesian angular momentum functions, 72
Canonical orbitals, 74
CASSCF, 4, 20, 66, 100, 103, 108, 120, 121, 124, 126
CASPT2, 4, 99, 101, 126, 143, 150, 153
CGTO, 71
Charge-transfer state, 180
Complete Active Space, CAS, 4, 103, 122, 213
Configuration State Function, CSF, 1, 3, 90, 103, 108, 114 ff, 131 ff, 177, 213
Contracted Gaussian type orbitals, 71
Contraction coefficients, 71
Contraction schemes, 73
Coulomb integral, 32
COLUMBUS (CI code), 140

Dedication, ix
δ orbital, 32
Density Matrix, 18 ff
Density matrix averaged atomic natural orbitals, 76
DFT, 43, 47, 64, 122, 168, 191, 195, 196, 215
Diels–Adler reaction, 169
Direct CI, 3, 4, 140
Dissociation, 104, 204
Dispersion energy, 100 f
DKH, 64, 65, 79, 80
DMRG, 215
Double
  d-shell effects, 195
  shell effect, 128
  zeta, 74
Dynamic correlation, 2, 4, 93 ff, 111 ff, 143 ff
Dynamic correlation, 112
DZ, 74

Effective bond order, 200
Electronic configuration, 107
Energy surface, 109
Equipartition theorem, 29
Excited states, 111, 171
  excitation operator, 99, 117, 147 ff
Fock matrix, 54 ff, 153 ff
FORS method, 3
Full CI, 3, 13, 77, 87 ff, 104, 118, 138 f
GASSCF, 215
Gaussian type orbitals, 71
Gerade, 33
Graphical unitary group approach
  GUGA, 118
Graphical viewer, 158
Ground state reactions, 167
GTO, 71
GUGA, 4, 90, 118, 131, 134, 139, 200
Hartree product, 44
Hartree–Fock, 43
Heitler-London wave function, 2
Hilbert space, 8 ff, 85

Ionic terms, 106
Kato cusp, 95, 100
Koopmans’ theorem, 48, 153

LCAO, 30, 54, 69
Linear Combination of Atomic Orbitals, 30
Localized orbitals
  Boys, 161
  Cholesky localized orbitals, 161
  Edmiston–Ruedenberg, 161
  Pipek–Mezey, 161
  projected atomic orbitals, 161
Lone-pair orbitals, 158

Magnetic quantum number, 25
MB, 74
MCSCF, 2, 65, 77, 103, 104, 107, 109, 112, 113, 114, 118, 122
  gradient, 119
  Hessian, 119
Method
  HF Spin 50
  LCAO, 53
Transition metal chemistry, 194
Transition state, 109

Bohr radius, xiii
Hartree, xiii
Unoccupied orbital, 24

Ungerade, 33
Unitary rotations, 3
Units, xiii

Valence bond, 106
Variational principle, 27
Virtual orbitals, 158

Atomic units, xiii
Bohr, xiii
