</table>
6.5.2 Core Correlation, 80
6.5.3 Other Issues, 81
6.6 References, 81

7 Second Quantization and Multiconfigurational Wave Functions 85
7.1 Second Quantization, 85
7.2 Second Quantization Operators, 86
7.3 Spin and Spin-Free Formalisms, 89
7.4 Further Reading, 90
7.5 References, 91

8 Electron Correlation 93
8.1 Dynamical and Nondynamical Correlation, 93
8.2 The Interelectron Cusp, 94
8.3 Broken Bonds. $(\sigma)^2 \rightarrow (\sigma^*)^2$, 97
8.4 Multiple Bonds, Aromatic Rings, 99
8.5 Other Correlation Issues, 100
8.6 Further Reading, 102
8.7 References, 102

9 Multiconfigurational SCF Theory 103
9.1 Multiconfigurational SCF Theory, 103
9.1.1 The $H_2$ Molecule, 104
9.1.2 Multiple Bonds, 107
9.1.3 Molecules with Competing Valence Structures, 108
9.1.4 Transition States on Energy Surfaces, 109
9.1.5 Other Cases of Near-Degeneracy Effects, 110
9.1.6 Static and Dynamic Correlation, 111
9.2 Determination of the MCSCF Wave Function, 114
9.2.1 Exponential Operators and Orbital Transformations, 115
9.2.2 Slater Determinants and Spin-Adapted State Functions, 117
9.2.3 The MCSCF Gradient and Hessian, 119
9.3 Complete and Restricted Active Spaces, the CASSCF and RASSCF Methods, 121
9.3.1 State Average MCSCF, 125
9.3.2 Novel MCSCF Methods, 125
9.4 Choosing the Active Space, 126
9.4.1 Atoms and Atomic Ions, 126
9.4.2 Molecules Built from Main Group Atoms, 128
9.5 References, 130
10 The RAS State-Interaction Method 131
   10.1 The Biorthogonal Transformation, 131
   10.2 Common One-Electron Properties, 133
   10.3 Wigner–Eckart Coefficients for Spin–Orbit Interaction, 134
   10.4 Unconventional Usage of RASSI, 135
   10.5 Further Reading, 136
   10.6 References, 136

11 The Multireference CI Method 137
   11.1 Single-Reference CI. Nonextensivity, 137
   11.2 Multireference CI, 139
   11.3 Further Reading, 140
   11.4 References, 140

12 Multiconfigurational Reference Perturbation Theory 143
   12.1 CASPT2 theory, 143
      12.1.1 Introduction, 143
      12.1.2 Quasi-Degenerate Rayleigh–Schrödinger Perturbation Theory, 144
      12.1.3 The First-Order Interacting Space, 145
      12.1.4 Multiconfigurational Root States, 146
      12.1.5 The CASPT2 Equations, 148
      12.1.6 IPEA, RASPT2, and MS-CASPT2, 154
   12.2 References, 155

13 CASPT2/CASSCF Applications 157
   13.1 Orbital Representations, 158
      13.1.1 Starting Orbitals: Atomic Orbitals, 162
      13.1.2 Starting Orbitals: Molecular Orbitals, 164
   13.2 Specific Applications, 167
      13.2.1 Ground State Reactions, 167
      13.2.2 Excited States–Vertical Excitation Energies, 171
      13.2.3 Photochemistry and Photophysics, 184
      13.2.4 Transition Metal Chemistry, 194
      13.2.5 Spin-Orbit Chemistry, 202
      13.2.6 Lanthanide Chemistry, 207
      13.2.7 Actinide Chemistry, 209
      13.2.8 RASSCF/RASPT2 Applications, 212
   13.3 References, 216

Summary and Conclusion 219
