Contents

Preface xi

Chapter 1 Introduction and Channel Models 1

Adaptive Antenna Systems 3
Overview of Spatial Channel Models for Antenna Array Communication Systems 20
Antenna Systems for Base Station Diversity in Urban Small and Micro Cells 33
A Statistical Model for Angle of Arrival in Indoor Multipath Propagation 44

Chapter 2 Adaptive Algorithms 49

Highlights of Statistical Signal and Array Processing 51
Application of Antenna Arrays to Mobile Communications, Part II: Beamforming and Direction-of-Arrival Considerations 95
L. C. Godara (Proceedings of the IEEE, August 1997).
High-Resolution Frequency-Wavenumber Spectrum Analysis 146
An Algorithm for Linearly Constrained Adaptive Array Processing 157
The Application of Spectral Estimation Methods to Bearing Estimation Problems 167
On Spatial Smoothing for Direction-of-Arrival Estimation of Coherent Signals 178
Detection of Signals by Information Theoretic Criteria 184
Multiple Emitter Location and Signal Parameter Estimation 190
Using Spectral Estimation Techniques in Adaptive Processing Antenna Systems 195
Implementation of Adaptive Array Algorithms 205
Steady State Analysis of the Generalized Sidelobe Canceller by Adaptive Noise Cancelling Techniques 213
Adaptive–Adaptive Array Processing 221
ESPRIT—Estimation of Signal Parameters via Rotational Invariance Techniques 224
Sensor Array Processing Based on Subspace Fitting 250
Direction-of-Arrival Estimation via Exploitation of Cyclostationarity—A Combination of Temporal and Spatial Processing 261
Space-Altering Generalized Expectation Maximization Algorithm 272
Unitary ESPRIT: How to Obtain Increased Estimation Accuracy with a Reduced Computational Burden 286
Joint Angle and Delay Estimation (JADE) for Multipath Signals Arriving at an Antenna Array 297

Chapter 3 Performance Issues 301

Smart Antennas for Mobile Communication Systems: Benefits and Challenges 303
G. V. Tsoulos (Electronics & Communication Engineering Journal, April 1999).
An Adaptive Array in a Spread-Spectrum Communication System 314
On the Performance of a Polarization Sensitive Adaptive Array 324
Effect of Mutual Coupling on the Performance of Adaptive Arrays 332
Optimum Combining in Digital Mobile Radio with Co-channel Interference 339
On Optimum Combining at the Mobile 351
The Performance of an LMS Adaptive Array with Frequency Hopped Signals 359
An LMS Adaptive Array for Multipath Fading Reduction 371
Optimum Combining for Indoor Radio Systems with Multiple Users 378
The Performance Enhancement of Multibeam Adaptive Base-Station Antennas for Cellular Land Mobile Radio Systems 387
Combination of an Adaptive Array Antenna and a Canceller of Interference for Direct-Sequence Spread-Spectrum Multiple-Access System 399
Direction Finding in the Presence of Mutual Coupling 406
Improving the Performance of a Slotted ALOHA Packet Radio Network with an Adaptive Array 418

Signal Acquisition and Tracking with Adaptive Arrays in the Digital Mobile Radio System IS-54 with Flat Fading 427

Effect of Fading Correlation on Adaptive Arrays in Digital Mobile Radio 435

Capacity Improvement with Base-Station Antenna Arrays in Cellular CDMA 444

Analytical Results for Capacity Improvements in CDMA 452

Adaptive Transmitting Antenna Arrays with Feedback 463

Adaptive Antennas for Third Generation DS-CDMA Cellular Systems 466

The Spectrum Efficiency of Base Station Antenna Array System for Spatially Selective Transmission 471

Capacity Enhancement and BER in a Combined SDMA/TDMA System 481

Performance of Wireless CDMA with M-ary Orthogonal Modulation and Cell Site Antenna Arrays 486

Smart Antenna Arrays for CDMA Systems 500
J. S. Thompson, P. N. Grant, and B. Mulgrew (IEEE Personal Communications Magazine, October 1996).

Efficient Direction and Polarization Estimation with a COLD Array 510

Upper Bounds on the Bit-Error Rate of Optimum Combining in Wireless Systems 519

The Range Increase of Adaptive Versus Phased Arrays in Mobile Radio Systems 525

A Comparison of Two Systems for Downlink Communication with Base Station Antenna Arrays 535
P. Zetterberg (IEEE Transactions on Vehicular Technology, September 1999).

Chapter 4 Implementation Issues 551

Fundamentals of Digital Array Processing 553

A Novel Algorithm and Architecture for Adaptive Digital Beamforming 560

Nonlinearities in Digital Manifold Phased Arrays 569

Adaptive Beamforming with the Generalized Sidelobe Canceller in the Presence of Array Imperfections 579

An Efficient Algorithm and Systolic Architecture for Multiple Channel Adaptive Filtering 596

Mutual Coupling Compensation in Small Array Antennas 603

A Unified Approach to the Design of Robust Narrow-Band Antenna Array Processors 607
Contents

Design Trades for Rotman Lenses  614  

Optimum Networks for Simultaneous Multiple Beam Antennas  623  

Direction Finding in Phased Arrays with a Neural Network Beamformer  630  

Application of Orthogonal Codes to the Calibration of Active Phased Array Antennas for Communication Satellites  636  

The Analogy Between the Butler Matrix and the Neural-Network Direction-Finding Array  649  

Forward–Backward Averaging in the Presence of Array Manifold Errors  655  

Chapter 5  Experiments  661  

Multiple Source DF Signal Processing: An Experimental System  663  

An Implementation of a CMA Adaptive Array for High Speed GMSK Transmission in Mobile Communications  673  

A Four-Element Adaptive Antenna Array for IS-136 PCS Base Stations  680  

Ericsson/Mannesmann GSM Field-Trials with Adaptive Antennas  685  

Preliminary Measurement Results from an Adaptive Antenna Array Testbed for GSM/UMTS  690  

Performance Evaluation of a Cellular Base Station Multibeam Antenna  695  

Space Division Multiple Access (SDMA) Field Trials. Part 1: Tracking and BER Performance  704  

Space Division Multiple Access (SDMA) Field Trials. Part 2: Calibration and Linearity Issues  710  

Chapter 6  Applications and Planning Issues  717  

High Data Rate Indoor Wireless Communications Using Antenna Arrays  719  

On Optimizing Base Station Antenna Array Topology for Coverage Extension in Cellular Radio Networks  726  

Usage of Adaptive Arrays to Solve Resource Planning Problems  731  
Contents

Subscriber Location in CDMA Cellular Networks 735

On the Capacity Formula for Multiple Input–Multiple Output Wireless Channels: A Geometric Interpretation 745

Author Index 761

Subject Index 763
