Subject Index

A
ABA research design, 295
ABC assessment, 294
Ability traits, 192
Abortion, 341
ABS (attachment behavioral system), 112
Academic challenges, 401–402
Acquiescence, 47
Adler, Alfred, 102–104. See also Psychoanalytic theory
Adoption studies, 257–258
Adult attachment types, 113–116
Age
agreeableness and, 214
five-factor model of personality and, 213–214
psychological resilience and, 403–404
socioemotional selectivity and, 404–406
Allport, Gordon W., 186–187
Allport’s trait theory, 186–189
cardinal traits in, 188
central traits in, 188
comment on, 189
functional anatomy of human motives and, 188
idiographic research and, 188–189
personality structure and, 191–192
secondary dispositions in, 188
Amygdala
emotional learning and, 269
fear responses and, 247
Anal personality type, 93
Anal stage of development, 93
Anchoring, 339–340
Animal personality studies, 211
Anticipating events, personal construct theory and, 315–316
Anxiety
anxious-ambivalent infants, 113
anxious-avoidant infants, 112
defense mechanisms and, 71–75
in personal construct theory, 317–319
psychoanalytic concept of, 70
in social-cognitive theory, 381–382
Applications
of behaviorism, 297
of Big Five model, 216–218
of Kelly’s personal construct theory, 327
of psychoanalytic theory, 123–124
of Rogers’ person-centered theory, 178
of social-cognitive theory, 392
of trait theory, 238–239
Archetypes, 105
Assessment
in context (case study), 411–414
defined, 51
factor-analytic trait-based, 230–231
fixed vs. flexible, 34–35
nomothetic, 45
psychodynamic personality assessment, 86–91
in Skinnerian theory, 294
targets of, in personality psychology, 36
Attachment behavioral system (ABS), 112
Attachment behavior, psychoanalytic theory and, 82
Attachment theory, 111–112
adulthood, 113, 115
anxious-ambivalent attachment type, 112
anxious-avoidant attachment type, 112
cultural differences in attachment styles, 112
developmental processes in, 112
individual differences in, 112
internal working models, 112
parenting environment in, 142–144
secure attachment type, 112
“strange situation” procedure in, 112
style continuity in, 116
Authenticity
feelings of, 130–131
internally motivated goals and, 163–166
Average behavior, 36
Awareness, varying states of, 18–19

B
Bali, social practices in, 408
Bandura, Albert, 332–333
BAT (Behavioral Avoidance Test), 383
Beck, Aaron, 386–388
Behavior
discriminativeness of, 334
internal and external determinants of, 16–17
stability and variability in, 194–195
token economy programs and, 295–296
Behavioral assessment, 294–295
Behavioral Avoidance Test (BAT), 383
Behavioral genetics, 255–262
adoption studies, 257–258
heritability coefficient, 259
heritability estimates, 260
heritability of personality findings, 259–260
inappropriate conclusions from, 260
molecular genetic paradigms, 261–262
selective breeding studies, 255–256
twin studies, 256–257
Behavioral signatures, 348
Behaviorism, 273–300
applications of, 299
classical conditioning and, 280–281
comprehensiveness of, 299
determinism and, 275
environmental determinism and, 275–277
experimentation in, 277–278
observable variables in, 277–278
Pavlov’s theory of classical conditioning and, 280–281
science of personality in, 275–278
scientific observation in, 122
simple system strategy in, 277–278
situational specificity in, 277
Skinner’s theory of personality, 288–297
strengths and limitations summary, 299
systematic theory in, 297
testability of, 298
view of the person in, 274–275
Watson’s behaviorism, 278–279
Biological bases of personality traits, 199–200
Biological foundations
behavioral genetics, 255–262
brain and mood/emotions, 266–270
data interpretation on personality, 247–248
environmental interactions and, 262–265
evolutionary psychology and, 249–255
plasticity and, 270–271
proximate causes and, 248
suggested links and, 269
temperament and, 243–248
ultimate causes and, 248
Brain
attachment and, 114–115
classical conditioning and, 287
constructs and expertise and, 313
cultural differences in self and, 168–169
delay of gratification and, 359
everest and, 200
goals and, 370
Brain (continued)
hysteria and, 57
inhibition and, 247
left and right hemispheric dominance, 266–267
mood, emotion, and, 266–270
neuroticism and, 199
neurotransmitters and temperament, 267–270
oxytocin and, 400
personality and, 35–36
personality traits and, 209
self and, 271
sources of evidence, 35
studying and, 370
Brain plasticity, 270–271
Broader-and-build theory, 159
Buddhist cultures, 407
C
CAPS (cognitive-affective processing systems), 346–349
Cardinal traits, 188
Case studies. See also under specific theories
as research approach, 39–41
strengths and limitations of, 45–46
Castration anxiety, 77
Catharsis, 57
Cattell, Raymond B., 191–192
Cattell’s factor-analytic trait theory, 191–195
ability traits and, 192
behavioral stability and variability and, 194–195
comment on, 195
dynamic traits and, 192
evidence sources and, 192–194
five-factor model of personality and, 212
life record data (L-data) and, 192–194
objective-test data (T-data) and, 192–194
self-report questionnaire data (Q-data) and, 192–194
surface and source traits and, 191–192
temperament traits and, 192
Central traits, 188
Classical conditioning, 280–281
basic neural and biochemical processes in, 287
conditioned emotional reactions in, 282
counterconditioning in, 283
discrimination in, 281
extinction in, 281
generalization in, 281
principles of, 280–281
psychopathology and change in, 281–285
recent developments in, 286–287
self-esteem in, 287
systematic desensitization in, 283–284
unconditioning of fear in, 282–283
Client-centered therapy, 175
Clinical research
as research approach, 38
strengths and limitations of, 45–46
Cognitive-affective processing systems (CAPS), 346–349
Cognitive–affective stress management training (C-ASMT) program, 384
Cognitive complexity
leadership and, 316
in personal construct theory, 312, 314
simplicity of construct systems and, 312, 314
Cognitive therapy for depression (Beck), 386–388
approach to, 387–388
cognitive triad in, 386–387
faulty research on, 387
Cognitive unconscious, 65–67
Collective unconscious, 105
Compensatory striving, 103–104
Competencies, in social-cognitive theory, 336
Conditioned emotional reactions, 282
Conditions of worth, 141
Conflict, intrapsychic, 94
Congruence, between self and experience, 137, 139
defensive processes and, 139–140
self-consistency and, 140–141
Conscious thought, 36
Constructive alternativism, 305
Constructs, defined, 307
Construct system, 309–312, 314
cognitive complexity/simplicity, 312, 314
core constructs, 310
peripheral constructs, 310
preverbal constructs, 310
Role Construct Repertory test, 310–311
submerged constructs, 309, 310
subordinate constructs, 310
superordinate constructs, 310
unique information revealed by, 311–312
verbal constructs, 309
Construct validity, 38
Construct system, 309–312, 314
Context specificity, in social-cognitive theory, 336
Contingencies of self-worth, 164–165
Cool attentional focus, 398–399
Coping, social-cognitive therapy and, 384–388
Core constructs, 310
Correlational research
as research approach, 41–43
strengths and limitations of, 46–48
Correlation coefficient, 41
Cortisol, 269
Counterconditioning, 283
Creative potential, fostering, 144
Cross-cultural research
five-factor model of personality and, 221–224
on the self, 167–170
Cross-situational consistency, personality traits and, 234–236
Cultural determinants, of personality growth and development, 13
Culture and personality, 406–410
in Big Five model of personality, 406
cognitive processes, 410
cultural psychology field, 407
culture as core concept, 407–408
generalizability, 406
independent and interdependent views of self, 409–410
karma concept, 407
new exposures and, 410
strategies for thinking about, 406–408
supplemental treatment of culture, 407
views of self, 409–410
D
Data of personality psychology, 29–39
fixed vs. flexible measures, 34–35
idiographic measures, 35
LOTS categories and, 30
nomothetic measures, 35
personality and brain data, 35–36
personality theory and assessment, 36–37
relationships between, 32–34
Death anxiety, 161
Death instincts, 69–70
Defense mechanisms, 71–75
behavior consequences of, 94
denial, 71–72, 140
distortion, 140
isolation, 73
projection, 72–73
rationalization, 73
reaction formation, 73
repression, 74–75
sublimation, 73–74
Defensive pessimism, 401, 402
Delay of gratification, 355–360
attractive qualities of rewards and, 357
observed consequences, 356
social bases of, 356
Demand characteristics, 49
Denial, 71–72, 139
Depression
cognitive therapy and, 387–388
cognitive triad of, 386–387
faulty cognitions and, 387
older adults and, 404
and social-cognitive theory, 381–382
Determinism, 275
Development (psychoanalytic theory), 75–84
anal stage, 77
genital stage, 78
importance of early experience in, 81–82
instinct development, 75–78
latency stage, 78
oral stage, 76
phallic stage, 77–78
Thinking process development, 82–84
Direct conditioning, 283
Discrepancies, among parts of the self, 163–164
Discriminant validity, 38
Discrimination process, classical conditioning and, 281
Dispositions, personality, 3
Distortion of experiences, 139
Dopamine, 267–270
Dreams
interpretation of, 95–96
in psychoanalytic theory, 61–62
Dynamics of functioning, 70–71
Dynamic traits, 192
Dysfunctional expectancies, 381
Dysfunctional self-evaluations, 381

E
Early experience, psychoanalytic theory, 81–82
Eastern cultures, 167, 409
Ego, 68–69
Electroencephalography (EEG), 35, 266
Ellis, Albert, 385–386
Emotion
and the brain, 266–270
conditioned emotional reactions, 282
emotional learning, 269
and self-discrepancies, 163–164
socioemotional selectivity, 404–406
virtues of positive emotions, 159–160
Emotional infidelity, 253
Emotion-focused coping, 384
Empathic understanding, 151
Energy-system view of the mind, 56
Entity theory of intelligence, 369
Environmental determinants, of growth and development, 13–15
Environmental determinism, 275–277
Environmental interactions, 262–265
nature-nurture interactions, 264–265
nonshared environment effects, 264
shared and nonshared environments, 262–264
Erikson, Erik, 79–81. See also Psychosocial stages of development
Erogenous zones, 76
Ethics, research and, 38–39
European-American cultures, 409–410
Evolutionary psychology, 248–255
architecture of mental systems and, 250
domain specificity and, 250
evolved tendencies and, 249
geneic influences in, 12
jealousy and, 253
male-female mate preferences and, 252–253
parental investment theory and, 252
parenthood probability theories and, 252
sex differences and, 251, 253–255
social exchange and cheating detection, 250–251
Evolved psychological mechanisms, 249–250
Executions, moral disengagement and, 343
Existentialism, 160–163
contemporary experimental existentialism, 161–163
major aspects of, 158–159
mortality salience and, 162
terror management theory and, 161
Expectancies, in social-cognitive theory, 336–341
Experience, subjectivity of, 130–132
Experiential thinking, 83
Experimenter expectancy effects, 49
Experiments
as research approach, 44–45
strengths and limitations of, 48–49
Explicit motives, 66
Extinction process, in classical conditioning, 281
Extraversion and the brain, 199
social behavior and, 200–202
Eysenck, Hans J., 195–197
Eysenck’s personality theory
biological bases of personality traits and, 199–200
comment on, 189
extraversion and social behavior, 197, 200–202
factor measurement and, 197–198
five-factor model of personality and, 212
introversion-extraversion and, 197
lemon drop test and, 198
neuroticism and, 199
personality structure and, 187–188
psychopathology and behavior change, 202
psychoticism and, 198
super factors and, 197–199

F
Factor analysis, 189–191
advantages of, 191
covariation patterns, 191
identifying trait dimensions, 192
mathematical statistics, 190
subjective decisions, 191–193
typical study and, 190
Falsified conclusions, 39
Familial IQ correlations, 258
Family influence, 14
Fantasy, 149
Faulty cognitions, depression and, 387
Feared stimuli, 63
Fear, in personal construct theory, 317–319
Fear responses, amygdala and, 247–248
Feelings of authenticity, 130–131
Five-factor model of personality (Big Five), 205–240
age differences and, 213–214
applications of, 216–218
Big Five trait factors in, 240
biological basis of factors, 218–219
and the brain, 209
career choice and, 216
case study with, 230–232
causal structure in, 219
in clinical diagnosis and treatment, 217
cross-cultural research on, 221–224
Eysenck’s and Cattell’s factors and, 212
factor-analytic trait-based assessment, 230–232
fundamental lexical hypothesis and, 210
health applications of, 216–217
illustrative scales for, 209
limitations of, 224–226
NEO-Personality Inventory, 211–212
personality stability and, 231–233
in planning psychological treatments, 217
in questionnaires, 211–213
research evidence and, 207–210
self-ratings in, 212–213
stability and change in personality, 214–215
subjective well-being and, 216–217
trait term analysis, 208–210
Five factor theory, 218–221
Fixations, 92
Fixed assessment methods, 34–35
Fixed-role therapy, 321–322
Fixed schedules, operant conditioning and, 291
Flexible assessment methods, 43–35
Flow experiences, in positive psychology, 160
fMRI (functional magnetic resonance imaging), 35, 271
Focus of convenience, 305
Food tastes, classical conditioning and, 285
Foresight, 354
Fraudulent data, 39
Free association technique, 55, 95–96
Free-floating anxiety, 71
Free will, 296–297
Freud, Sigmund, 54–56. See also Psychoanalytic theory
Functional analysis of behavior, 294
Functional anatomy of human motives, 188
Functional magnetic resonance imaging (fMRI), 35, 271
Fundamental lexical hypothesis, 210
Fundamental postulate of personal construct theory, 315

G
Generalization, classical conditioning and, 281
Generalized reinforcers, operant conditioning and, 291
General principles approach, 373
Genetic determinants, of growth and development, 12–13

Genital stage of development, 78

Goals
authenticity and internally motivated, 165
and brain physiology, 370
learning vs. performance, 367–370
of research, 37–39
in social-cognitive theory, 336, 341–342

Goals, in social-cognitive theory, 342–344, 354–355

Growth and development, 11–15. See also Development (psychoanalytic theory)
culture and, 13
environmental determinants of, 13–15
family influence on, 14
genetic determinants of, 12–13
in Kelly’s personal construct theory, 319–320
parent-child relationships and, 142–145
peer groups and, 15
in psychoanalytic theory, 75–84
in Skinner’s theory of personality, 293
social class and, 10–11, 13–14
in social-cognitive theory, 349–360
social relations and self-actualization, 145–146
in trait theory, 213–218

Guided mastery, social-cognitive theory and, 382–383

Health
delay of gratification, 359
five-factor model of personality and, 217
self-efficacy and, 382

Hemispheric dominance, 266–267
Hemispheric lateralization, 269
Heritability coefficient, 259
Heritability estimates, 260
Hierarchical analysis
NEO-Personality Inventory and, 211–212
trait theories and, 186
“Higher-level” psychological functions, 271
Highly repeated within person (HRWP) approach, 383
High-reactive infants, inhibition and, 245
HIV/AIDS, 414–415
Horney, Karen, 106–107
Hot attentional focus, 398–399
Human potential movement
exceptional figures in, 157
human motivation, 156–158
Maslow’s hierarchy of needs, 157
social structures, 156

Human strengths classification, 158–159
Hypnosis, 63
Hysteria (conversion disorder), 57

Id, 67
Ideal self, 137

Identification process, 78

Identity achievement, 80
Identity diffusion, 80–81
Identity foreclosure, 80
Identity formation (Erikson), 80
Identity moratorium, 80
Idiographic research, 35, 188–189
Implicit motives, 66
Implicit theories, 369–370
Incremental theory, 369
Independent views of self, 409–410
Individual, society and, 59
Inhibited children, 245–247
Inner mental life, 3–4
Instinct development, 69
Intelligence, 258, 369
Interdependent views of self, 409–410
Internal working models, in attachment theory, 112
Internet, self-report questionnaires and, 30
Interpersonal consequences, constructs and, 309
Interpersonal psychodynamic theorists, 107
Interpersonal relationships, 396–401
hot vs. cool attentional focus and, 398–399
rejection sensitivity in, 397–399
transference in, 399–401
Introversion-extraversion, 197
Intuitive self, 134–135
Isolation, 73

Jealousy, evolutionary psychology and, 253
Jung, Carl G., 104–106

K
KAPA (Knowledge-and-appraisal personality architecture), 373, 375–376
cross-situational coherence, in self-appraisals, 376–379
social-cognitive personality assessment, 376
Karma, 407
Kelly, George, 303–304
Kelly’s personal construct theory, 301–328
anticipating events in, 315–316
anxiety and, 317–319
applications of, 327
case study for, 322–324
change and fixed-role therapy in, 321–322
clinical applications of, 320–322
cognitive complexity vs. simplicity in, 312, 314
comprehensiveness of, 326–327
constructive alternativism in, 305
constructs and interpersonal consequences, 309
construct system in, 309–312, 314
construct types in, 309–314
contrast pole in, 308
fear and, 317–319
focus of convenience in, 305
fundamental postulate in, 315
growth and development in, 319–320
major contributions of, 328
person-as-scientist view, 306
process in, 314–319
psychopathology and, 320
range of convenience in, 305
recent developments in, 324–325
Rep test for children, 322–324
Role Construct Repertory Test, 315, 322–324
Role Construct Repertory test, 310–311
science of personality in, 304–306
scientific observation in, 325
similarity pole in, 308
structure in, 307–308
systematic theory in, 325–326
threats in, 317–319
unique information and personal construct testing, 311–312
view of person in, 306–307
Knowledge-and-appraisal personality architecture (KAPA), 373, 375–376
cross-situational coherence, in self-appraisals, 376–379
social-cognitive personality assessment, 376

L
Laboratory studies
as research approach, 44–45
strengths and limitations of, 48–49
Latency stage of development, 78
L-data (life record data), 29–30, 192–194
Learning goals, 367–370
Left hemispheric dominance, 266–267
Levels of consciousness, 60–64
core of unconscious and, 61
conscious level, 60–61
dreams and, 61–62
motivated unconscious and, 62
perception without awareness and, 63
perceptual defense and, 63
preconscious level, 61
psychoanalytic and cognitive views of unconscious, 65–67
relevant psychoanalytic research on, 62–64
subliminal psychodynamic activation and, 63–64
unconscious level, 64–65
Libido, 70
Life and death instincts, 69–70
Life course, trait consistency across, 215
Life record data (L-data), 29–30, 192–194
Little Albert case, 282
Little Hans case, 97–99, 285–286
Longevity, personality characteristics and, 42
Longitudinal stability, personality traits and, 233
LOTS categories of data, 35
Low-reactive infants, inhibition and, 245

M
Major contributions
of behaviorism, 299–300
of Kelly’s personal construct theory, 328
of psychoanalytic theory, 124–125
of Rogers’ person-centered theory, 178–179
of social-cognitive theory, 392–393
Maladaptive environments, behaviorism and,
277
Maladaptive responses, 293
Male-female mate preferences, 252–253
Marshmallow test, social policy implications,
358
Maslow, Abraham, 156–158. See also Human
potential movement
Mate preferences, 252–253
Mechanism, 55
Memories, recovered, 76–77
Microanalytic research strategy, 339
Mischel, Walter, 333–335, 356–360
Molecular genetic paradigms, 261–262
Mood, brain and, 266–270
Mortality salience, 162
Mood, behaviorism and, 277–278
Mood, brain and, 266–270
Mood, behaviorism and, 277–278
Moral development, 115–117
Moral reasoning, 115
Morality, 250–251
Morality, development and, 116
Moshe, 95
Motivational unconscious, 62
Motivation: internal/external, 162

N
Narcissism, 109–111
Natural language, 208–209
Nature-nurture interactions, 264–265
Need(s)
Maslow’s hierarchy of, 158
for positive regard, 141–142
NEO-Personality Inventory Revised (NEO-
PI-R), 211–212
hierarchical structure and, 211–212
older factor-analytic models and, 212
self-ratings and observer ratings, 212–213
six facets of, 211–212
Neural processes, classical conditioning and,
287
Neuroimaging methods, 247
Neurons, 35
Neuroscience and personality, 271
Neurotic functioning, 107
Neuroticism, 199
Neurotransmitters, 267–270
New York Longitudinal Study (NYLS), 244
New York Times, 39, 290
Nihilism, 202
Nomothetic assessment measures, 35
Nonconscious influence on behavior, 54
Nonshared environments, 264
