  - gastrointestinal system 55–56
  - inflammatory bowel disease 56
  - pancreatitis/pancreatic pain 56–57
- sources of pain 55–59
- spleen 56
- urogenital system 57–59

**A-beta Fibre Mediated Inhibition, neuropathic pain** 21

- acepromazine 113–114, 248, 273, 274, 113
- cardio-respiratory effects 113
- contraindications 114
- environmental injuries 456
- geriatric patients 333
- head/neck injuries 345
- integument injuries 442
- kidney disease 259
- liver disease 267
- musculoskeletal pain 411, 412
- nursing patients 301
- pregnant patients 287
- thorax 358, 359
- torso/abdomen 378, 379, 393, 394
- vertebral column 425
- acetaminophen (paracetamol), nursing patients 300
- acupuncture 205–207
- neuropathic pain 24, 43
- acute kidney injury/failure (AKI/F), anesthetic considerations 257–261
- acute pain management, neuropathic pain 36–43
- adjunct analgesics 102, 144–161
  - case example 161
  - nursing patients 300–301
- adjunct medications, kidney disease 260–261
- adverse effects
  - see also compatibility of drugs
  - acepromazine 113
  - analgesics 2–5, 146–147, 150–152, 154–159
  - tramadol 131
  - venlafaxine 159–160
- affective visceral co-morbidities, pathophysiology 61–62
- aggressive patients 270–277
- cats 271–272
- dogs 270–271
- handling strategies 270–272
- initial presentation 3–4
- protocols 273–277
- risk factor for anesthesia- adverse events 273
- sedation/anesthesia 272–277
- airway obstruction 343–346, 350
- alfaxalone 166–167, 249, 273, 274, 277
- cesarean section 291
- environmental injuries 456
- musculoskeletal pain 412
- nursing patients 303
- pregnant patients 288
- thoracic cavity injury 364
- torso/abdomen 379
