INDEX

Page numbers in italics refer to Figures; those in bold to Tables.

A, B, C and D, 12
A-V sequential pacing, 146–7
ABCDE approach, 275–6
abdominal trauma, 231–2
absorption, 217
abuse
definition, 385
emotional, 386–7
physical, 385–6
recognition, 384, 385
sexual, 386
see also domestic violence; neglect
ACE inhibitors see angiotensin converting enzyme (ACE) inhibitors
acetaminophen see paracetamol
acid base balance
electrolytes and, 49
monitoring, 48
pathways in regulation, 48–9
acid base imbalances
compensatory mechanisms, 49
primary metabolic, 50
primary respiratory, 50, 51
systemic effects, 48
acidaemia, in cardiac arrest, 17
acidosis, clinical implications, 111
acquired heart disease, 148–54
acquired urinary tract infection, 15
acrocyanosis, 44
actual refractory period (ARP), 110
acute disseminating encephalomyelitis (ADEM), 200
acute febrile mucocutaneous syndrome see
Kawasaki disease
acute haemorrhagic pancreatitis, 219–20
acute inflammatory demyelinating polyradiculoneuropathy, 200
acute kidney injury (AKI), 169, 172–86
acute treatment, 173–5, 174
causes, 173
definition, 169
indications, 173, 173
long-term follow-up, 177
nutrition in, 175
prevention of complications, 175
risk in children under 1 year, 171
tests in children, 173
types, 172
interpretation from urinalysis, 173, 173
see also intrinsic renal injury;
postrenal (obstructive) injury;
prerenal injury; renal replacement therapy
acute liver failure (ALF), 234–7
causes, 235
clinical features, 235
complications, 235, 237
management, 235, 236, 237
predictive outcomes, 237
Acute Lung Injury, 87
acute motor axonal neuropathy (AMAN), 200–1
acute motor-sensory axonal neuropathy (AMSAN), 200–1
acute myocarditis, 149–51
clinical presentation, 150–1
infectious causes, 150
management, 151
non-infectious causes, 150
pathophysiology, 150, 150
acute pain, 326
acute pain team, role, 334
acute renal failure see acute kidney injury
acute respiratory distress syndrome (ARDS), 87–90
causes, 88
characteristics, 88
drugs used in management, 90, 92
energy crisis in cell, 89
management of child with, 90, 91
nitric oxide therapy, 90
parental support, 90
pathophysiology, 88–90, 89
acute tubular necrosis (ATN), 172
acyanotic heart lesions, 127–32
Addisonian crisis, 241–3
Addison’s disease, 241–2
Adelaide Coma Scale, 14
ADEM see acute disseminating encephalomyelitis
adenosine tri-phosphate (ATP), 310
ADH, 304–5
adrenal gland, 241
adrenal insufficiency, 241–3
causes, 241
