A

Academic-community research partnerships, developing, 48–49

Accessibility, 109

Action-Oriented Community Diagnosis (AOCD), 136, See also United Voices of Efland-Cheeks, Inc.; benefits of, 154; case study research design, 141–142; and colearning, 152; community forum planning committee, 153; competencies necessary for conducting, 139–140; conducting, 141–142; constructivist research paradigm, 140–141; as critical first step in program planning/evaluation, 138–139; data collection and analysis, 142–143, 153; data interpretation, sustaining movement from, 153; dissemination, 143; duration/time required to complete, 143; forum planning committee, 143; gaining entry, 146, 151, 153–154; key to, 154–155; origins of, 137–140; participant observation, 146; partnership approach, 154; positivist research paradigm, 141; postpositivist research paradigm, 141; purpose of, 154; range of concepts/skills required by, 152–153; research design and methods, 140–143

Advocacy: goals, setting, 82; housing advocacy coalitions, 471; organized efforts, 164; and photovoice, 491; policy, 280, 519–521; services, 253; skills, 180

African Americans, See also Rural African-American community: and Detroit community, 253, 255; diabetes in, 521; economic/political marginalization, 14; rate of heart disease among, 521; and research, 14; and United Voices of Efland-Cheeks, Inc., 144–145

Agency for Healthcare Research and Quality, 7

Agreeing to disagree, and conflict, 86

Air Filter Intervention Study, 408, 409

Air pollution, 14; and containerized goods, 470; effects of, 551; fugitive emissions from nearby industries and transportation corridors, 560; National Air Toxics Assessment, 556;
particulate, 564; and respiratory problems/heart disease, 336; and South Coast Air Quality Management District, 552
Air quality data collection, Healthy Environments Partnership (HEP), 200
Air samples, 336–337
Allen, C. A., 335
Allen, J. III, 69
Allen Temple Baptist Church, and Leadership-Building Institute, 472
Alliance of Californians for Community Empowerment (ACCE), 471
Alma Ata Declaration (1978), 98
Alternate research ethics training, 109
American Indian community, See also Interviewer training manual development: cancer incidence, decrease in, 227; cancer survey development and implementation within, 226; cervix cancer incidence rates, 227–228
American Indians and Alaska Natives (AIAN), decrease in incidence for all cancers combined, 227; Native American Cancer Research Corporation (NACR), 230
ANTHROPAC, 174–175, 180
AOCD, See Action-Oriented Community Diagnosis (AOCD)
Apprenticeships, 50, 58–60
Apsáalooke Reservation, See also Interviewer training manual development, Apsáalooke project: cancer survey with women on, 225–248, CBPR partnership background, 229–230; community-based organizations (CBOs), 229; community setting, 226–228; Crow Tribal Resolution LR09–02, 229; dissemination and use of survey findings, 238–239; family ties, importance of, 227; erosion of, 226; Fort Laramie Treaty, 226–227; interviewee responses, 237–238; interviewer hiring/training, and respect for the community, 238–240; interviewer manner with, 234–235; language use with, 236–237; Little Big Horn College (LBHC), 240; Messengers for Health on the Apsáalooke Reservation, 226–227, 229, 238; National Breast and Cervical Cancer Early Detection Program, 229; recruitment/enrollment for survey, 233–234; respect in interviews with, 235–236; traditions, 227
ArcPad GiS software, 472
Aronson, R., 97
Assessment group, forming, 166–167
Assessment models, 168–169; ethnography, 168–169
Asthma, 336; environmental exposure assessment methods, 337–340; sampling techniques, 337; Seattle-King County Asthma Program (SKC-AP), 340–342; triggers, 337
Asthma, Infections, Roadways and Youth study (AIRWAYS), 408, 410
At The Crossroads Homeowners Association, 471
Atlas.ti qualitative software, 263
Attiudes, and cultural humility, 16
Avila, M. M., 43

Becker, A. B., 69
Belone, L., 43
Berg, M. J., 161
Berry, N. S., 305
Bonding/bridging among CBOs and community members, and mapping process, 483
Brakefield-Caldwell, W., 405
Brooklyn Food Coalition (BFC), 522–526, See also Food environments, in NYC; CBPPW efforts, 528; and Farm Bill, 535; goal of, 525; participant tensions, 539–540
Brooklyn, New York, community mapping, 477–478; Radiac, 477–478; skulls used on maps to more local hazards, 478; Toxic Avengers, 478
Budgets: for dissemination activity resources, 430; ; for hosting-associated expenses in focus groups, 269; for transcription/translation services, 270
Bureau of Air Resources Administration Management Information System (BARAMIS), NYC Department of Environmental Protection, 480
Burhansstipanov, L., 225
Bylaws, partnerships, 111–114

C
CAAA, See Community Action Against Asthma (CAAA)
California Air Resources Board (CARB), 473
Cancer Care and Racial Equity Study (CCARES) project, 115
Capacities, assessment of, 50–51
Capacity building, 257; and CBPR, 10; at individual/organizational levels, 323; partnerships, 8, 24–25; in research skills, 59, 62
Cardiovascular disease, 436–437
Causa Justa/Just Cause (CJJC), 471
CBE, See Communities for a Better Environment (CBE)
CBPR partnerships, See Partnerships
Centers for Disease Control and Prevention (CDC), 253; Prevention Research Centers program (CDC), 5
Challenges: closed-ended survey questionnaires, 386–389; Community Action Against Asthma (CAAA), 424; community-based participatory policy work (CBPPW), 536–537; community maps, 482–483; focus groups, 266–267; Food Environment Audit for Diverse Neighborhoods (FEAD-N), 292–294; Healthy Homes, 350–358; Horizonte Latino, 321–322; in-depth, semistructured interviews, 386–389; interviewer training manual development, 240–241; Men on the Move CBPR project, 453; photovoice, 506–507
Chemokines project, 407
Children’s Environmental Health Research Initiative, 407
Chinatown (San Francisco), NIEHS-funded project on health and safety issues for restaurant workers, 56
Cho, M., 517
Christopher, S., 225
Citizen power, gradation of, 98
Closed-ended survey questionnaires, 371, 375, 382–386; challenges, 386–389; data analysis, 384; data collection, 384; data feedback/interpretation/discussion, 384–385; lessons learned, 389–393; limitations, 386–389; practice implications, 389–393; program changes based on results, 385–386; survey questionnaire, development of, 383–384
Coad, N., 97
Coauthorship: defined, 414; rules, establishing, 413–414
Cohompliance: and Action-Oriented Community Diagnosis (AOCD), 152; and CBPR, 10; focus groups, 252, 297
Collaboration, community ethnographers, 312
Collaborative map making, 463–488
Collaborative model, ethnography, 308
Collaborative research, 5
Collaborative survey development, 198
Columbia University Children's Environmental Health Center, and West Harlem Environmental Action (WE ACT), 61–62
Communities for a Better Environment (CBE): mission of, 469–471; Toxic Tours/The Freedom to Breathe initiative, 477
Community-academic partnerships, 269
Community Action Against Asthma (CAAA), See also Dissemination committee, CAAA: Air Filter Intervention Study, 408, 409; Asthma, Infections, Roadways and Youth Study (AIRWAYS), 408, 410; CBPR principles, 408; challenges, 424; Community Organizing Network for Environmental Health (CONEH), 407, 409; culturally sensitive dissemination, ensuring, 426; data analysis process, 425; Diesel Exposure Study, 408, 409; dissemination activities, budgeting adequate resources for, 430; dissemination committee, 410–416; dissemination decisions/activities, examples of, 416–423; dissemination issues/guidelines, need to develop a mechanism for identifying and deciding on, 429; dissemination to community audiences/academic audiences, achieving a balance between, 425–426; EPA-funded grant, 408; experience/expertise, 427; geographical focus area for CAAA projects, 408; joint academic-community participation in dissemination activities, 427–428; lessons learned, 427–430; MCECH-affiliated Epidemiological Study, 409; MCECH-affiliated Household Intervention, 409; Near-Roadway Exposure to Urban Air Pollutants (NEXUS) Study, 408, 410; NIEHS-funded R01 projects, 408; partnership, 405–433; “Philosophy and Guiding Principles for Dissemination,” 414, 416; practice implications, 427–430; projects/dissemination activities, 409–410; steering committee, 407–408; time-consuming nature of dissemination, 428–429
Community Action Against Asthma (CAAA) partnership, 26–27, 200
Community Action Agencies, 98
Community Alliance for the Environment (CAFE), 478–479
Community assessment, 135, 162; and CBPR, 163–166
Community assets, 48
Community-based ethnographic participatory research (CBEPR), 307
Community-based organizations (CBOs), 47; activities, encouraging active participation in, 56; and food environments, 297; perspective, 54–55
Community-based participatory policy work (CBPPW), See also Food environments, in NYC: Brooklyn Food Coalition (BFC), 522–526; challenges, 536–537; compared to traditional efforts at policy analysis/advocacy, 520–521; data collection, 528–536; defined, 518; diverse skills, need for, 538–539; education and research processes, coupling, 540–541; evidence, how/where to use persuasively, 541; evidence researchers collect/analyze, 537; Faith Leaders for Environmental Justice (FLEJ), 526–527; food justice case studies, 522; grant funding/resources, 539; Health Equity Project (HEP), 527; to improve food environments in NYC, 517–545; lessons learned, 538–541; limitations, 536–537; participant experiences with current policies, eliciting data on, 530–532; participant tensions, 539–540; policy formulation phase, research methods for, 523–524; policy opportunities, eliciting views on, 535–536; policy questions, framing of, 520; policy scanning/analysis, 534–535; practice implications, 538–541; primary data on food environments, collecting/analyzing, 533–534; priority problems, eliciting constituencies’ definitions of, 529; synthesis/interpretation of existing data on food/food environment problems, 532–533
Community-based participatory research (CBPR), 4, 5, 198, 226, 306–307; achieving an effective collaborative process, evaluating progress toward, 25; acknowledgment of community as unit of identity, 8–9; Action-Oriented Community Diagnosis (AOCD), 21; balance between knowledge generation and intervention for mutual benefit of all partners, 10; CBPR process used to modify interviewer training protocols, 23; colearning/capacity building among partners, 10; as collaborative approach to research, 16; collaborative map making, 463–488; and community assessment, 163–166; community assessment and diagnosis, 20–21; community-based ethnographic participatory research (CBEPR), 24; conceptual model, 63; core components, 11–13; cultural competence, 15–16; cultural humility, 15–16; cultural safety, 14–15; defining the issue or health problem, 22; dissemination of results to partners, 11; effective group process in, 69–96; ethnographic methods, 21–22; exposure assessments, 24–25; facilitation of collaborative, equitable partnership in all phases of research, 9;
feedback and interpretation of findings, 26; Food Environment Audit for Diverse Neighborhoods, 24; funding opportunities supporting partnership approaches to research, 5; group process methods and facilitation strategies, 20; and health inequities, 13–18; Healthy Environments Partnership, 22–23; infrastructure for equitable participation in decision making, 20; Inspirational Images Project, 28; interviewer training manual, development with members of Apsáalooke Nation, 225–248; knowledge/skills, demand for, 7–8; Los Angeles Collaborative for Environmental Health and Justice, 28–29; map making, 27; NYC food environments, policy work to improve, 517–545; partnership formation and maintenance, 19; partnership success, 60; permutations/reformulations of processes, 46; phases in conducting, 11–13; photovoice, 27–28; pregnancy, strategies to maintain healthy diets and physical activity levels in, 23; principles of, 8–13; process methods tools/procedural documents/data collection instruments, 29; in public health, 6; relevance of, for professionals, 6–7; and strengths/resources within community, 9; sustainability, long-term process and commitment to, 11; systems development using a cyclical and iterative process, 10–11; university-community research partnerships, 19–20; utilizing principles of, 60; workshops, 6–7

Community-Based Participatory Research for Health (Minkler/Wallersein), 17
Community-Campus Partnerships for Health, 121
Community-centered research, 5
Community coauthorship, 414
Community ethnographers, 310–312; administration of the survey, 316; CBEPR partnership, 311–312; CBEPR process, stages of, 312–313; collaboration, 312; developing the grant proposal (stage 1), 313; ethnographers, checking in with, 316–317; ethnographic training, 315–316; ethnosexual survey, 314–315; findings, analyzing, 317–321; major causes of HIV, identification of, 313–314; moving from concept to process (stage 2), 314–317; study background, 310; study setting, 310–311; team members, 312; team size, 312
Community forum planning committee, AOCD, 153
Community, getting to know, 48
Community Health and Social Services Center, Inc. (CHASS), 254
Community Health Centers, 98
Community involved research, 5
Community maps, See also Community mapping; Map making: ArcPad GIS software, 472; bonding/bridging, focusing on, 483; building a power/organizing base in communities of color, 484; building knowledge
incrementally, 483; building leadership through, 471–478; and CBPR, 483–485; challenges, 482–483; characterizing one’s community by selecting features to map, 483; as common language, 484; community cumulative impacts on, 476–477; community-gathered data, sharing of, 473; community organizing priorities, reframing, 484; concrete community health with broader policy frames, 483; contested images, 478–482; exercise, 472; gaps in the CARB inventory of polluters, 473–476; global positioning system (GPS), 472; hazards/sensitive receptors, 473–474; for health equity in Brooklyn, New York, 477–478; health equity, linking work to, 484; improving lives using, 484–485; local knowledge, highlighting, 484; mapping follow-up, 477; paper worksheets to record observations, 472–473; policies, changing, 484–485; recommendations, 482–483; young people, engaging, 482

Community Organizing Network for Environmental Health (CONEH), 407–408, 409

Community participation, 98

Community partnerships: CBPR processes, permutations and reformulations of, 46; common identities, 45; community-based organizations (CBOs), 47; criteria for academic partners, 56; developing and maintaining, 43–68; guidelines for clarifying involvement with, 62–63; insider-outsiders, 45; partnership development and maintenance, 47; working to deepen participation of, 57

Community-wide assessment, Men on the Move CBPR project, 443; findings/action steps taken based on, 446–447; partner engagement in, 446

Conceptual framework for assessing, partnerships, 372–374

Confidentiality, respecting, 79

Conflict, 11, 15, 19–20; addressing, 71, 77, 86–87; agreeing to disagree, 86; building in structures to deal with, 62; conflict management procedures (CMPs), 114–116; within ethnography, 180; interpersonal, 86; management, 86–87, 101, 111, 114, 139, 443, 448; negotiation, 114; resolution, 372, 373, 377; resolution committee, 115–116

Consensus decision making, 89

Continuum of Community Involvement, Impact, Trust, and Communication Flow, 98–101, 121

Corburn, J., 463

Crisis mapping software, 467

Critical consciousness, 492

Cross-sectional food audits, 293

Cultural competence, 15–16, 57

Cultural humility, 15–16, 57; areas of focus, 16

Cultural interpretation, 307

Cultural safety, 14–15; achieving within a CBPR partnership, 15; influence of cultural factors on relationships between professionals and communities, 15
Culturally supported interventions (CSIs), 58
Culture Box, 89
Culture-centered interventions, 51–52
Cumulative Exposure Project (CEP), and EPA, 479
Cumulative impacts, 476

D
Data analysis: closed-ended survey questionnaires, 384; Community Action Against Asthma (CAAA), 425; focus groups, 262–264; Healthy Environments Partnership (HEP), 283–284; in-depth, semistructured interviews, 381
Data collection: Action-Oriented Community Diagnosis (AOCD), 142–143, 153; closed-ended survey questionnaires, 384; community-based participatory policy work (CBPPW), 528–536; ethnography, 175–178; focus groups, 258–259; Food Environment Audit for Diverse Neighborhoods (FEAD-N), 291–292; Healthy Environments Partnership (HEP), 200; Healthy Homes, 346–348; Inspirational Images project, 496, 500–501; Men on the Move CBPR project, 455–456; methods, 374–375; partnerships, 374–375; photovoice, 499–500; Seattle-King County Asthma Program (SKC-AP), 350
Data feedback: closed-ended survey questionnaires, 384–385; focus groups, 264–266
Decision making, 87–89; consensus, 89; decentralized, 85–86; equitable, 101–102, 109, 110, 120; influence, 199
Deep Water Horizon Oil Spill (Gulf of Mexico), 467
Detroit Community-Academic Urban Research Center (URC), 26, 200, 253, 371; board, 376–377; evaluation subcommittee, role of, 377–379; formative evaluation, 377; funding, 376; and Michigan Center for the Environment and Children’s Health (MCECH), 407–409; overall goal of, 376; participatory evaluation, 377; partnership background, 376–377
Detroit URC Board, 84
Diabetes: in African Americans, 521; and East Side Village Health Worker Partnership (ESVHWP), 281
Diesel Exposure Study, 408, 409
Direct observation, food audits, 279
Disaster Resilience Academy (Tulane University), 467
Disrespect, and ethnography, 180
Dissemination: AOCD, 143; Community Action Against Asthma (CAAA), 416–423, 429
Dissemination committee, CAAA, 410–416; coauthorship, defined, 414; coauthorship rules, establishing, 413–414; community coauthorship, 414; community forums, 416; core articles for publications and presentations, proposal list of, 414–415; developing, 412–415; dissemination guidelines, developing, 412–415; feedback procedures, 415–416; formation of, 411; International Committee of Medical
Journal Editors, 413–414; partner selection to copresent at conferences, 412–413; recruiting/selecting members, 411–412; representation on, 411; revising/finalizing, 414; transition of responsibilities to the steering committee, 416

Dissemination guidelines, 26–27, 102, 116–119, 405–433; abstracts/abstract authorship, approving for conference presentations, 418; adhering to, 424; balancing dissemination and chickadees with other project demands, 424–425; community forums, 422–423; deadlines, meeting, 424; dissemination decisions/activities, examples of, 416–423; dissemination requirements for affiliated projects, discussing how to handle, 420; fact sheet development/distribution, 421; feedback to study participants and the larger community, 421; implementation of, 416–423; individualized feedback to project participants, 421–422; lead author, identification of, 118–119; lead authors/co-authors for manuscripts, selecting, 418–419; Publications and Dissemination Committee, 118; representatives for conferences/meetings, selecting, 417; Request for Use of Community Action Against Asthma Data form, 419–420; use of data, handling requests for, 419–420

Diverse partnerships, strategies for working, 89–90

Duran, B., 43

Dust samples, 337

E

East Oakland, Alameda County, California, Hegenberger Corridor, 469–471, 476

East Side Village Health Worker Partnership (ESVHWP), 281–282, 297–298; Detroit food stores, early observations of, 282–283; and diabetes, 281; Healthy Eating and Exercising to reduce Diabetes (HEED) project, 282; informal food store observations, 283

Ecological modeling, 169

Economic assessment, Men on the Move CBPR project, 447–448; findings/action steps taken based on, 448; partner engagement in, 447–44

Economic Opportunity Act (1964), 98

Edgren, K. K., 405

El Centro Hispano (ECH), 310–312

emic, 134

Eng, E., 3, 133, 489

Environmental exposure assessment methods, asthma, 337–340

Environmental Protection Agency (EPA), 336, 407, 477; and Cumulative Exposure Project (CEP), 479

Epidemiological and intervention studies, of children's lung function/asthma-related health indicators, 407

Equitable decision making: accessibility, 109; achieving consensus on developing infrastructure for, 120–121; format, 109; literacy, 109; policies for, 120; with regard to investigators/research process, 120; structures for,
101–102; tailoring, 109; and training in research ethics, 110
Equitable participation, 85
_Ethical Considerations in the Conduct and Reporting of Research: Authorship and Contributorship_ (International Committee of Medical Journal Editors), 117
Ethics training and certification, 107–110
Ethnic communities, and research, 14
Ethnic disparities in health care, 306
Ethnography, _See also_ Community ethnography; Gender, Migration, and HIV Risks Among Mexicans study; _Horizonte Latino_ (Latinos Moving Forward): assessment group, forming, 166–167; assessment models, 168–169; capacity, at individual/organizational levels, building on, 323; CBEPR, carrying out in context of marginalization, 323–324; CBEPR partnership, 311–312; and CBPR, 305–334; collaborative model, 308; community ethnographers, 310–312; conflicts within, 180; cultural consensus modeling, 174; cultural/structural level data, 171; defined, 307–308; disrespect, 180; ethnographic methods, building an understanding of, 323; ethnosexual survey, 309; and fit of research project to cultural context, 307; focus of, 308; forms of, 307; Gender, Migration, and HIV Risks Among Mexicans study, 310–312; group structure, 322; immigrants interviewing immigrants, 323; implementation challenges, 179–180; in-depth community expert interviews (CEs), 172–173; individual-level data collection, 175–178; inexperience, 180; inflexibility, 180; interpreting culture, 308; issue identification, 168; knowledge arrogance, 180; knowledge of health disparities in diverse communities, building, 326–327; lack of belief in research results, 180; learning among diverse groups, facilitating, 322; limited literacy levels, 180; locally specific survey methodology, 177–178; methods within methods, 309; ownership, 322; participatory analysis and triangulation of data for results, 178–179; participatory approaches to, 162; and participatory community assessment, 166–170; participatory geosocial mapping, 171–172; pile sorting, elicitation through, 174; practice implications, 328; research technology, 180; semi-structured open-ended interviews, 175–176; skills/understandings, 324–326; social and physical mapping, 171; study background, 310; study setting, 310–311; taking action, 324; teen hustling project model building, 170; theme, 307–308; time limitations, 180; using in participatory community assessment, 161–188; Youth Action Research Institute (YARI), Institute for Community Research, 167–168
Ethnosexual survey, 309; community ethnographers, 314–315; _Horizonte Latino_, 309
etic, 134
Evaluation subcommittee, Detroit Community-Academic Urban Research Center (URC), 377–379
Evaluation, types of, 371
Evidence-based practice, practice-based evidence compared to, 58
Exclusion of cultures/groups, 51

F
Facilitation strategies, applying, 75–76
Faith Leaders for Environmental Justice (FLEJ), 526–527, See also Food environments, in NYC; CBPPW efforts, 528; Dialogue Circles, 531; dialogue-to-change method (Everyday Democracy), 529; Food, Faith, and Health Disparities Summit (Oct. 2010), 527; food justice, 526; founding of, 526; Healthy Incentives Working Group, 531–532; Supplemental Nutrition Assistance Program (SNAP), 531; working groups, 530–531
Farm Bill, and Brooklyn Food Coalition (BFC), 535
