Part Ten  PV MODULES AND MANUFACTURING  

10.1 Manufacturing of Various PV Technologies  
Alison Lennon and Rhett Evans  

10.1.1 Introduction 465  
10.1.2 Manufacturing of Screen-Printed p-Type Silicon Cells 465  
10.1.2.1 Surface Texturing 466  
10.1.2.2 Junction Formation 467  
10.1.2.3 Emitter Isolation 468  
10.1.2.4 Antireflection Coating 469  
10.1.2.5 Screen Printing and Firing of Metal Electrodes 470  
10.1.3 Advanced p-Type Cell Technologies 472  
10.1.4 Higher Efficiency n-Type Technologies 473  
10.1.5 Conclusion 473  
Acknowledgements 474  
List of Abbreviations 474  
References 474
10.2 Encapsulant Materials for PV Modules

Michael Kempe

10.2.1 Introduction 478
10.2.2 Types of Encapsulant Materials 478
10.2.3 Polymer Light Transmittance 482
10.2.4 UV Durability 483
10.2.5 Resistivity 485
10.2.6 Moisture Ingress Prevention 486
10.2.7 Conclusion 488
Acknowledgments 488
List of Symbols 488
List of Acronyms 488
References 489

10.3 Reliability and Durability of PV Modules

Sarah Kurtz

10.3.1 Introduction 491
10.3.1.1 Importance and Challenge of PV Module Reliability and Durability 491
10.3.1.2 Challenge of Determining Reliability and Service Lifetime 492
10.3.2 PV Module Durability, Quality, and Reliability Issues 492
10.3.2.1 Electrical Circuit Failures 494
10.3.2.2 Encapsulant Discoloration and Delamination 496
10.3.2.3 Corrosion 498
10.3.2.4 Potential-Induced Degradation 498
10.3.2.5 Thin Film Module Failure/Degradation Mechanisms 498
10.3.3 Strategy for Improving PV Reliability 499
10.3.3.1 Applying Today’s Knowledge 499
10.3.3.2 Creating Qualification Standards that Differentiate Use Environments 499
10.3.3.3 Addressing Quality Control and Manufacturability 499
10.3.3.4 Creating a Standard for Service Life Predictions 500
10.3.4 Conclusion 500
Acknowledgments 500
References 501

10.4 Advanced Module Concepts

Pierre Verlinden

10.4.1 Introduction 502
10.4.2 Double-Glass Modules 503
10.4.3 Anti-Reflection Coated Glass 504
10.4.4 Half-cell Modules 504
10.4.5 Light Capturing Ribbon 505
10.4.6 Light Reflective Film 506
10.4.7 Smart Wire and Multi-Busbars 507
10.4.8 Smart PV Modules 507
10.4.9 Conclusion 508
List of Symbols 508
List of Acronyms 508
References 509

Part Eleven  PV SYSTEMS AND APPLICATIONS 511

11.1 Grid-Connected PV Systems 513
Greg J. Ball

11.1.1 Introduction 513
  11.1.1.1 System Design Basics 514
11.1.2 Grid-Connected System Types 515
  11.1.2.1 PV on Buildings and Structures 515
11.1.3 Performance 521
  11.1.3.1 Maximizing Energy Capture 521
  11.1.3.2 Designing for Financial Return 523
11.1.4 Safety and Fire Protection 523
  11.1.4.1 Overcurrent Protection 524
  11.1.4.2 Grounding and Ground Fault Protection 524
  11.1.4.3 Arc Fault Protection 526
  11.1.4.4 Safety of the Public 526
  11.1.4.5 Safety of the Emergency Personnel 527
11.1.5 Conclusion 527

Acknowledgments 527
List of Acronyms 528
References 529

11.2 Inverters, Power Optimizers, and Microinverters 530
Chris Deline

11.2.1 Introduction 530
11.2.2 Power Conversion 530
  11.2.2.1 Practical Converter Considerations 532
  11.2.2.2 Wide Band Gap Components 533
11.2.3 DC Maximum Power Point Tracking 534
11.2.4 Inverter Efficiency 535
  11.2.4.1 CEC vs European Efficiency 535
11.2.5 Auxiliary Functions 536
11.2.6 Conclusion 536
List of Symbols 537
List of Acronyms 537
References 538

11.3 Stand-Alone and Hybrid PV Systems 539
Matthias Vetter and Georg Bopp

11.3.1 Introduction 539
11.3.2 Solar Pico Systems 539
11.3.3 Solar Home Systems 540
11.3.4 Hybrid PV Systems for Stand-Alone Applications 541
  11.3.4.1 Technical Applications 541
  11.3.4.2 Residential Applications 544
11.3.5 PV Diesel Mini-Grids 544
  11.3.5.1 Systems Without Storage 545
  11.3.5.2 Systems with Storage 545
  11.3.5.3 DC Coupled Systems 546
  11.3.5.4 AC Coupled Systems 547
  11.3.5.5 DC/AC Mixed Solutions 548
11.3.6 Battery Storage 549
11.3.7 Conclusion 551
References 552

11.4 PV System Monitoring and Characterization 553
Wilfried van Sark, Atse Louwen, Odysseas Tsafarakis, and Panos Moraitis
11.4.1 Introduction 553
11.4.2 Monitoring Practice 555
11.4.3 Monitoring Examples 558
  11.4.3.1 Normal Operation 558
  11.4.3.2 Shading 558
  11.4.3.3 Statistical Analysis 560
11.4.4 Conclusion 561
Acknowledgments 561
List of Symbols 561
List of Acronyms 562
References 562

11.5 Energy Prediction and System Modeling 564
Joshua S. Stein
11.5.1 Introduction 564
11.5.2 Irradiance and Weather Inputs 565
11.5.3 Plane of Array Irradiance 566
11.5.4 Shading, Soiling, Reflection, and Spectral Losses 567
  11.5.4.1 Shading Losses 567
  11.5.4.2 Soiling Losses 568
  11.5.4.3 Reflection Losses 568
  11.5.4.4 Spectral Mismatch Losses 569
  11.5.4.5 Effective Irradiance 569
11.5.5 Cell Temperature 569
11.5.6 Module IV Models 570
  11.5.6.1 Equivalent Circuit Diode Models 570
  11.5.6.2 Fixed-Point Models 570
11.5.7 DC-DC Maximum Power Point Tracking and DC Losses 571
11.5.8 DC to AC Conversion 572
11.5.9 AC Losses 573
11.5.10 Modeling of Stand-Alone PV Systems 573
  **11.5.10.1 Direct-Drive Water Pumping PV System** 573
  **11.5.10.2 Stand-Alone PV system with Battery Storage and Inverter** 574

11.5.11 Conclusion 574
List of Symbols and Acronyms 575
References 577

**11.6 Building Integrated Photovoltaics** 579
*Michiel Ritzen, Zeger Vroon, and Chris Geurts*
11.6.1 Introduction 579
11.6.2 BAPV vs BIPV 580
11.6.3 BIPV Design 581
11.6.4 BIPV Building Aspects, Codes and Regulations 586
11.6.5 Outlook 587
List of Acronyms 588
References 588

**11.7 Product Integrated Photovoltaics** 590
*Angèle Reinders and Georgia Apostolou*
11.7.2 Application Areas of Product Integrated Photovoltaics 591
11.7.3 Selected Items for Product Integrated Photovoltaics 593
  **11.7.3.1 System Design and Energy Balance** 593
  **11.7.3.2 Environmental Impact** 594
  **11.7.3.3 User Interaction** 595
11.7.4 Conclusion 598
List of Acronym 598
References 598

Part Twelve  **PV DEPLOYMENT IN DISTRIBUTION GRIDS** 601

**12.1 PV Systems in Smart Energy Homes: PowerMatching City** 603
*Albert van den Noort*
12.1.1 Introduction 603
12.1.2 Technology 604
  **12.1.2.1 Photovoltaic Panels** 605
  **12.1.2.2 Hybrid Heat Pumps** 605
  **12.1.2.3 Micro Combined Heat and Power Units (MicroCHP)** 606
12.1.3 Matching Supply and Demand 607
12.1.4 New Energy Services 607
12.1.5 Results and Lessons Learned 608
12.1.6 Conclusion 610
List of Acronym 610
References 611
12.2  New Future Solutions: Best Practices from European PV Smart Grid Projects 612
    Gianluca Fulli and Flavia Gangale
12.2.1  Introduction 612
12.2.2  Insights from the JRC Smart Grid Inventory 613
12.2.3  Main Solutions Investigated by the Projects in the JRC Inventory 614
12.2.4  Conclusion 618
List of Acronyms 619
References 619

Part Thirteen  SUPPORTING METHODS AND TOOLS 621

13.1  The Economics of PV Systems 623
    Matthew Campbell
13.1.1  Introduction 623
13.1.2  Levelized Cost of Electricity (LCOE) 624
13.1.3  PV System Cost 625
13.1.4  System Energy Production 627
13.1.5  Cost of Capital 629
13.1.6  System Life 630
13.1.7  Annual Operating Costs 631
13.1.8  PV LCOE and Grid Parity 632
13.1.9  Conclusion 633
List of Acronyms 633
References 633

13.2  People’s Involvement in Residential PV and their Experiences 634
    Barbara van Mierlo
13.2.1  Introduction 634
13.2.2  Residents Purchasing and Owning a PV System 635
13.2.3  Residents Commissioning a House Renovation 637
13.2.4  People Receiving a PV System 638
13.2.5  Owners Using a PV System 638
13.2.6  Citizens Participating in Collective Initiatives 640
13.2.7  Synthesis and Conclusion 641
References 644

13.3  Life Cycle Assessment of Photovoltaics 646
    Vasilis Fthenakis
13.3.1  Introduction 646
13.3.2  Methodology 646
13.3.3  Cumulative Energy Demand (CED) during the Life of a PV System 647
    13.3.3.1  Energy Payback Time (EPBT) 648
    13.3.3.2  Energy Return on Investment (EROI) 649
    13.3.3.3  Greenhouse Gas (GHG) Emissions and Global Warming Potential (GWP) 649
References 649
13.3.4 Results 650

13.3.4.1 Energy Payback Time and Energy Return on Investment 650

13.3.4.2 Greenhouse Gas Emissions 651

13.3.4.3 Toxic Gas Emissions 652

13.3.5 Conclusion 655

References 656

13.4 List of International Standards Related to PV 658

Pierre Verlinden and Wilfried van Sark

13.4.1 Introduction 658

13.4.2 IEC Standards Overview 659

13.4.3 Underwriters’ Laboratories (UL) Standards 666

13.4.4 The SEMI Standards 666
