1 Correlations 1

1.1 The Domain of Sociolinguistics 2

1.1.1 Personal characteristics 2

1.1.2 Linguistic styles 4

1.1.3 Social characteristics 6

1.1.4 Sociocultural factors 8

1.1.5 Sociological factors 9

1.1.6 Sociolinguistics and the sociology of language 10

1.2 The Variable as a Structural Unit 11

1.2.1 Coexistent systems and free variation 12

1.2.2 The sociolinguistic enterprise 14

1.2.2.1 Precursors 14

1.2.2.2 Labov’s New York survey 16

1.2.2.3 Linguistic variables 17

1.2.2.4 Independent variables 17

1.2.2.5 Speech in the community 18

1.2.2.6 One subject, Susan Salto 19

1.2.2.7 All subjects in three social classes 21

1.2.3 Figures and tables 22

1.3 Variation and the Tradition of Categoricity 25

1.3.1 Langue and parole 25

1.3.2 The axiom of categoricity 26

1.3.3 Communicative competence 28

1.3.4 Linguistics without categoricity 32
## Contents

1.3.5 Categorical theory and variation theory 34  
1.3.6 Categoricity in other disciplines 35

2 Class, Network, and Mobility 38  
2.1 Social Class and Sociolinguistic Sampling 40  
2.1.1 Blue collar and white collar 41  
2.1.2 Judgment samples 42  
2.1.3 Random samples 43  
2.2 Indexing Social Class 45  
2.2.1 Socioeconomic indices 46  
2.2.2 Subject indices 48  
2.2.3 The primacy of occupation as a determinant of class 50  
2.3 Class Markers 53  
2.3.1 Spreading the news in Westerntown 53  
2.3.2 Boston “short o” 55  
2.3.3 Norwich (ɑː) 55  
2.3.4 Grammatical variables 56  
2.3.5 Montreal que-deletion 57  
2.4 The Effects of Mobility 58  
2.4.1 Caste and class 58  
2.4.2 Comparative mobility 58  
2.4.3 Mobility in language variation 59  
2.4.4 Decline of Briticisms in Canadian English 60  
2.4.5 New York (th) and (dh) 62  
2.4.6 Mobility as a leveling force 64  
2.5 Homogenization 65  
2.5.1 /a/-deletion in Sheshatshiu 66  
2.5.2 /ou/ in Milton Keynes 67  
2.5.3 The persistence of homogenization 70  
2.5.4 (aw)-fronting in Canada 71  
2.5.5 Dialect laws of mobility and isolation 73  
2.6 Networks 74  
2.6.1 Norm enforcement 74  
2.6.2 Network and class 75  
2.6.3 Some network studies 76  
2.6.4 Measures of network bonds 79  
2.6.5 Sociometrics 81  
2.6.6 Measures of network integration 83  
2.7 Linguistic Correlates of Network Integration 85  
2.7.1 Phonological markers in Martha’s Vineyard 86  
2.7.2 Grammatical markers in the Reading playgrounds 87
2.8 Interaction of Network and Other Independent Variables 89
  2.8.1 Social class 89
  2.8.2 Sex 89
  2.8.3 Age 90
    2.8.3.1 Network change in Detroit 90
2.9 Oddballs and Insiders 92
  2.9.1 Outsiders 96
    2.9.1.1 Lames in Harlem 96
    2.9.1.2 Ignaz in Grossdorf 99
  2.9.2 Aspirers 100
    2.9.2.1 A, B, and C in Articlave 100
    2.9.2.2 Samson in Anniston 104
  2.9.3 Interlopers 106
    2.9.3.1 Mr J in Toronto 106
    2.9.3.2 Newcomers in King of Prussia 108
  2.9.4 Insiders 109
    2.9.4.1 A “typical” boy in a New England village 109
    2.9.4.2 Elizabeth in Toronto 110
    2.9.4.3 Insiders as language leaders 112
  2.9.5 The linguistic limits of individuation 113

3 Expressing Sex and Gender 115
  3.1 The Interplay of Biology and Sociology 116
    3.1.1 Sex and gender 116
    3.1.2 Some sex differences 118
    3.1.3 Probabilistic, not absolute, differences 119
    3.1.4 Vocal pitch as a sex difference 119
  3.2 Sex Patterns with Stable Variables 120
    3.2.1 Variable (ng) 120
      3.2.1.1 The regional variant [in] 121
      3.2.1.2 Variant [on] as a sex marker 122
    3.2.2 Norwich (ng) 122
    3.2.3 Sydney (ng) 123
  3.3 Language, Gender, and Mobility in Two Communities 125
    3.3.1 Inner-city Detroit 125
      3.3.1.1 Variable (th) 126
      3.3.1.2 Variable (r) 126
      3.3.1.3 Multiple negation 128
      3.3.1.4 Copula deletion 129
      3.3.1.5 Gender roles in inner-city Detroit 130
3.3.2 Ballymacarrett, Belfast

3.3.2.1 Variable (æ) 134
3.3.2.2 Variable (th) 134
3.3.2.3 Variable (ɛ) 135
3.3.2.4 Variable (u) 135
3.3.2.5 Gender roles in Ballymacarrett 135

3.4 Sex and Gender Differences in Language 136

3.4.1 Gender-based variability

3.4.1.1 Isolation and gender roles 138
3.4.1.2 Shifting roles in coastal South Carolina 139
3.4.1.3 Mobility and gender roles 140

3.4.2 Sex-based variability

3.4.2.1 MC blurring of gender roles 141
3.4.2.2 “Status consciousness” 142
3.4.2.3 “Face” 144
3.4.2.4 Sociolinguistic ability 145
3.4.2.5 Verbal ability 146
3.4.2.6 Psychological explanations 147
3.4.2.7 Sex differences 148
3.4.2.8 Insignificance of individual differences 149

3.5 Male and Female Speech Patterns in Other Societies 151

3.5.1 Limits on female–male differences 151
3.5.2 Putative differences in Japan 152
3.5.3 The Middle East 154
3.5.3.1 (q) in Cairo, Amman, and elsewhere 155
3.5.3.2 A gender-based explanation 156
3.5.3.3 Prestige and standard varieties 157

3.6 Linguistic Evidence for Sex and Gender Differences 158

4 Accents in Time 159

4.1 Aging

4.1.1 Physical and cultural indicators 160
4.1.2 Some linguistic indicators 162

4.2 The Acquisition of Sociolects 165

4.2.1 Three formative periods 166
4.2.2 Development of stylistic and social variants 166
4.2.2.1 Style-shifting by Edinburgh schoolboys 167
4.2.2.2 Communal patterns in Scottish 10-year-olds 168
4.2.2.3 Emerging African American phonology in Washington 169
4.3 Family and Friends
   4.3.1 Dialect acquisition
      4.3.1.1 Six Canadians in England
      4.3.1.2 British twins in Australia
   4.3.2 Generational differences in bilingual situations
      4.3.2.1 Language shift in Oberwart, Austria
      4.3.2.2 Loan words in Spanish Harlem
   4.3.3 Parents versus peers

4.4 Declarations of Adolescence
   4.4.1 An adolescent majority
   4.4.2 Outer markings including slang
   4.4.3 Adolescent networks and linguistic variation
      4.4.3.1 Jocks and Burnouts in Detroit
      4.4.3.2 Burnouts and Rednecks in Farmer City

4.5 Young Adults in the Talk Market
   4.5.1 The marché linguistique
   4.5.2 “Legitimized language” in Montreal
      4.5.2.1 Auxiliary avoir and être
   4.5.3 Playing the talk market
   4.5.4 Linguistic stability in middle and old age

4.6 Changes in Progress
   4.6.1 Age-grading
      4.6.1.1 Zee and zed in southern Ontario
      4.6.1.2 Glottal stops in Glasgow
   4.6.2 Real time and apparent time
      4.6.2.1 Real-time changes in Tsuruoka
      4.6.2.2 An apparent-time change in Milwaukee
   4.6.3 Testing the apparent-time hypothesis
      4.6.3.1 Slower progress at higher frequencies: (e) in Norwich
      4.6.3.2 Verifying inferences about change: (CH) in Panama

5 Adaptive Significance of Language Variation
   5.1 The Babelian Hypothesis
      5.1.1 The evidence of subjective reaction tests
      5.1.1.1 Teachers’ evaluations of students
      5.1.1.2 Employers’ evaluations of job candidates
   5.1.2 Dialect as a source of conflict
   5.2 Global Counteradaptivity and Local Adaptivity
      5.2.1 Counteradaptivity and power
      5.2.2 Adaptivity and community
5.3 Dialects in Lower Animals 229
  5.3.1 Buzzy and Clear white-crowned sparrows 229
  5.3.2 The theory of genetic adaptation 231
  5.3.3 The theory of social adaptation 233
5.4 The Persistence of the Non-Standard 234
  5.4.1 Covert prestige 235
  5.4.2 Status and solidarity
    5.4.2.1 Jewish and MC accents in Montreal 238
    5.4.2.2 High and low accents in Guangzhou 239
5.5 Traditional Theories of the Sources of Diversity 240
  5.5.1 Variation and climates 241
  5.5.2 Variation and contact 243
  5.5.3 The prevalence of diversity 244
5.6 A Sociolinguistic Theory of the Sources of Diversity 245
  5.6.1 Linguistic diversity and social strata 246
  5.6.2 Two tenets about standard dialects 247
    5.6.2.1 Naturalness and economy 248
    5.6.2.2 Medial /t/ 249
    5.6.2.3 Economy as a general linguistic force 250
    5.6.2.4 Morpheme-final consonant clusters 251
    5.6.2.5 Standard and non-standard (CC) 251
  5.6.3 Naturalness beyond phonetics 252
    5.6.3.1 The principle of conjugation regularization 253
    5.6.3.2 Standard and non-standard conjugation regularization 255
  5.6.4 Two constraints on variation in standard dialects 257
5.7 Vernacular Roots 258
  5.7.1 Diffusionist and structural explanations 259
  5.7.2 Problems with the diffusionist position 259
  5.7.3 The internal–structural position 261
  5.7.4 Primitive and learned features
    5.7.4.1 Obstruent devoicing in second-language learning 263
    5.7.4.2 Devoicing and voicing medial /t/ 264
  5.7.5 Sociolinguistic implications 265
5.8 Linguistic Variation and Social Identity 266
