Index

ABCDE assessment, 32
abdominal thrusts, 82–4
acute coronary syndromes, 42, 219–232
classification, 220–1
diagnosis, 221
laboratory investigations, 223, 228
percutaneous coronary intervention, 229–232
thrombolytic therapy, 230–1
treatment, 228–232
12-lead ECG, 222–227
adenosine, 240
adrenaline, 155, 157–8, 172–3, 215–6
adrenaline infusion, 238
advanced life support, 147–179
advanced life support algorithm, 148
airway management, 88–116
airway obstruction, 34–35, 81–84, 88, 89
causes of, 89
complete, 90
partial, 90
recognition of, 89
airway, assessment of, 34–5, 245
amiodarone, 155, 173, 238, 241
anaphylaxis, 209–217
causes, 211
clinical features and diagnosis, 211–213
definition, 209–210
incidence, 210–211
pathophysiology, 211
treatment, 213–7
antihistamine, 216
arterial blood gas analysis, 246–7
asthma, 191–5
asystole, 57–8, 156, 158–9, 186, 196
atrial fibrillation, 61–2, 186
atropine, 157–8, 173, 236–7
AVPU, 42
bag/valve/mask ventilation, 119–121
basic life support, 64–77
biphasic waveform, 144
blood pressure, 41
bereavement, 266–272
breaking bad news, 267–9
relatives room, 266–7
breathing, assessment of, 35–40, 245–251
broad complex tachycardia, 57, 154, 241–2
calcium, 173–4, 184
capillary refill time, 40–1
cardiac arrest trolley, 16
cardiac monitoring, methods, 49–52
ECG leads, 49–50
defibrillator paddles, 50–1
large adhesive pads, 51
problems with, 51–2
carotid sinus massage, 240
cervical spine immobilisation, 191, 197
cervical spine injury, 91–2, 191
chain of survival, 1–2
checking of, 17–18
chest auscultation, 38–9, 249–250
chest compressions, 70–73, 160–163
chest compression devices, 163–4
chest compressions-only CPR, 72–3
chest percussion, 36–8, 247–9
chest thrusts, 82–4
Cheyne-Stokes breathing, 35
circulation, assessment of, 40–2, 251
cocaine toxicity, 201
combitube, 106–7
comprehensive critical care, 25
cardiovascular system of the heart, 48
consciousness, altered level of, 24
convulsions, 255
CPR, safer handling, 9–10, 65, 66
bath, 11
bed, 10–11
chair, 11
couch, 10–11
floor, 10
toilet, 11
trolley, 10–11
crackles, 39
cricoid pressure, 107–111
cautions, 111
complications, 110–111
indications, 108
mode of action, 109
pressure, amount of, 108–9
procedure 109–110
relevant anatomy, 107
critical illness, 2, 24–43
assessment of, 31–43
clinical signs of, 24
critically ill patient, recognition of, 20
defibrillation, 124–140
pads vs. paddles, 134
physiology, 126
procedure for automated, 138–140
procedure for manual, 134–8
safety issues, 132–4
shock energy, 127
success, factors affecting, 127–132
dentures, 93
do not attempt resuscitation orders, 275–288
drowning, 189–191
drug delivery routes, 170–2
drugs, for resuscitation, 172–4
early warning scoring system, 5, 24–8
ECG interpretation, 52–56
electrical activity, 52
P waves, 55
QRS rate, 53
QRS rhythm, 53
QRS normal or broad, 53, 55
relationship between P waves and QRS complexes, 55
ECG monitoring, 47–63
electrocution, 195–7
ethical issues, 273–288
exposure, 43
external pacing, 176–9, 237–8
first-degree AV block, 58–9
foreign body airway obstruction, 81–4
incidence, 81
recognition, 82
treatment, 82–4
gastric inflation, minimising, 76–7, 121
Glasgow Coma Scale, 42, 251–2
gurgling, 34, 245

hazards, when attempting CPR, 65–6
head tilt, chin lift, 90–1
hypercalcaemia, 186–7
hyperkalaemia, 183–5
hypermagnesaemia, 186–7
hypocalcaemia, 186–7
hypokalaemia, 185–6
hypomagnesaemia, 186–7
hypotension, 24
hypothermia, 168, 186, 188–9, 191
hypovolaemia, 41, 167
hypoxia, 167

ICU admissions, sub-optimal care prior to, 22
implantable cardioverter defibrillator, 144
intracardiac drug administration, 172
intravenous access, 159, 170
jaw thrust, 91–2, 191

laryngeal mask airway, 102–6
advantages, 103
description, 103
indications, 102
insertion, 104–6
lignocaine, 174
local anaesthetic, cause of cardiac arrest, 203

magnesium, 173, 242
manual handling, 9–11
medical emergency teams, 30–1
mouth-to-mask ventilation, 116–118
mouth-to-mouth ventilation, 73–76, 116

narrow complex tachycardia, 61
nasogastric tube, 251
nasopharyngeal airway
correct size, 100
indications, 99
insertion, 101–2
nervous control of heart, 48–9

opiate toxicity, 200–1
oropharyngeal airway, use of, 94–9
cautions, 96
correct size, 96–7
indications for use, 94
insertion, 97–9
outreach teams, 29–30
oxygen saturation monitoring, 35

pacing, 176–9, 237–8
peri-arrest arrhythmias, 58–62, 234–242
adverse clinical signs, 235–6
algorithms, 235, 237, 239
bradycardia, management of, 236–8
tachycardia, management of, 238–242
pleural fiction rub, 39
pocket mask, 116–8
poisoning, 199–202
poor outcome, prediction of, 262–3
post-resuscitation care, 7, 244–263
limiting damage to vital organs, 254–6
potassium, administration of, 186–7
PQRST complex, 49
pre-filled syringes, 174–6
precordial thump, 165–7
pregnancy, 7, 197–9
prevention of in-hospital cardiac arrest, 23
pulses, assessment of, 40, 152, 154
pulseless electrical activity, 58, 156–7, 199
QT interval, prolonged, 242
recommended equipment on cardiac arrest trolley, 14–17
records and record keeping, 291–6
recovery position, 77–81
resuscitation committee, 3–4
Resuscitation Council UK, 8–9
resuscitation equipment, 13–18
resuscitation officer, 4
resuscitation team, 6
resuscitation training 5, 297–307
reversible causes of cardiac arrest, 167–169
rewarming, 188–9
safer handling, 9–11, 66
second-degree AV block type 1, 59–60
second-degree AV block type 2, 60
sinus bradycardia, 56, 186
sinus rhythm, 54–5
sinus tachycardia, 54, 56
snoring, 34, 245
sodium bicarbonate, 174, 184, 201
stridor, 34, 36
suction, 93–5
synchronised electrical cardioversion, 140–3
tachycardia, 24
tachypnoea, 24
tamponade, 169
temperature control, 257–262
tension pneumothorax, 168–9, 192, 194
therapeutic hypothermia, 257–262
third-degree AV block, 60–1
thromboembolic obstruction, 169
torsades de pointes, 62
toxic/therapeutic disturbances, 169
trachea, position of, 36, 246
tracheal intubation, 111–116
advantages, 111
disadvantages, 112
DOPE, 115–6
equipment, 112
procedure, 113–115
tracheal tube, drug administration, 171–2
transfer to definitive care, 253–4
trauma, 7, 202–3
tricyclic toxicity, 201
unstable angina, 220–1
vagal manoeuvres, 240
ventilation, 116–121
ventricular fibrillation, 56–7, 125–6, 154, 156, 186, 196
wheeze, 34, 39
witnessed resuscitation, by relatives, 270–2
Wolf Parkinson White syndrome, 242
