- sterols, triterpenes, 130–131
- Vitamin C, 130–131
storage and processing, bioactives, 138
agronomic practices, 139
postharvest handling, storage, 139
storage, processing effect on bioactives
processing, 139–140
pumpkin, squash, 298tr, 321
resin-based technologies, 429–430
saw palmeto extract (SPE), 72–73, 73f
snake gourd, 299tr
St. John’s Wort, 59
stone fruits. See also apricots; cherry; peach,
nectarine; plums
origin, diversity, traditional uses, 126, 127r,
128, 128tr
tomatillo, 299tr
carotenoids, 187
health benefits, 187, 318
nutritional profile, 186

origins, traditional uses, 186
phenolic contents, 186–187
tomato, 299tr
health benefits
- cancer, 303, 304–305tr, 306
- cardiovascular disease (CVD), 306–307
- other diseases, summary, 307, 308tr, 309
lycopene mechanism of action, 309
other components, mechanism of action,
310
phytochemical composition, 300tr
Y-aminobutyric acid (GABA), 303
cystine-knot miniproteins (TCMP-1,
TCMP-2), 303
glycoalkaloids, 302–303
lycopene, dietary intake, 301b
lycopene, other carotenoids, 300–302
phenolics, 302

vegetable fruits, 293, 294tr
ackee, 295r, 324, 324b
avocado, 295r
bitter melon, 295r, 321
bottle gourd, 295r, 321, 323
breadfruit, 295r, 324–325
ciaiga, 296tr, 323
capsicum, 296tr
health benefits, 314–315tr
- obesity, 313, 316
- pain relief, 313, 313b
- mechanism of action, 316–317
phytochemical composition, 311tr
capsaicinoids, 311–312
carotenoids, 312
flavonoids, other phenolics, 312–312
species, 310
chayote, 296r
cucumber, 297r
cucurbitaceae
genera, species, 319
health benefits
- anti-inflammatory, 323
diabetes, 321
mechanisms of action, 323–324
phytochemical composition
Y-aminobutyric acid (GABA), 320
alkaloids, 320
carotenoids, 319–320
cucurbitacins, 320
other, 320–321
polysaccharides, 320
saponins, 323
total phenolics, flavonoids, 322
eggplant, 297
  antioxidant capacity, 317
  cancer, 318
cholesterol, 318
food history, 317
health benefits, 317–318
  phenolics, 317
ivy gourd, 297
luffa, 297
okra, 298, 324–325
olive, 298
phytochemical composition, health benefits,
  293, 295–299
pumpkin, squash, 298, 321
snake gourd, 299
tomatillo, 299
  health benefits, 318
tomato, 299
  health benefits
    cancer, 303, 304–305, 306
    cardiovascular disease (CVD), 306–307
    other diseases, summary, 307, 308, 309
    lycopene mechanism of action, 309
other components, mechanism of action, 310
phytochemical composition, 300
  γ-aminobutyric acid (GABA), 303
  cystine-knot miniproteins (TCMP-1, TCMP-2), 303
  glycoalkaloids, 302–303
lycopene, dietary intake, 301
  lycopene, other carotenoids, 300–302
  phenolics, 302
wax gourd, 299
virgin olive oil (VOO)
cardiovascular diseases (CVD), 362
  antioxidant, free radical scavenging, 359
  atherosclerosis, 358–360
  blood pressure, 359
  endothelial dysfunction, 360
  inflammation effect, 361
  LDL particles, 360
monounsaturated fatty acids (MUFAs)
  benefits, 357–358
  olive oil phenolic compounds,
  cardioprotective effects, 358–361
components, 352–354, 354
classes of olive oil, production schemes,
  355–356, 356
future perspectives, 361–362
Mediterranean diet, 353
minor components, 353–354
monounsaturated fatty acids (MUFAs), 353
phenol compound content, factors affecting,
  355–357, 355
phenolic components, 354, 354
stability, 357
storage conditions, 356–357
water purification, 431
wax gourd, 299
